Higher Bids Welcome The New Year

FUN Auctions At \$32 Million And Counting

The new year may only be just one week old but already we have had many things taking place that could have a significant impact on the rare coin market. First, the precious metals took center stage as they opened the new campaign with a burst out of the gate. Yet on January 3 Gold Spot's quick boost was squelched by a report proclaiming that manufacturing in the U.S. had expanded in December. This news in turn buoyed the U.S. dollar and reduced the immediate flight to the yellow metal. The dollar and Gold often demonstrate an inverse relationship and this trend appears to be continuing. Of course declining crude oil prices have also taken some of the sizzle away from the metal market, yet as oil has dropped to below \$59 per barrel Gold Spot is still trading over the important \$620 level while Silver trades near \$12.50.

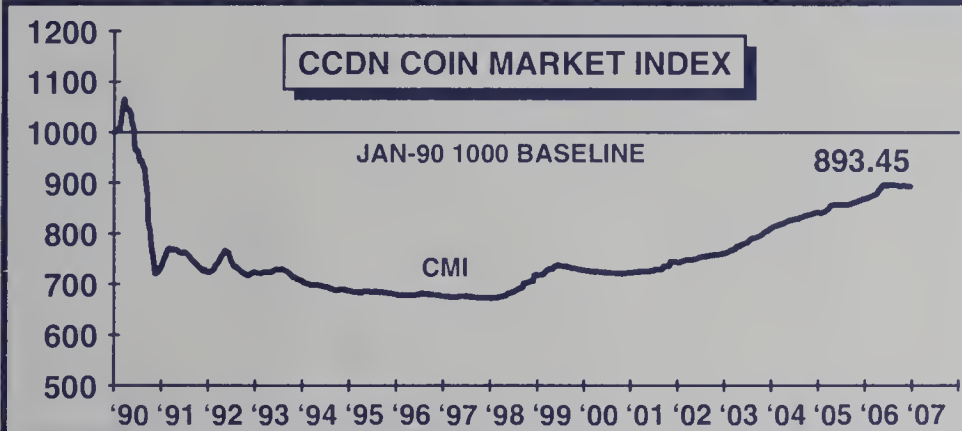

Of course the ultimate deciding factor for the numismatic market will be determined by the collector demand for coins. Initial indications look optimistic as early Florida auction results are ringing up some big transactions from many coins that are not even considered to be mainstream. Colonial issues, patterns and other esoteric coins are realizing **huge** prices and that's a positive to be sure. The usual buyer of these coins is the serious collector so this may be another indication that the collector base is truly expanding. Further, it might suggest that the sophistication level may be increasing as well. Stack's Orlando Sale gave the rare coin market a jump-start as it realized \$7.4 million. The total would have no doubt reached double digits but for the fact that the much heralded and finest known 1913 Liberty Head Nickel failed to sell as the consignor's minimum wasn't met. Superior's Orlando 2007 Elite Coin Auction followed Jan. 2-3 and it realized slightly over \$2 million. We have listed a few highlights from these two sales. The Heritage FUN auction is not completed at press time but has already totaled over \$22.3 million. It's amazing to think that all of this activity occurred within the first few days of the new year and the Florida United Numismatist show and auction are still in progress.

The sight-unseen market is beginning the new year a bit mixed. Discounting is taking place and we expect this to continue as FUN auction bills mount. Commems, the usual discounting favorites are not disappointing anyone as several have decreased. However the declines are rather modest. Walking Liberty Half Dollars are scoring some of the sight-unseen gains as

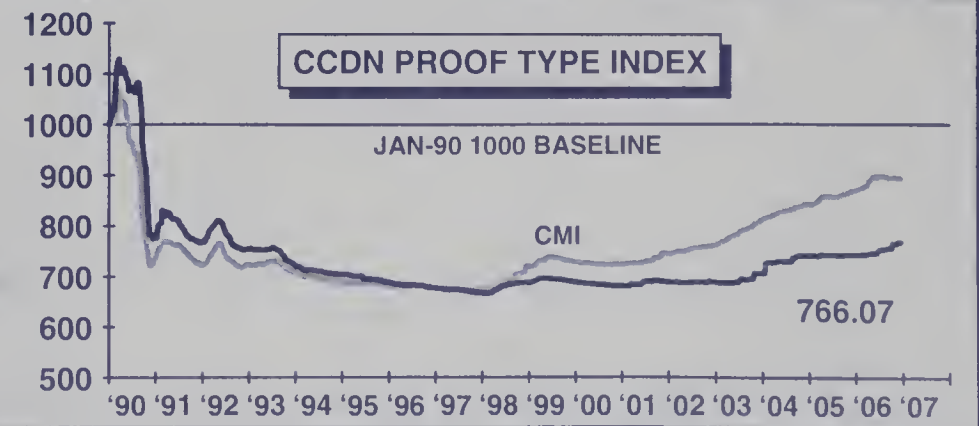

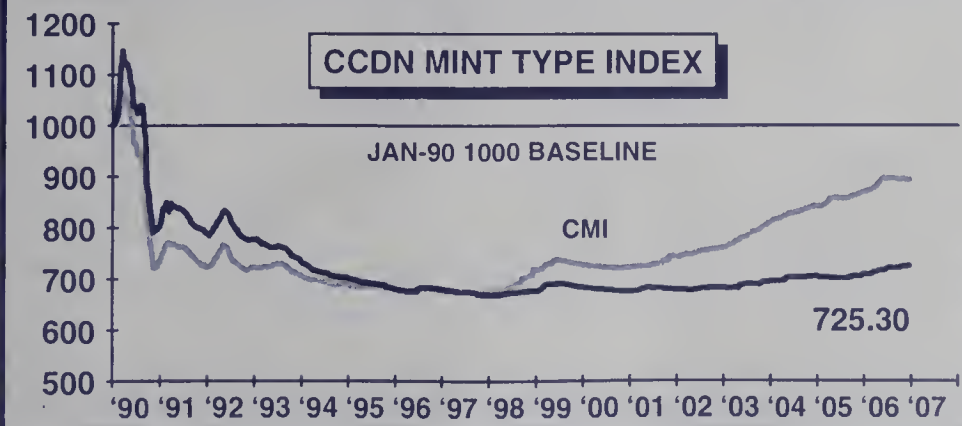

Bids increase for late date coins in MS64 thru MS66. Notice the later key date, 1938-D is up in MS63 and MS64. Still, some marginal discounting is taking place among select Mint State and Proof Walkers too. Another popular design, the Buffalo Nickel, is being discounted in some areas with PCGS MS66 examples declining due to lower auction results. A better early date, a PCGS MS66 1917-D dropped nearly 13 percent. Only 12 have been graded at PCGS with none higher from that service. Yet on the flip side we note that a recent David Lawrence Internet sale provided some powerful prices realized for a small herd as a 1924 PCGS MS67 topped \$20,930; a tough 1914S graded PCGS MS66 realized \$13,800; and a 1936D wonder coin proclaimed PCGS MS68 brought home an incredible \$37,375. Mint State Type is mixed with Liberty Seated issues moving up and down. High grade Proof Type is showing signs of weakness with some Liberty Seated issues selling for less at auction. Liberty Seated Quarters, with Motto in NGC PR66 are leading the pack lower, down 15 percent. On the upside, NGC PR65 1873-1874 with Arrows Liberty Seated Halves are now Bid at \$6,500. Mint Gold Type is mixed in quiet trading. The Morgan Dollar series opens the new year with common date Carson City issues on the rise in several lower Mint State grades. We also see a higher \$1,000 Bid for PCGS and NGC MS65 1881-O, representing 16 and 7.5 percent gains respectively. We are encouraged by the marked increase in buyer activity here

which bodes well for the series as whole. Peace Dollars are also moving up with many dates participating from this short series. Another somewhat overlooked and perhaps undervalued area finds many ANACS graded coins garnering higher blind Bids. Take a look as enthusiastic buyer involvement covers several series.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

The Fine Print
*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions.
Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular US coin submissions, which excludes varieties, errors, CONECA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

Bids for Lincoln Cents are for full-red specimens in PR64 and higher.

Recovering From Massive Auction Blitz

Bull Still Evident As Supplies Grow

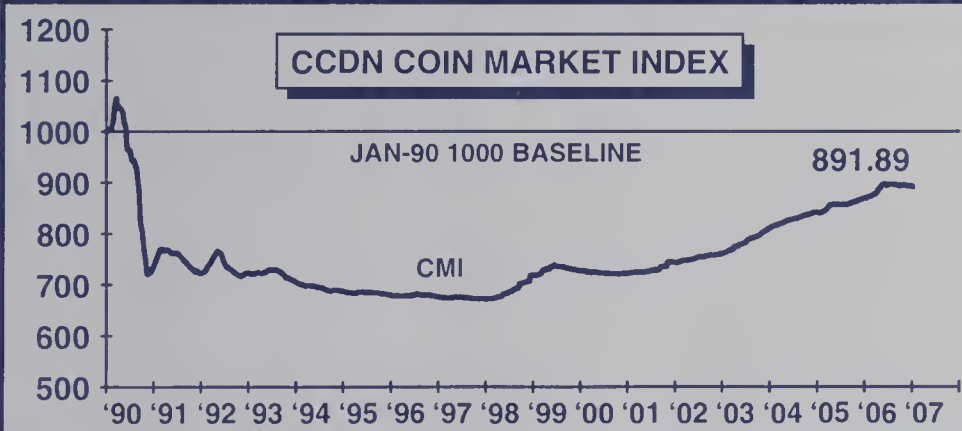

The Florida United Numismatists Show in Orlando was extremely active with top tier coins available in most categories for those dealers looking to buy. Needless to say those in attendance told us that they were generally busy throughout its exciting duration. They also said that the auctions were just simply overwhelming. This was due to the incredible supply of rare coins thrust on the market in so short a period of time. This veritable avalanche also allowed some coins to fall through the cracks and those dealers and collectors that were paying attention and took the time were able to get some nice bargains in Florida. Dealers also pointed to supply and that is definitely up right now especially for the average for the grade or just made the grade examples. It will be interesting to see if there can be enough demand to absorb it all. Continuing on this line of thinking, another dealer told us that he suggested to some of his customers prior to the show to place low ball Bids for generic Morgan Dollars at auction. He believed, and correctly so that some of them would be able to grab a few bargains. Most were thinking that they wouldn't have a chance during the auction blitz yet several of them were successful in this calculating endeavor.

It appears that the FUN auction and follow-up sales conducted by Heritage generated a world record \$77 million in numismatic transactions. We have listed a few of the many highlights. Topping the mind boggling array there were two prime numismatic treasures that brought more than \$1 million each, the 1907 Ultra High Relief Saint PCGS PR68 at \$1,840,000 and the 1839/8 Eagle NGC PR67 Ultra Cameo claiming \$1,610,000. This is impressive yet on the flip side of this euphoria we know there were a pair of potentially million dollar ultra rarities that went unsold. In addition, there is the multi-million dollar 1913 Liberty Head Nickel which failed to sell as well. So perhaps some possible readjustment may be in order here. Combine this with auction bills that are, and will be coming due and you might expect a lot of discounting to be taking place in the sight-unseen market. This present

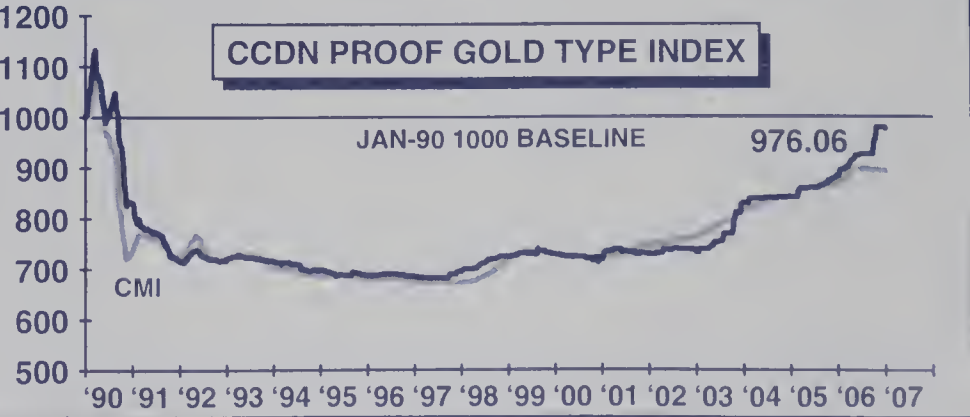

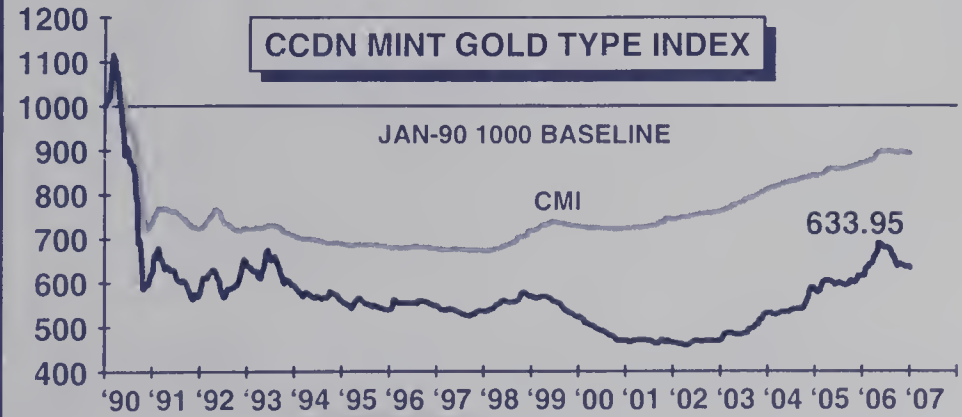

market is certainly well suited for the quick sale of certified rare coins as many dealers need to raise cash in a hurry. Considering that massive auction bills are either due or will be coming due we expected that the generic market would be the hardest hit. Yet considering that literally thousands of lots have just been sold, on a percentage basis very few were sold at substantially lower levels. Perhaps a surprise to some, the sight-unseen market remains rather resilient. Those areas that have been hit include Gold Commemoratives, hardly generic but they are readily available in high grade. These small coins were carefully saved and so MS64 and above examples are more common than you would expect. A combined PCGS and NGC population excluding the slugs for MS64 is 18,318 while more than 10,000 are available in MS65 and even 6,500 in MS66. Many of these coins reach four figures and some hit five figures. So it is easy to see why dealers sold Commem Gems to obtain much-needed funds. Some minor discounting was also taking place at auction in the Morgan Dollar series. Weakness was seen from generic issues' and some scarcer material. Type, usually the standout segment of the market was on the soft side. Mint State and Proof Type displayed a few minus

signs among the Liberty Seated and Barber sectors. Copper-Nickel Indian Cents, Liberty Nickels, 3-Cent Silver Type II, Trade and Morgan Dollars were hit among Proof Type. However, it is rather encouraging to see that the declines are small on a percentage basis and not as severe as they could have been. This certainly has to be a testament to the ongoing bull market. You will also notice that these Type coins are rather easy to locate and dealers don't mind selling them when capital is needed. Mint State Gold Type also relinquished some higher territory but that's expected as these coins are also easily found.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflike. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

The Gold coins in this chart trade very infrequently. These are the last known Bids.

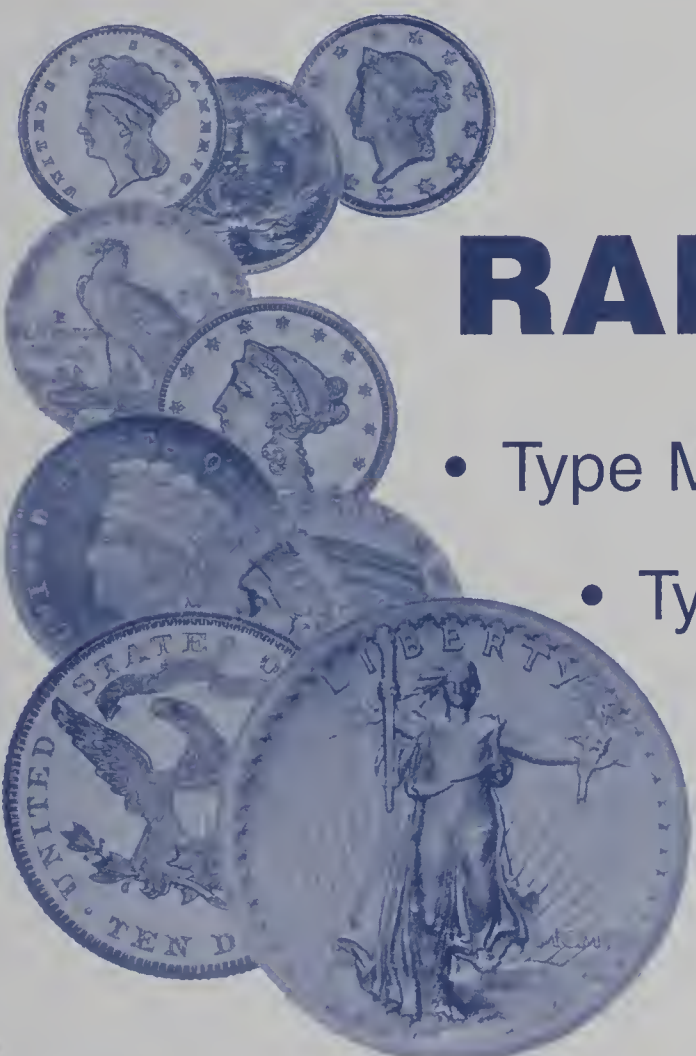

Bids for Lincoln Cents are for full Red specimens in MS64 and higher.

Matte Proof Cent Bids for grades of PR64 and better are for full Red Cents. PR63 and lower Bids are for Red and Brown Cents. See the Proof Type Coins page for Type Bids in all colors.

NGC VarietyPlus®

Accurate Variety Attribution

NGC meets your complete needs for expert variety attribution. VarietyPlus® provides a broader range of varieties and attributions, the culmination of years of exclusive NGC research. NGC recognizes these varieties:

- Die varieties by VP number
- Half cents by **Cohen** numbers
- Large cents by **Sheldon** (1793-1814) and **Newcomb** (1816-57) numbers
- Half dimes (1794-1837) by **Logan-McCloskey** numbers
- Dimes (1796-1837) by **John Reich** numbers
- Quarter dollars (1796-1838) by **Browning** numbers
- Half dollars (1794-1836) by **Overton** numbers
- Silver dollars (1794-1804) by **Bowers-Borckardt** and **Bolender** numbers

To receive a variety of attribution with your grading submission to NGC, just add \$7 per coin. For coins already encapsulated by NGC, the variety attribution can be added under our Designation Review service at \$10 per coin.

Stack's Americana Sale Claims \$5.2 Million Liquidity Is Important And Necessary To Prosper

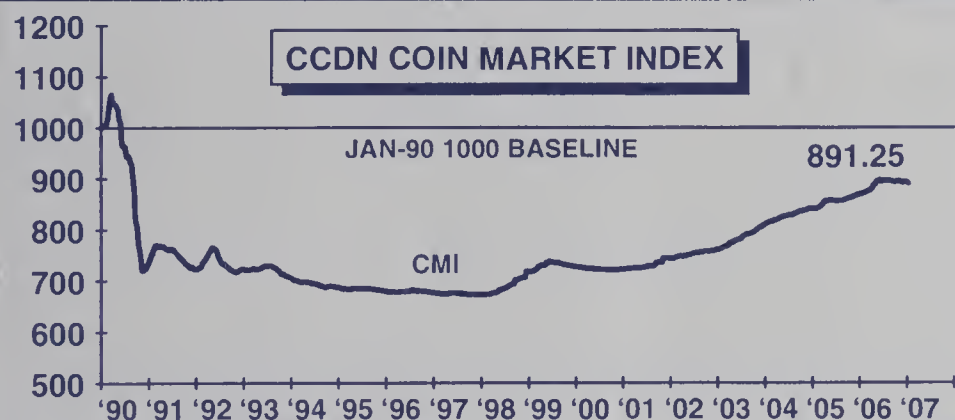

Liquidity is becoming more of an immediate concern to dealers as they strive to get through the opening three months of 2007. January has already put a lot of pressure on many of their cash reserves. This in large part can be equated directly to the staggering number of auction lots that have been thrust on to the market. The unbelievable part of this winter flurry is the large dollar average per lot that is being received. Record prices have already enveloped 2007 leaving some dealers out in the cold and we expect more to follow in the ensuing months. The strength of demand for rare coins continues unabated but the selectivity of that demand has also been more clearly defined as well. Problem-free and attractive material remains hot while everyday fluff and coins with issues continue to soften. Many dealers already have their favorite coins targeted and they are just waiting for an opportunity to buy. Collectors are being more calculating as well, as they continue to learn the intricacies of the market taking full advantage of all the rare coin information resources at their disposal. Dealers have repeatedly told us that their customers are looking to buy those coins that have relatively low population numbers compared to others within each particular series. Armed with this information dealers try to fulfill this need for their clients but the auction battleground has not been the site of many easy victories for them. The competition for these valued coins has grown so they know that strong Bids will be what it takes to come away from these sales with some nice coins. The busy January auction schedule continues to be rigorous as Stack's Americana Sale held January 16-17 in New York just reeled in \$5.2 Million. Branch Mint Gold was eagerly sought by those in attendance generating many record prices. Two stellar performers found the 1875-CC Half Eagle graded MS63 by NGC capturing \$103,500 and one of the keys to the \$3 Princess series, 1854-O graded MS62 by NGC brought home \$74,750.

The ongoing parade of auction lots that accompanies the continued demand for select coins is why dealers need to maintain their liquidity. The sight-unseen market is an excellent vehicle for them to use for success towards this end. When dealers need immediate funds, as they will when their auction bills come due, not to mention the normal cash needed for

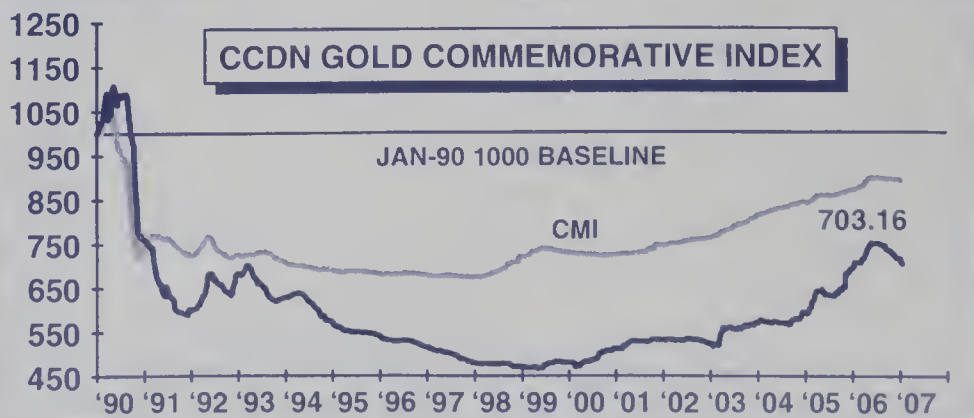

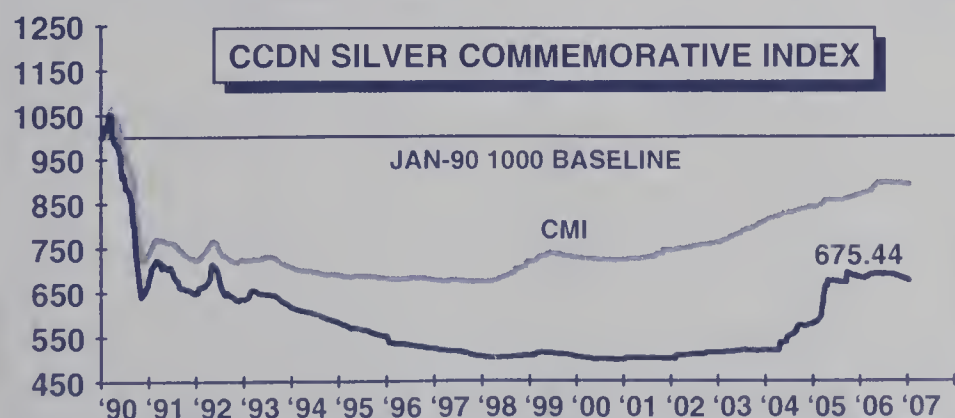

those tempting walk in deals and over-the-counter purchases, they turn to the dealer trading networks. They can quickly and efficiently unload some material (at reduced levels) into the sight-unseen certified market pool. Besides, the sight-unseen market is also helpful to those dealers needing to boost their inventory with generic material. Many are hopeful that by raising Bid slightly they can easily obtain some new inventory relatively fast and reasonably. That is what is taking place for some late date, common Buffalo Nickels. Interestingly, we see some discounting occurring on some of the rarer Denver Buffaloes such as 1917-D in MS65 where PCGS and NGC examples have been offered at lower levels. Gem 1917-D examples are few and

far between as a total of only 163 have been graded by PCGS and NGC in MS65 with only 13 higher. However dealers know that one 1917-D in MS65 can generate as much money as the sale of 50 common date MS65 Buffaloes. Similarly, PCGS MS66 1929-D and 1934-D took a bit of a hit as well. Walking Liberty Half Dollars are picking up the pace as several of this attractive series' later dates are on the receiving end of higher Bids. Yet on the flip side a few better dates are revealing minor setbacks. The chart depicts a mixed bag for those grading MS65 within the short-set over the past two years. Franklin Halves are mostly declining but the 1952-S and 1954-S non Full Bell Lines are substantially higher in MS64 thru MS66 grades. Commems, both Silver and Gold have their share of decreases as well. This popular area is displaying several minus signs for many Commems in MS65 and higher. A few select \$20 Saint-Gaudens examples are higher while most common dates are decreasing a trifle this week. Saints are a popular coin when one needs some funds as most are generally easy to locate and they can provide a substantial amount of cash. Standing Liberty and Proof Washington Quarters are also lower this week. The Mint State and Proof Type markets are very quiet following last week's adjustment.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

*The Seven Day Guarantee: ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. For all other services, our submission turnaround time is eight days. ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CNECA coins, and other special coins. Days are ICG's working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this advertisement overrides the terms and conditions on the ICG grading submission form.

\$100 Million In January Auction Sales Sight-Unseen Market Remains Active

If January is going to be any indication of what's in store for the rest of the year in the rare coin market then everyone needs to fasten their seat belts. Many enthusiastic dealers had been expecting the coin market to continue its bullish ways in the new year but they had no idea just how much business would be taking place. Now that January is nearly complete they are still in disbelief by the nearly \$100 million in combined auction sales of United States material that will have changed hands by month's end. This includes major sales from Stack's and Superior along with regular Internet auctions by Teletrade, David Lawrence, Legend and Heritage. At the forefront of this record setting blitz was of course Heritage's auction salvo at the Florida United Numismatists extravaganza in Orlando. If this trend continues at the frenzied pace already established then one can only wonder where all the rare coins that are needed to supply these huge telephone book sized auction catalogs are going to come from. No doubt there is also concern at the ability of finding enough buyers of this material at these levels. Conversely one only has to consider how much money is available in today's financial markets to understand why the money is so omnipresent. Demand is clearly visible from the constant bulletins posted on the various electronic trading networks by dealers in desperate need of material. Often, they are looking for specific rarities, trying to find those coins necessary to fill want lists. Some are also looking to buy select coins just to keep their inventory fresh and interesting. The cost doesn't seem to be the problem for them because if the coin is right then a sale is consummated.

This incredible activity this January is also driving the sight-unseen market. Naturally we see some coins being unloaded for one reason or another but there are also areas of significant strength. This active market means there is a lot of shuffling around one must do to stay liquid and ready for anything. Slight weakness is observed among some generic Morgan and Peace Dollars. Nonetheless we do see selective Bid increases for some better Peace Dollars such as the new \$10,000 sight-unseen Bid for an NGC MS66 1928 key. Mint State and Proof Type post few changes but they do have strong supporting Bids. The Type markets have been receiving strong demand and we know that many of these coins remain sought-after by collectors and dealers alike. Early Type coins of all metals are still the rage but so are attractive Liberty Seated and Barber coinage. Gold Type is relatively quiet waiting for the next round of bullion advances or

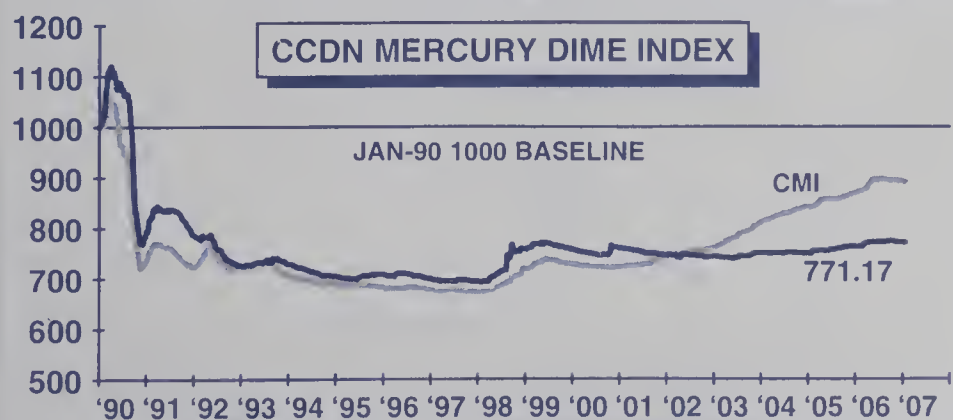

declines to dictate direction. A few Silver and Gold Commems are still on the discount rack but it appears that calm has been somewhat restored to these sectors after three consecutive January weeks of decline. Buffalo Nickels and Mercury Dimes are also steady with buyers waiting on the sidelines for an opportunity to scoop up some bargains. A few Walking Liberty Half Dollars are being discounted but that is nothing new. Minor declines are seen in two Denver Mint Halves from the 30s due to lower auction results. A PCGS MS65 1935-D slipped a bit to \$1,825 while a NGC MS67 1939-D dropped \$315 to \$885 Bid. Dealers know that coins like these two Halves are easily bought when they do have a customer looking for one. The combined population report shows 544 1935-D in MS65 with 85 graded higher. The 1939-D in MS67 is equally impressive as 102 examples have been slabbed with 3 even finer. Proof Singles are one of those categories that beg dealers to sell them when they need quick funds. That's because they are relatively easy to find when demand picks-up. This week, Proof Mercury Dimes and Washington Quarters got the axe. However the decreases were modest and so are the net proceeds, all under \$1,000 per coin. Interestingly the majority of action in this week's **Market** columns is a bit of a departure from the norm. That is, there are many more coins selling in retail public auctions for prices that are well below standing dealer wholesale Bids. In the not too distant past, the majority of low wholesale priced coins were found in dealer inventories. Food for thought as many collectors and dealers will be

readying for the first western trek this year. For some there will be a stop in St Louis, February 9-11 to attend the 43rd Annual Greater America Coin Fair. In conjunction with this show Scotsman will host their Mid Winter Sale. We have listed several of the many pleasing collector coins... some of which may very well be making their next appearance at the fast approaching Long Beach Expo February 15-17.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, including the nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market based on monitoring Low Asks or Last Trades from *wholesale* trading networks, *sell lists*, *coin lists* and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin. Listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "l" - Trade during the most recent month; "lm" - Lowest asking price appearing last month. If Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit, on a sight basis

The Fine Print
*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions.
Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions which excludes world coins, C.N.C.A. cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

NGC VarietyPlus®

Accurate Variety Attribution

NGC meets your complete needs for expert variety attribution. VarietyPlus® provides a broader range of varieties and attributions, the culmination of years of exclusive NGC research. NGC recognizes these varieties:

- Die varieties by VP number
- Half cents by **Cohen** numbers
- Large cents by **Sheldon** (1793-1814) and **Newcomb** (1816-57) numbers
- Half dimes (1794-1837) by **Logan-McCloskey** numbers
- Dimes (1796-1837) by **John Reich** numbers
- Quarter dollars (1796-1838) by **Browning** numbers
- Half dollars (1794-1836) by **Overton** numbers
- Silver dollars (1794-1804) by **Bowers-Borckardt** and **Bolender** numbers

To receive a variety of attribution with your grading submission to NGC, just add \$7 per coin. For coins already encapsulated by NGC, the variety attribution can be added under our Designation Review service at \$10 per coin.

Sight-Unseen Bids Soar For Stellas California Auctions, Expo Just Ahead

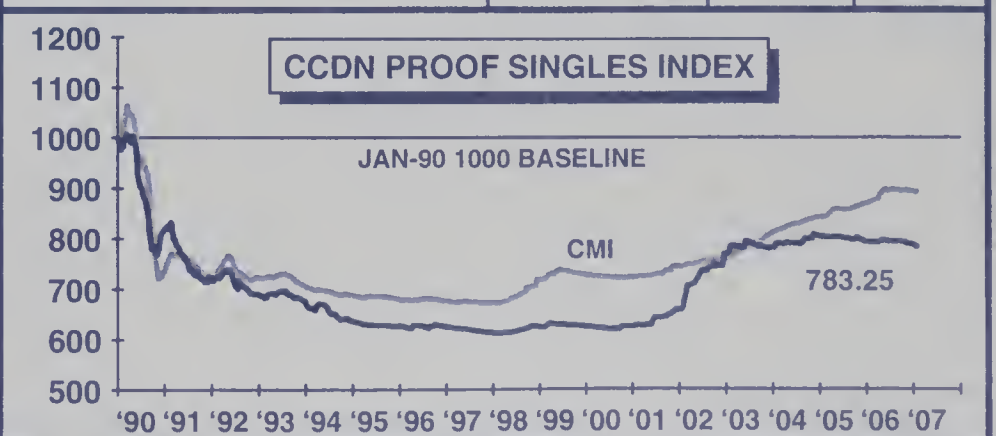

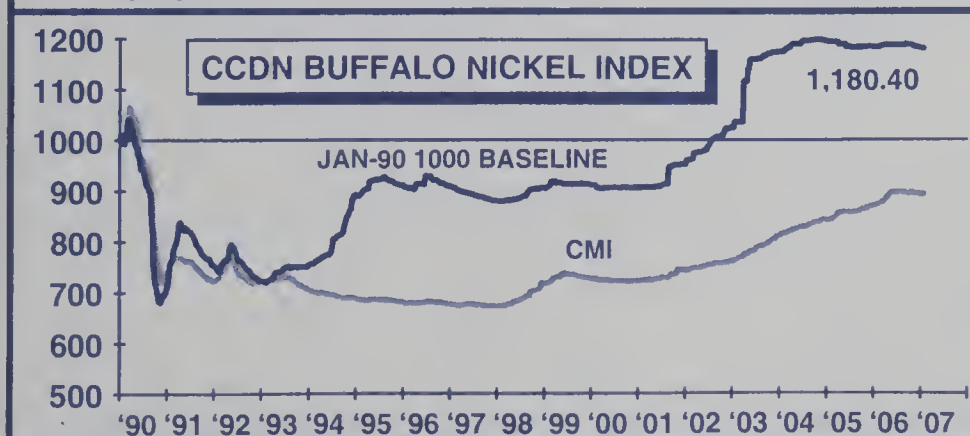

January may have already set the tone for 2007 with strong activity and higher prices being paid for coins at public auction, and on the bourse. Now February is off and running and it appears that it will take a lot of stamina and resources if dealers hope to keep up with this market's torrid pace. We may just be seeing more of the same as several auction companies have scheduled major sales during the second month of the year. Bowers and Merena will get the ball rolling with a Rarities Sale on Feb 10. Next, Ira & Larry Goldberg will offer a Pre-Long Beach Auction Feb 11-13. Also, the same dates are in place for Superior's Pre-Long Beach Elite Coin Auction. Most of these sales are to correspond with the highly anticipated Long Beach Expo. This venue is certainly one of the most active and well attended shows. The first of three Long Beach shows will take place February 15-17. Southern California has a strong affluent collector base and that base will surely be tested early in February.

Expectations have been growing as better date and eye appealing rare coins have readily been selling at very strong numbers. The optimism has been contagious as dealers are quick to reassess their strategies prior to the Expo and star-studded numismatic sales. Often, dealers prepare for upcoming auctions and shows by making sure that they have a sufficient amount of capital available. They know that, in this bull market, Bidding is sure to take-off on select eye appealing coins that hit the auction block. Also, fresh material that appears on the bourse will most likely be at a level that's befitting this market. The sight-unseen market is one ally that helps them raise additional funds in an instant. A quick overview confirms some light discounting is occurring but that's about it. Dealers are apparently not all that willing to just give away their coins in this market. The sight-unseen arena is also demonstrating some remarkable strength and resiliency. Almost everyone expects most sight-unseen Bid increases or decreases to be associated with generic coins as well as the lower price material. Of course we are seeing some increases of this nature; consider the Proof Nickel category where select 3-Cent Copper Nickels, Shield Nickels and Liberty Nickel Proofs are all slightly higher this week. Still none of these

coins even reach four-figures. Many plus signs are found scattered throughout the short but popular Peace Dollar series as well. Again, none of these advancing Dollars surpass the \$1,000 mark and some common date MS64 Peace Dollars declined for both PCGS and NGC. We also see a few minus signs appearing in the Walking Liberty Half Dollar series for coins under \$1,000 without any earth shattering percentage declines. Gold Type is a bit sluggish too, especially when one considers that Gold Spot has been surging close to the \$660 level, perhaps the yellow metal's proven staying power will lure more buyers out. Certainly the spreads between current Gold Spot and true numismatic Gold coins in Mint State are very appealing yet those concerned with minor bullion fluctuations don't want to buy heavily into the market just yet. With this said you don't expect six-figure Gold rarities to spike higher in the sight-unseen market do you? Surprise! The famous and coveted \$4 Flowing Hair "Stella" is defying the odds while receiving sharply higher percentage Bid increases for PCGS and NGC certified examples. You will notice 10 examples cracking double-digit gains with 6 of them skyrocketing 20 percent or more. Keep in mind that these large percentage gains are for coins selling for \$100,000 plus. A PCGS PR62 is now Bid at \$110,000 up a staggering 31% while an NGC PR63 at \$130,000 Bid is up 27 percent. Incidentally, PCGS has graded 24 in PR62 while NGC has certified 21 in PR63. In Proof 64, PCGS is up 26 percent while NGC is 17 percent higher. These PR64 coins are also available as PCGS certified 67 and NGC 34 in this near Gem condition. Another show of intense demand for quality and rarity was seen or shall we say not seen when a very scarce 1892 Columbian Half Dollar grading PR66 by PCGS traded sight-unseen for an impressive \$15,000. This is more positive reinforcement that dealers are willing to stretch a bit more in this market whether it be on the bourse or sight-unseen via dealer trading networks. Mercury Dimes also put on a show of their own this week. No high priced coins, rather a barrage of generally common date Full Band PCGS MS65 thru MS67 advanced. The dates moving higher in value range from 1935 thru 1945-S with the increases in the 4-10 percent range.

Late Date Proofs Attract Attention

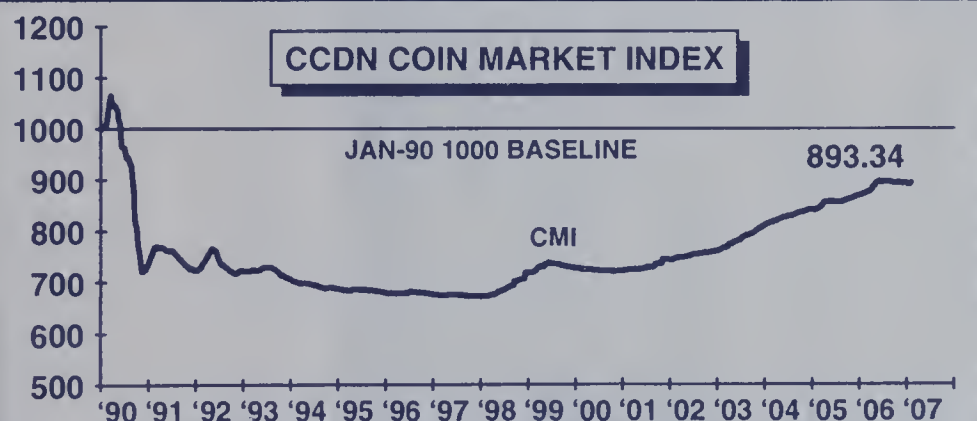

Two \$2½ Rarities Share Spotlight In Long Beach

As most of the country is trying to recover from a severe cold snap, many dealers making the trek west will be comfortable in Southern California as they begin the onslaught of three Pre-Long Beach auctions. This veritable numismatic marathon starts February 10 when Bowers and Merena offer its Rarities sale. February 11-13 features Ira & Larry Goldberg's auction as well as Superior's Pre-Long Beach sale. These significant Beverly Hills auctions are just a prelude however to the Long Beach Expo and the Heritage Long Beach Coin Auction scheduled for February 14-17. Two Quarter Eagle keys highlight the Heritage auction. A \$2½ PCGS PR53 1841, known as the "Little Princess" and a PCGS EF45 1854-S Quarter Eagle are certain to attract serious action when they make their public appearance. Out of the dozen or so verified 1854-S specimens this one ranks within the top three of known survivors of the San Francisco branch Mint's inaugural effort. The last example to sell in a public auction was a similarly graded NGC EF45 example which realized an impressive \$253,000 in September 2005. It will be interesting to see how this extreme rarity fares in this present market. Buyers know that these two dates are extremely tough fills for any collector working on a serious set of \$2½ Libs. Dealers recognize that they will need to be in a strong cash position as this Expo is usually the busiest of the three held each year. Results from these sales should reveal a great deal about what we can expect for the remainder of 2007. These auctions have a little bit of everything and it will be interesting to see, early on, if today's high levels can be sustained or possibly exceeded. Some dealers are telling us that the market may have already leveled off in certain areas and today's savvy collectors are reevaluating their positions. Demand is still strong but not so for some material at these higher benchmarks. Sophisticated collectors are carefully checking current prices and some are not quite as eager to buy as they were at this time last year. Instead, they may be willing to wait for prices to back off from their favorite issue or just looking for an alternative coin that fills their bill.

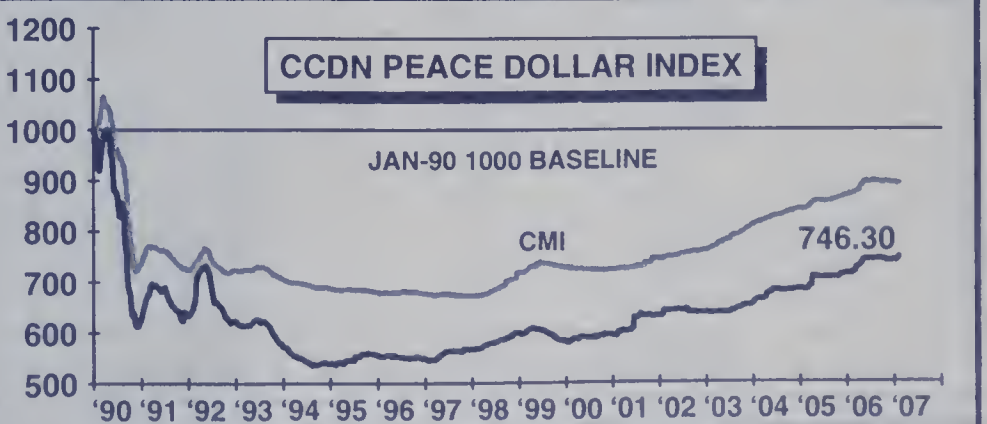

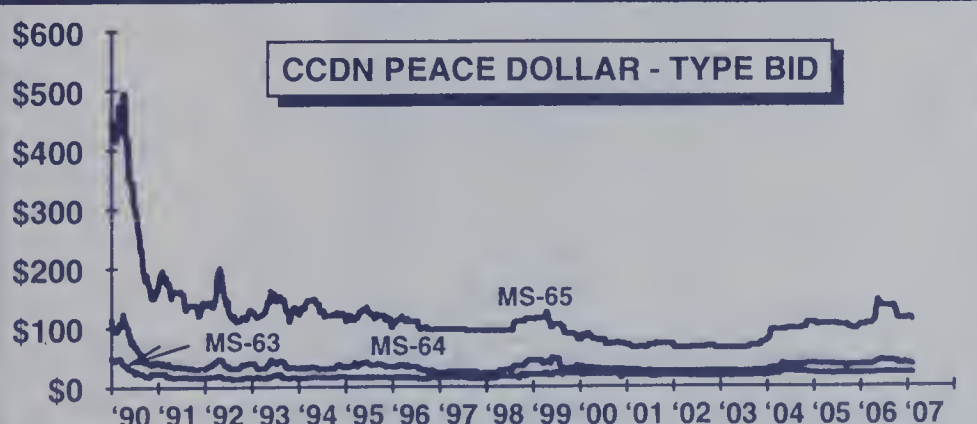

Perhaps in anticipation of the Long Beach extravaganza activity is beginning to buzz in the sight-unseen market. Sight-Unseen buyers have been weighing

all their options and are now putting some of those decisions into action. In one case it appears that value hunters have decided that late date Proof Singles are an area that seems to offer attractive values. We see increased Bids targeting Gem quality Mercury Dimes, Washington Quarters and Walking Liberty Half Dollars in PR66 and PR67. Most of these attractive Proof coins being targeted are quite affordable, selling below \$1,000. The 1936 issues are the exception as is the 1937 Walker. Dealers enjoy sprucing up their inventory with some of these beauties. They also know that the Mercury Dime and Walking Liberty Half Dollar designs are usually an easy sale to collectors. Consequently it's not surprising to see Bid increases ranging upwards of 16 percent, with the greatest percentage gains being seen by the Dimes and Quarters. Top honors go to an NGC PR67 1936 Mercury Dime up 16.7 percent to \$3,500 Bid. A PCGS PR66 1942 Washington Quarter is also impressive, gaining 16 percent. Two scarce Washington Quarter business strikes enjoyed a strong performance as well. The key to the series, the 1932-D in MS61 advanced a whopping 44 percent for either an NGC or PCGS example. Its sister key, the 1932-S, jumped more than 16 percent for similar graded examples. The relatively short Peace Dollar series is a perfect example of the diverse thinking in today's market. Generics are very weak but select rarities are doing well. Dealers are specifically targeting the semi-key dates and especially MS63 and MS64 examples. They believe that these coins just seem too cheap to pass up right now.

Discounting is also evident and is usually expected preceding a major show and number of large public auctions. Silver and Gold Commemoratives, were let go at softer prices. The largest tumble, a 34 percent decline was seen by a PCGS MS67 1935-D Texas Commem after selling at auction for only \$400. Four other Silver Commems suffered double-digit decreases as well. Some Buffalo Nickels and Walking Liberty Half Dollars were down a trifle this week but we didn't see too many of the keys suffering. Once again the Mercury Dime series seems like the place to find bargains as PCGS examples routinely sell at auction for well below standing sight-unseen Bids. However the small profit available in each coin usually makes taking advantage of this opportunity not very practical.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers. It is strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES
Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Table with 15 columns: Item, MS61, MS62, MS63, MS64, MS65, MS66, MS67, MS61, MS62, MS63, MS64, MS65, MS66, MS67. Rows include various US Centennial and Bicentennial coins, such as 1976 US Bicentennial, 1976 US Centennial, 1976 US Bicentennial, etc.

GOLD COMMEMORATIVES
CCDn does not buy/sell any coins whatsoever. CCDn will not recommend any particular dealers. Bid prices are represented as authentic to the CCDn, nevertheless, CCDn implies no guarantee whatsoever.

The Fine Print
The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions.
Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CON, CA, cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

PROOFLIKE MORGAN DOLLARS

P.L. Dollars may be semi-reflective with less reflectivity than the Deep-Mint Prooflike. Bids for P.L.s are usually much lower than for DMPL's but command some premium over non-P.L. strikes.

DO IT FOR THE MONEY!

But You'll Come Back Because Of Our Service, Knowledge, and Integrity

Spectrum Numismatics was formed in 1991 with a unique vision. Spectrum's vision was to be a coin company with world-class rare coin experts, unlimited cash resources, and a loyal customer base. Spectrum knew the way to keep people coming back time and time again was to treat them fairly, service them efficiently, and pay them the most money for their coins.

Money and skill are probably why people come to Spectrum in the first place. But our service and integrity are why they come back again and again and again.....

Why does Spectrum pay more than any other dealer for U.S. rare coins? What's the catch? There's actually no catch at all – it's just a wise business decision. Spectrum is one of the largest coin dealerships in the world and has lots of coin hungry clients. Spectrum literally must either buy your coins or lose its clients. That's why Spectrum will pay outrageously high prices for your coins and that's why they make it so easy for you to get the cash.

The time to get the cash is now. Call Spectrum with assurance and let us help you realize the most money for your coins. Give us an opportunity to serve you by calling toll-free 888.828.2646. Call Spectrum today.

Pre-Expo Sales Grab \$17.5 Million Current Levels Maintained In Long Beach

Most dealers remain optimistic in regards to the Long Beach Expo but are a bit weary after viewing and Bidding on an enormous amount of auction lots in the pre-Expo sales. In a continuation of the tremendous public marathon that hammered home over \$17.5 million, dealers are now searching the bourse for more much needed material. Selectivity is still the driving force as many carefully search through one double row box after another. One dealer, specializing in Dollars, told us that better date Morgan and Peace Dollars are in demand. "It's the tough dates that I want to buy, but to me, it just matters that the coins are nice." This dealer traded two Carson City issues on the floor during dealer set-up including: an NGC MS66DPL 1881-CC at \$4,750 and a PCGS MS67 1882-CC he sold wholesale for \$5,900. Most buyers faced problems in just finding the material that they needed. They said it's just not out there! One dealer specializing in early Gold was nearing completion of a deal for 3 coins totaling \$85,000. Early Gold is hot, he said. Another dealer specializing in early Copper found that portion of the market to be very strong, too. He believes that dealers and collectors are back looking for the classic American coins but he emphasized that they must be problem-free. Powerful demand, for example, is chasing 1793 and 1802 Half Cents, 1793 Chain Cents, 1799 and 1804 Large Cents and 1815 Capped Bust Half Dollars. Dealers believe that

these coins represent an excellent value at current levels and problem-free examples of any of these dates would be a major coup for someone. What could be the reason for the return to the classic American coins? Some astute dealers point to the availability of information from a combination of sources. The internet has given many an opportunity to learn about the classics. However the resurgence of numerous numismatic titles through publication has made well-read collectors more knowledgeable. Early coins certainly require a more sophisticated collector. It used to take a longer period of time to achieve that knowledge yet now the internet and various books on the subject have dramatically lessened that period.

This week's sight-unseen market is reflecting the importance for dealers to be flush with cash. Silver Commem

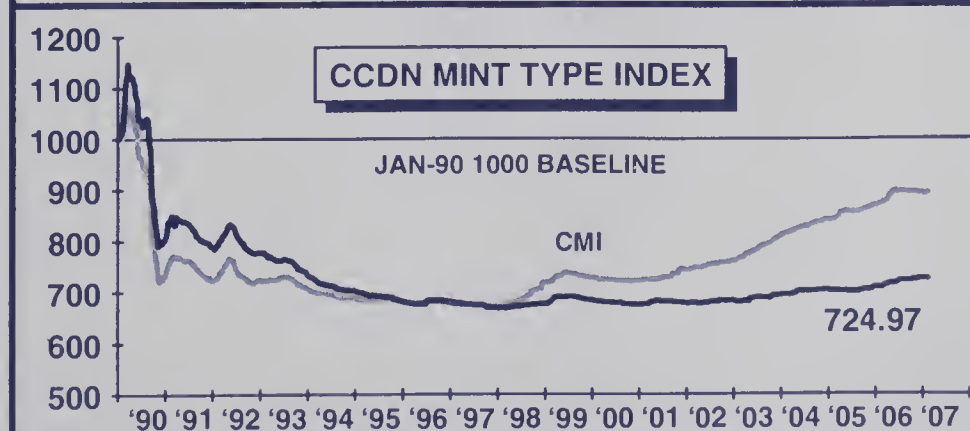

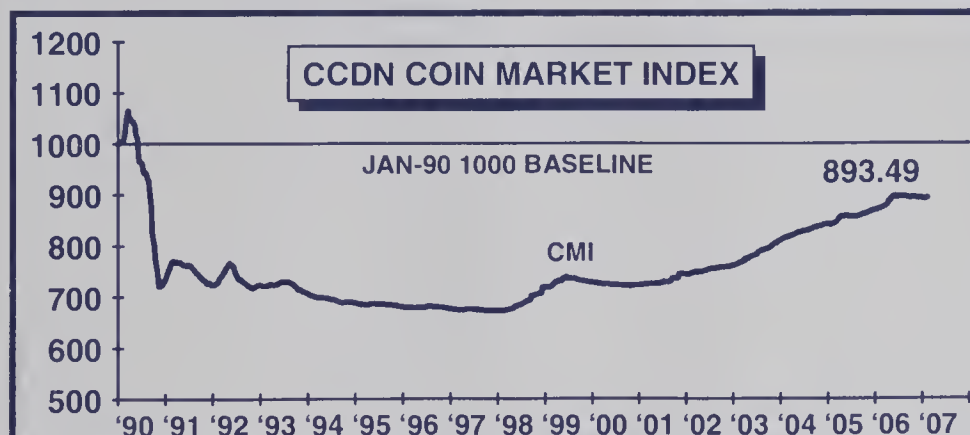

report in again with several lower issues and while that's not too unusual, the percentage of the declines are quite noteworthy. One example being an NGC MS66 1951-S Washington Carver Type that brought \$115 at auction, some 40 percent below last week's \$210 Bid. Gold Commem found a handful of issues sliding a bit further as well. A few significant adjustments were also experienced by the Mint State and Proof Type categories. Conversely, continued strength was seen among Morgan Dollars, led by the 1903-O, a better date jumping 24 and 19 percent respectively for PCGS and NGC MS64 examples. Peace Dollars are also very much in demand as dozens of issues are sporting plus signs. The semi-keys are receiving the majority of the demand in this popular series. The Saints are marching higher as they received a boost from Gold Spot, now nearing \$670 per ounce. 1928-S and 1929-S Standing Liberty Quarters gained as well. The 9 percent jump for an NGC MS65 1928-S leads the pack with a \$350 sight-unseen Bid.

For collectors of modern material the new Presidential Dollars featuring George Washington made their debut today. This new series features edge incused inscriptions include the date, mintmark and motto. Coinciding with this release, it was announced that PCGS, NGC and ICG would all be offering a new holder to allow for easy viewing of the coin's edge and script. These new holders with their innovative

design may certainly coax other previously slabbed material into making a new home here. Early issues exhibiting lettered edges have up to now been obscured by current holders, may now begin to edge there way into these more visually revealing confines.

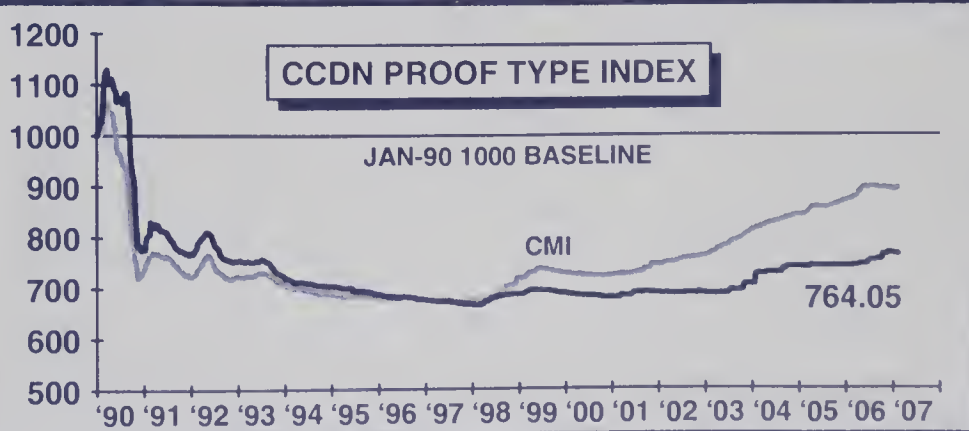

Bowers and Merena hammered \$3.5 million in their sale held February 10. Ira & Larry Goldberg's auction realized more than \$11.5 million February 11-13, while Superior's pre-Long Beach Elite coin auction claimed \$2.5 million.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions.
Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions which excludes varieties, errors, CONELA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

Gold And Silver Move Higher Market Absorbs Auction Barrage

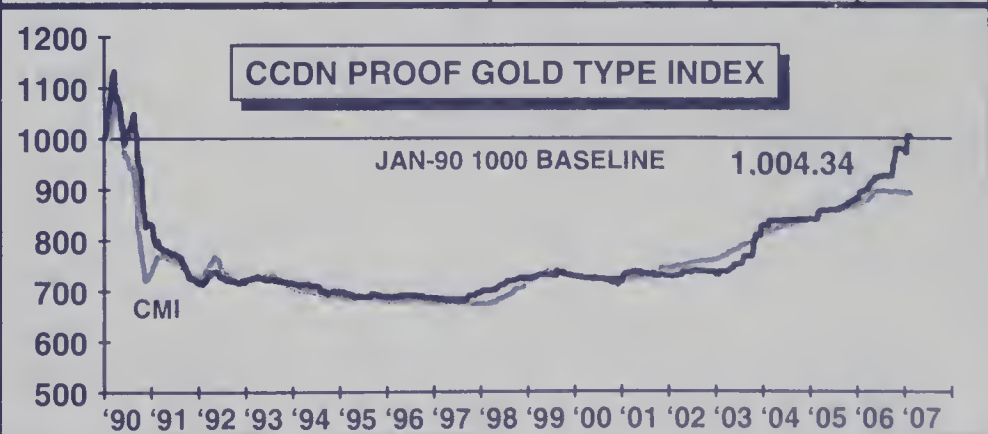

The rare coin market continues to be very motivated as we near the end of February. This activity was readily visible during the Long Beach Expo and it is also being experienced in the sight-unseen market. Several dealers are looking to unload a number of coins because it is important to maintain one's liquidity in this fast-paced market. You must also keep in mind that this increased commotion is not necessarily translating into just plus signs. However plus signs are surrounding most bullion sensitive issues. Rocketing prices have pushed Gold Spot to the mid \$670s and Silver above \$14 per ounce. \$20 Saint-Gaudens and \$20 Liberties have been the beneficiaries as a hungry public increases its interest for these *old* Gold numismatic coins. Demand has pushed these bullion sensitive issues higher, mostly in grades thru MS64. Yet even at these increased Bid levels some believe remarkable values still exist, especially when one considers the melt value combined with the numismatic history.

Some Bids for coins that were unfulfilled at the Expo and auctions are now being placed in the sight-unseen arena. It is a fast and efficient way of obtaining some stock. However dealers are also willing to sell coins sight-unseen knowing that they may not get the top dollar. Yet they are still willing to accept less because the "immediate money" will be best used elsewhere. These funds may go a long way to buying the coins that are hot and experiencing stronger demand. It is also a way to raise cash to pay for recent auction purchases. A small loss on some coins is OK if it leads to higher profits now, or on future sales. Consequently we are seeing a lot of coins being discounted this week. The market columns are filled with the lowest price coins seen and are dominated by auction lots. The large quantity sold in a relatively short period is, in part, responsible. Yet there are still a lot of coins being sold **below** sight-unseen Bid. We know that some consignors (dealers) are still willing to take a chance for a higher auction result, and that may mitigate the small dollar amount lost. Discounting is hitting business strike Walking Liberty Half Dollars and the Proofs. An NGC MS67 1941-D is down nearly 15 percent from our last report. These coins are popular because they are very affordable, even in nice condition. Of course it helps that the design

is still in vogue and a favorite among many collectors. We see many relatively common MS65 and better grades selling at public auction at reduced levels too. Sellers of this material are comfortable knowing that they can probably find and buy back any of these dates without too much difficulty. Silver Commemoratives, Morgan Dollars, Mint State and Proof Type are all participating with several examples selling at reduced levels as well. One PCGS PR67 Nickel was caught with his Shield down after an 1882 traded at auction for only \$1,380, nearly 23 percent lower. Yet it doesn't stop there. We see some Mercury Dimes experiencing some discounting this week. An NGC MS67FB 1943 sold at auction for only \$63 representing a 40 percent hit from last week's \$100 Bid. However dealers are carefully choosing which coins must be sold. Those coins that are below average for the grade on the holder are being routinely discarded, at auction and on the bourse. Many dealers have had an opportunity to view large numbers of lots and mark the necessary notes in their books. Consequently, those coins that don't make the "grade" are ignored at almost any price. Morgans trade frequently because they are so plentiful and generate strong collector interest. Notice the 1903-O leading the pack higher, building on last week's Mint State 64 gains. This time MS61 is leading the charge for both PCGS and NGC. Also check out the more than 15 percent decline of an NGC MS66 1900 this week. It is not uncommon to be stuck holding a date that is just difficult to sell when it needs to be sold quickly. The nature of this active market is such that some dramatic changes are taking place up and down. Take a careful look at this weeks market columns as many coins that are still desired at current Bid levels have sold at auction for under the prevailing market. One strong example is for an 1862 Copper-Nickel Indian Cent PCGS PR65 that realized \$1,095 at auction in the face of a viable standing sight-unseen Bid of \$1,600. Conversely, a rare 1892S Morgan graded NGC MS61 sold at public auction for \$46,000 this equal to two and a half times current Bid. Precipitous percentage decreases (or increases) are a result of thousands of lots changing hands in a week's time. It is a lot to digest and dealers need to be vigilant if they are to survive the rigors of this fluctuating market.

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. Listing Policy: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PCGS DMPL and NGC DPL Bids are for fully Deep Mirror Prooflike coins. Bids for PCGS PL and NGC PL dollars will be listed monthly in a supplemental insert. CDN (*Greysheet*) Bids have always represented fully, deep mirror prooflike specimens

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

Do You Have the 2007 Commemorative Graph Books?

CDN Graph Books- Updated for 2007

The **CDN Graph Books** are the only source for historic pricing data. Knowing the all-time high, the historic low and the current value are crucial when making **Buying or Selling** decisions.

Every serious numismatist will treasure the entire **CDN Graph Book** series.

SILVER COMMEMORATIVE 1980-2006/07
 Graphs cover Bid levels for the classic Silver Commems listed on page 2 in the weekly CDN, in grades: XF, AU, MS60, MS63, MS64, MS65 & MS66.

GOLD COMMEMORATIVE 1980-2006/07
 Graphs cover all Gold Commems as listed on page 2 of the weekly CDN, in grades: XF, AU, MS60, MS63, MS64, MS65 & MS66.

Charlotte ANA Show On Deck

\$100K Sight-Unseen Bid For PR67 \$20 Lib TIII

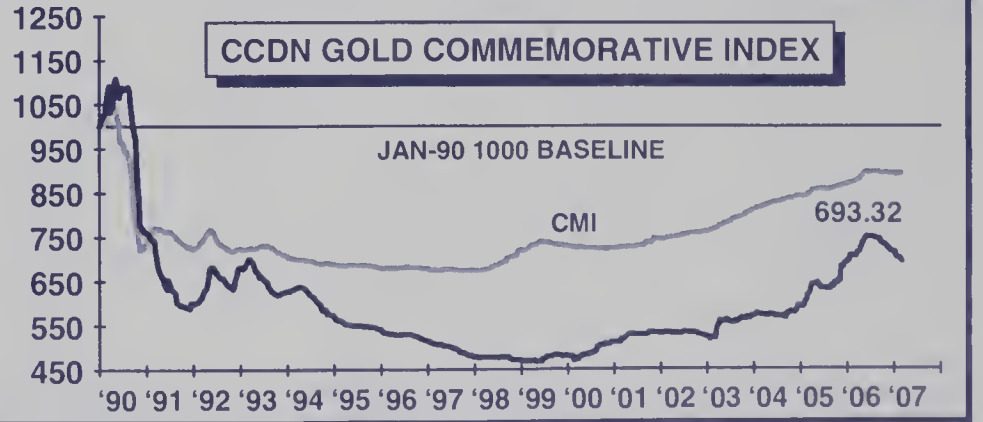

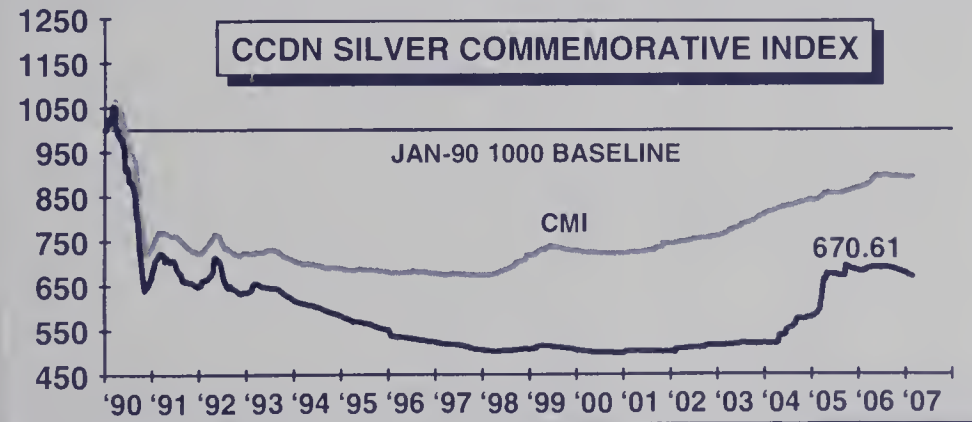

The sight-unseen market is beginning March as it has ended February in a relatively choppy fashion. Outstanding auction bills and other factors have combined to force dealers to offer some coins at reduced levels. Yet we also see the signs of strength from a bull market that was much more evident last March when Morgan Dollars and Proof Type dominated the plus side. Nonetheless, dealers are still acclimating themselves with today's levels while trying to survive today's volatility. We believe that the upcoming American Numismatic Association's National Money Show is having an impact on many dealers' actions. The big show will be held in Charlotte, NC March 15-18. Liquidity, once again, will be an important ingredient for dealers hoping to complete a successful show. Heritage will be hosting the Charlotte National Money Show Auction March 15-16. The extreme volatility occurring in our financial markets, including Gold and Silver is also being factored-in the thought process of dealers preparing for Charlotte. The bottom line for dealers will still be to do what's important for their clients. This means buying coins that have solid potential and selling those that appear lackluster and out of favor. They know that want lists will be plainly evident in Charlotte as the larger shows usually bring out the best that's available. The Walton 1913 Liberty Head Nickel's homecoming in Charlotte may give an added boost to public attendance. However, dealers are keenly aware that today's Asking prices have been very aggressive if the coin possesses strong eye appeal, strike, or originality. Of course rarity and early coinage will also be among those coins most contested in North Carolina. That's another reason why ample cash reserves will be very important.

The sight-unseen market is experiencing the same liquidity pangs via minus signs as we saw last week with another round this week. Yet the catalyst for the negative this time is more from lower Asking prices than from auction results. We also note that less coins are selling below sight-unseen levels too. Asks are being reduced to blowout the coins that are not helping one's bottom line while raising much needed capital in the process. However we also note that dealers are still Bidding aggressively for those coins that have great potential and current demand. Check out

several ANACS Bid increases among Commems, Dollars and Type. Some dealers view ANACS coins as representing an excellent value. For example, a 50 percent increase is seen for 2-Cent pieces in ANACS MS66R at \$750 Bid. Silver Commemoratives are a perfect example of today's mixed sight-unseen market. Select Gems have been reduced for quick sale and can readily be found among the minus signs. Conversely we also see dealers Bidding higher for select issues that they believe to be a good value at today's levels. Gold Commems are a good source for raising funds and it's no surprise that more than a half dozen are drifting lower led by the \$1 1917 McKinley in MS64 thru MS66. Morgan Dollars continue to reflect the diverse nature of the market. We do see twice as many increases than of those declining however; the decreases are yielding higher percentage drops. The largest decline was in response to a lower sight-unseen trade executed through an electronic dealer trading network for a PCGS MS65 1878 7/8 Tail Feather at \$1,510, down 13 percent. Peace Dollars are maintaining their recent strength with generic MS64 issues climbing 5.5 percent to \$38 Bid. Mint State Type is mixed while Proof Type has declines among Liberty Seated issues. Mint State Gold Type has Saints increasing in MS61 thru MS64 but other smaller denominations are weaker with the \$3 Princess in NGC MS61 losing 5 percent. PCGS PR66 Gold finds one Bidder increasing the ante by 14 percent for \$20 Liberty Type III issues, now at \$100,000 Bid. Proof Gold Type remains heavily pursued in this market judging by the prices realized at public auction in February. Walking Liberty Half Dollars, the usual suspect when looking to increase funds, are just a bit lower with a handful of dates in decline. Interestingly, three that are now lower include better date Denver Mints from the 1930s between \$1,700-\$4,500. Weekly internet auctions are still serving both the buyer and seller between major sales. Yet a Teletrade auction this week racked up some significant dollars as a tough to find 1853-O Arrows and Rays Seated Half grading NGC MS65 realized a lofty \$33,616. An 1845-D Half Eagle graded as MS62 by PCGS claimed \$15,136 and a superb rainbow toned Proof 1896 Morgan Dollar grading an impressive PCGS PR68 chased home a solid \$23,536.

*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CONE CA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

Trio Of March Auctions Near PCGS Offers Reward To Authenticate Errors

Dealers are in their final stages of preparation as the ANA's National Money Show to be held March 15-18 in Charlotte fast approaches. Most dealers will be in for a long stretch of business as they will leave North Carolina and head directly to Baltimore to attend the March 23-25 Coin & Currency Convention before heading home. Both of these shows will likely receive a boost in attendance from recent media attention surrounding the '07 George Washington Dollars that failed to receive the Edge Lettering before leaving the Mint. These Plain Edge or "Godless Dollars" were trading wholesale for between \$50 and \$100 earlier in the week and are now selling for over \$300 on eBay. The U.S. Mint is currently investigating the matter and vows to eliminate such defects in the future. PCGS has announced rewards of up to \$10,000 to be the first to authenticate similar errors, like 2007 Sacagawea Dollars with Edge Lettering.

The need to maintain liquidity before any show goes with out saying but to have enough funds for two major shows and three public auctions is difficult yet imperative. As they weigh their immediate options, dealers are facing somewhat of a dilemma. They need to raise cash now by selling off some material but it may not be prudent to sell Circulated or Mint State Gold Type right now. This is because Gold has retreated to the \$650 per ounce area after briefly threatening to crack \$700 per ounce last week. The sale of Saints, Libs and other generic Gold Type is usually convenient because it is often held in quantities and as such can provide swift and ample funds. Unfortunately the quick sale of Gold today will not produce the kind of money if sold last week. So dealers need to explore other options. We see that they jettisoned some expendable Gold and Silver Commems as one of their primary solutions. They know that Commems are relatively easy to find and buy back when customer demand points them in that vicinity. They are also well aware that the diminutive Gold Commem rarities pack plenty of financial punch as they regularly can produce 4- and 5-figure prices. Not surprisingly we note that a sizable quantity of Commems have declined due to auction sales and a few more were lowered due to descending Asking prices. Still, these popular coins have proven to be an important resource for dealers as they head east for Charlotte, and the ANA festivities.

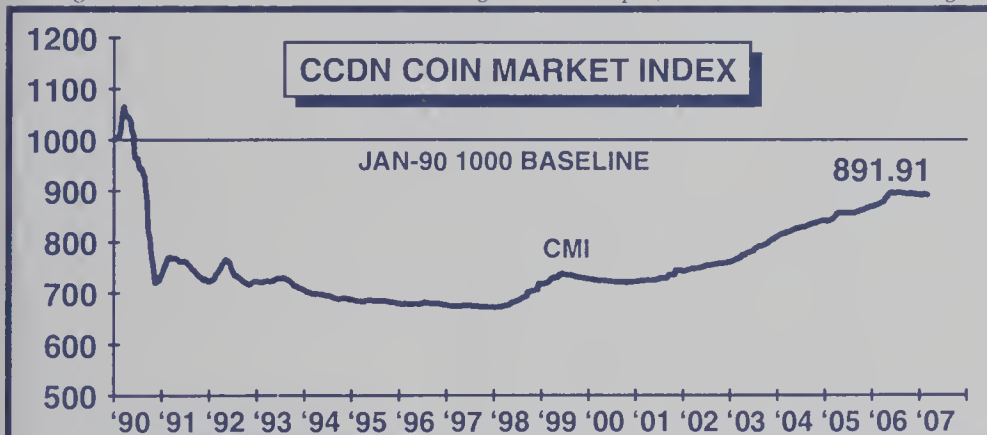

The need to raise sufficient funds now before the major shows begin is one reason why so many coins are dropping, as dealers push out those that are stagnant. This week's market includes many lower Asks as well as flat auction prices realized. This combination is sure to produce some minus signs. That is exactly what has happened within the Morgan and Walking Liberty Half series. Double-digit percentage declines are hitting each as mainly auction prices realized for relatively common dates are trading at the bottom of their estimate range. For example, an NGC MS66 1881 Morgan

with nice toning brought only \$805 with a \$1,000 sight-unseen offer still on the table. In fact, this \$1,000 sight-unseen Bid is now at the lowest level in the history of the *Bluesheet*. Conversely the all-time highest CCDN Bid was \$2,150 nearly 10 years ago on October 24, 1997. An NGC MS65 1935-D Walker dropped 22 percent after it sold for only \$1,265 at auction. Walkers are indeed a popular revenue source as we observe some further discounting taking place among several Gem and Superb Gem examples from the mid 1930s thru the end of the series. Common date Prooflike Morgan Dollars in MS64 are lower this week as are select better date Washington Quarters. Several of these keys were bought for inventory in anticipation of greater demand by collectors acquiring State Quarters. Now dealers look to discard some of them since demand has

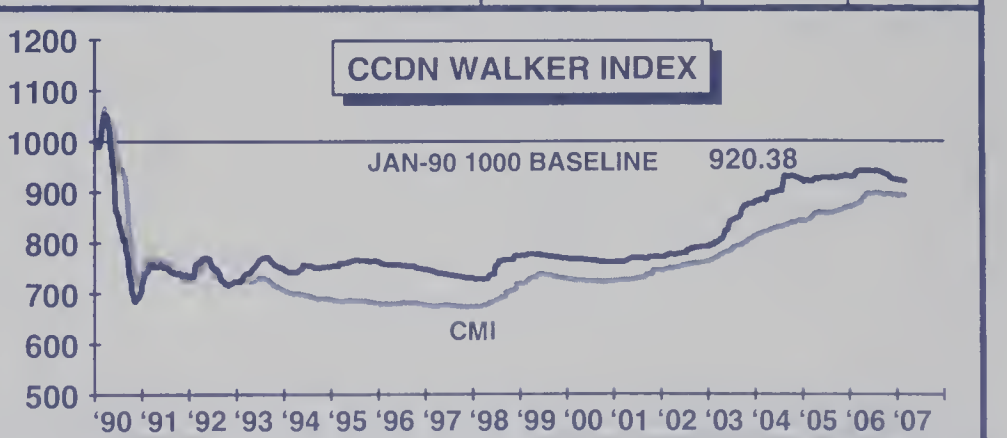

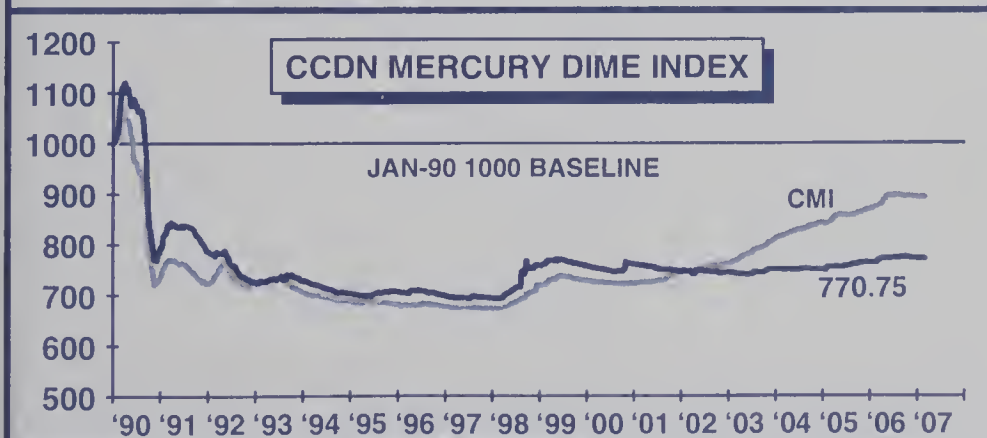

waned. Mint State and Proof Type are displaying a few minus signs here and there but no appreciable fire sale is taking place. Some plus signs are also evident as dealers try to entice sellers with some added incentive. Dealers continue to tell us that these Type areas are among the strongest and mainstay of the bull market. Collectors are always aggressively looking to add better Type examples and dealers will be carrying many of these want list coins

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective with less reflectivity than the deep-mirror Proof-Like.
Bids for P/Ls are usually much lower than for DMPLs but command some premium over non-P/L strikes.

The PMG Population Report is now online.

When it comes to expert, impartial grading and professional encapsulation, Paper Money Guaranty sets the industry's standard for integrity. PMG continues this commitment with the release of an indispensable community resource: *the online Population Report*.

The PMG Population Report for United States currency provides the total number certified for each note, along with the grade level for each — all laid out in an easily referenced chart format.

Population data is updated frequently, ensuring that the most accurate information is available to you at all times. And with Obsolete Notes and World Currency to be included in the near future, the Population Report will only get better.

By giving you the knowledge you need to make better collecting decisions, PMG gives you the power to make your note collection the best it can be.

Visit www.PMGnotes.com today and click on "Population Report" in the top menu to unlock your collection's potential.

Cash Conscious As ANA Begins Bid Increases Target Capped Bust Quarters

This week's numismatic front is relatively quiet as most major players are already in North Carolina attending the highly anticipated ANA festivities first-hand. The National Money Show is currently dominating the attention of dealers and collectors alike yet next week their focus will be trained north, as the exodus will land many of them at the Baltimore convention. Dealers know that "huge" shows such as the ANA have a way of bringing out some of the better material which is so desperately needed. With want lists in tow, it will spell opportunity for those dealers willing to put in the long hours it will take to walk the bourse and search thru thousands of coins. The ongoing demand for quality coins as well as the immediate financial liquidity to acquire them must be maintained however. To help facilitate this situation some selected discounting is occurring in order to bolster dealers sagging cash positions. In some instances it has been a situation when dealers decide that one or more burdens on their respective inventories must go quickly. With the incentive of reduced price levels eager buyers will hopefully appear to snare some possible bargains. The additional funds generated through these sales can provide ready cash and credit that will be necessary to complete various deals during and beyond Charlotte.

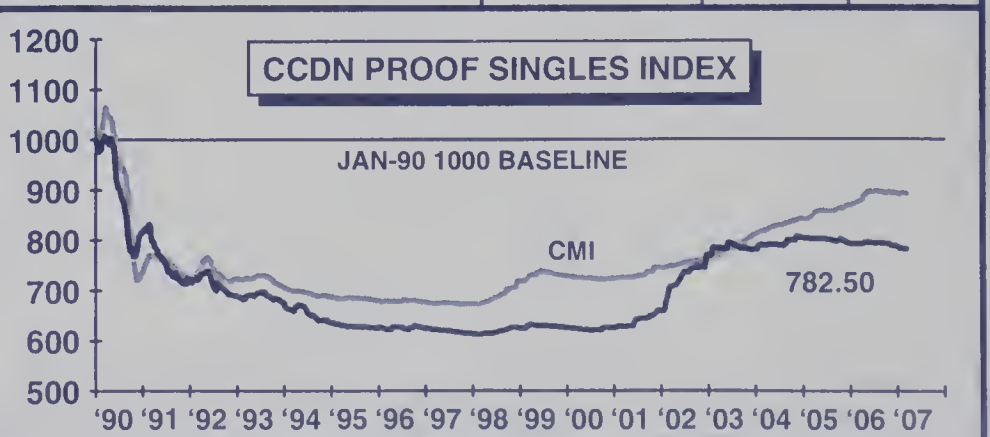

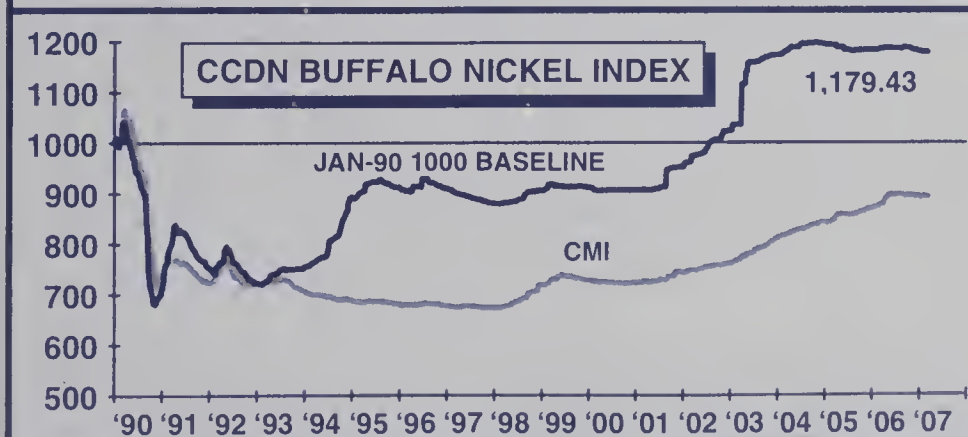

One strong ally in this area is the electronic dealer trading networks. Yet even here sight-unseen trading is hitting a mild respite. The few coins that we see selling thru other avenues such as at public auction prior to the Charlotte and Baltimore auctions are realizing lackluster Bids. Check out the \$1,840 winning Bid for an NGC MS65 1935-S forcing a sight-unseen Bid drop of more than 15 percent. Is it possible that Bidders may be saving their money for greener pastures that lie ahead? The attention may be focused on the headline grabbing ANA. Consequently a few coins are seen selling below sight-unseen Bid. Proof Singles are a likely discount candidate because of their availability and salability. Recent public auctions produced several that fell through the cracks. For example, an NGC PR66 1941 Mercury Dime sold for \$233 despite an active \$260 Bid more than 10 percent higher. An NGC MS65 1947 Walking Liberty Half Dollar brought only \$105 at auction as a current \$130 Bid nearly 20 percent higher goes by the wayside. Of course since these transactions are not

yielding the big bucks it may not be worthwhile. However it does depict the seller's attitude and conviction. Discounting is also hitting the Standing Liberty Quarters. Mostly, high grade common dates are lower such as a PCGS MS67FH 1917 Type I at \$3,500. This decline was triggered when one sold for only \$2,760 at auction, a potential instant profit of \$740 awaits someone. This is also an excellent Type coin. Remember, although the sight-unseen market is mixed we do see some signs of life on the buying side as well. The scarce 1919 Standing Liberty Quarter is up in MS63 and MS64. Morgan Dollars are also attracting higher sight-unseen Bids. Generic interest is returning somewhat as recent declines may have stimulated some buyers to action. Relatively common dates which had been in exile have increased by as much as 14 percent. A PCGS MS65 1878-S took top honors at \$200 Bid following last week's \$175 offer. This high Bidder shouldn't have too much difficulty being filled as 2,938 have been encapsulated, authenticated and graded at this Gem level by PCGS.

Several Saints are also marching to the discounting drum as well. We note that a couple 4- and 5-figure rarities are down by as much as 18%. A NGC MS67 1911 Saint was the big loser after it sold in a retail public auction for \$34,500, even though NGC has only graded 2 at this Superb level and none finer. Silver and Gold Commemoratives are an important reflection of today's mixed market, and where the demand is being emphasized. On the one hand we don't see the usual number of Classic Gold and Silver Commems generating negative activity. Also, the few declines are relatively insignificant looking from a percentage basis. On the other hand, the modest interest taking place is seeking a few of the popular and desirable issues such as the Isabella Quarter, Lafayette Dollar and the 1921 Alabama Centennial 2X2 at higher levels. Mint State Type is also unusually quiet however we do see some plus signs taking place. It shouldn't come as too much of a surprise because we've written many times how dealers want early pre-1840 coinage. Quarters are being targeted and specifically, the Capped Bust series. This includes both the Large Size and Reduced Size examples as increases are appearing for PCGS specimens grading MS61 thru MS63.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CONECA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

We will Pre-Sort your
Mailing Labels to get
You the Best Rate**

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

2007 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class order or Presorted for Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

YES, I want to order mailing labels averaging 5,000+ names from the 2007 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____ signature

Every Numismatic Library needs copies of the latest addition to the
COIN DEALER newsletter family of publications:

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - \$2.50 each • 11-25 issues - \$2.00 each • 26 & over - \$1.50 each

Or, you can purchase *complete sets* of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter (Greysheet)**
 from June 14, 1963 to December 22, 2006, now includes 2,220 issues.
 At \$1.50 each this would normally cost \$3,330, but a complete set
 is only \$2,250.

Complete set of the monthly **CDN Monthly Supplement**
 (formerly the Monthly Summary)
 from August 1976 to December 2006, now includes 365 issues. At \$1.50
 each this would normally cost \$547.50, but a complete set is only ... \$425.

Complete set of the **CDN Quarterlies**
 from January 1992, to December 2006, now includes 180 issues, a
 complete set is only \$200.

Combined weekly **CDN (Greysheet), Monthly Supplement & Quarterlies**
 now includes 2,765 issues, and extra savings at only \$2,750.

Complete set of the weekly **Certified Coin Dealer newsletter (Bluesheet)**
 from August 22, 1986 to December 22, 2006, now includes 998 issues.
 At \$1.50 each this would normally cost \$1,497, but a complete set
 is only \$1,025.

Complete set of the monthly **Currency Dealer newsletter (Greensheet)**
 from September 1980 to December 2006, now includes 316 issues.
 At \$1.50 each this would normally cost \$474, but a complete set
 is only \$375.

Stack's Nets \$7.3 Million In Maryland Initial Reports Are Upbeat In Baltimore

Heightened activity is returning to the sight-unseen market after a very brief hiatus. Dealers are cognizant that it takes an exceptional credit line and ready cash during these hectic periods if one is to be successful. They know that attending major shows back-to-back such as the ANA's National Money Show in Charlotte and the Baltimore Show the following week has ratcheted up the pressure. Certainly it is not just the shows that have been on their taxing schedules; auctions by Heritage, Stack's and Bowers & Merena, as well several internet sales have all played an important role in their quest for continued liquidity. That's why we find many in the dealer community still scrambling. Regardless of the rigors, dealers have learned to endure as their businesses depend on it. They have want lists that remain to be filled and customers waiting to buy select coins from them. Consequently they must be flexible enough to reinvent their inventories while searching out and buying some of the coins that they so desperately need.

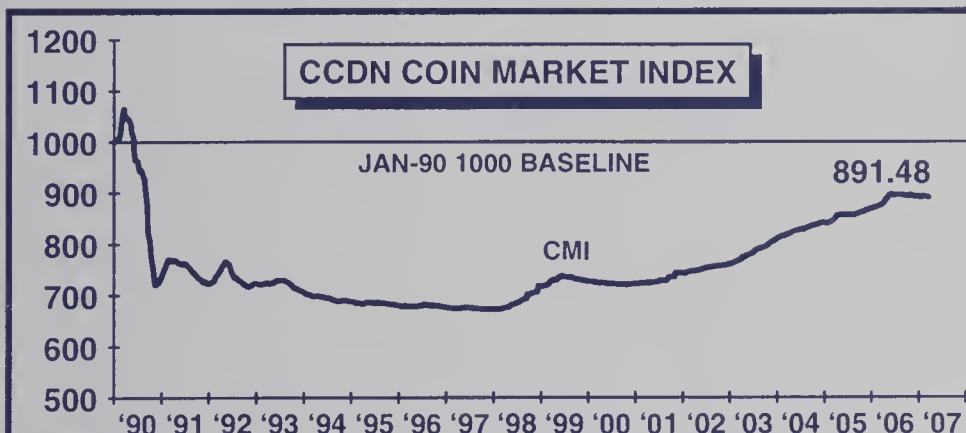

Increased market activity also means that many coins are bound to fall thru the cracks. That's what we see happening as some are trading at levels below current sight-unseen Bids. The Market column indicates the current trading activity that directly affects sight-unseen Bids. Auctions claim the lion's share but lower Asking prices and electronic Trades have significant impact as well. There are several areas being discounted: Silver and Gold Commemoratives, Morgan Dollars, Gold Type, Buffalo Nickels, Mercury Dimes, Walking Liberty Half Dollars and Proof Singles are all participating. Weakness seen among most of these series is rather expected because of their popularity and population. Dealers tend to blow out some of this material rather freely so it's not unusual to see some trade at double-digit percentage decreases at auction. This usually occurs when a coin is offered with little or no reserve. For example, an NGC MS67 1941-S Walker brought only \$6,325 at auction establishing a new Bid that's 55 percent lower than last week's \$13,400. It was one of eight Walkers to sustain double-digit percentage declines. Silver Commems also had a minor workout as a trio reached double-digit losses led by an NGC MS66 1936 Cincinnati PDS Set that realized \$3,150. This is a significant 27 percent sight-unseen drop from the previous week. Conversely, more than a dozen others are sporting plus signs as increased Bids are hoping to spring forth some bargains. Gold Commems reveal a half dozen in decline as auction prices fail

to impress new buyers. Yet, the four-figure or more a pop money raised from their sale is sure to benefit one's hungry bottom line. Bidding is also evident among Morgan Dollars, both business strikes and Proof examples where PR61 thru PR63 are being targeted. Buffalo Nickels and Mercury Dimes also found a few lower this week. None hit double digits though and several actually showed strength at auction as most prices realized were in excess of current sight-unseen levels. Take a look at the 1920 D Merc grading PCGS MS66FB taking a hammer at \$10,925 as sight-unseen Bid of \$3,680 was almost tripled!

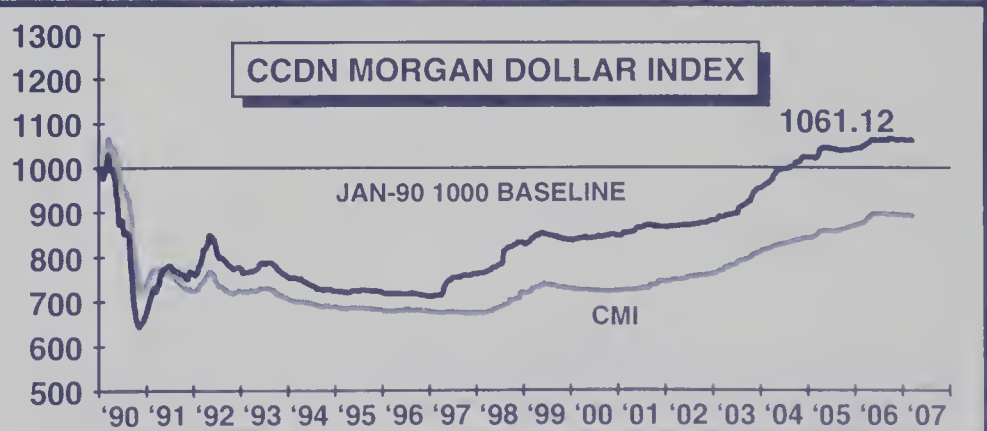

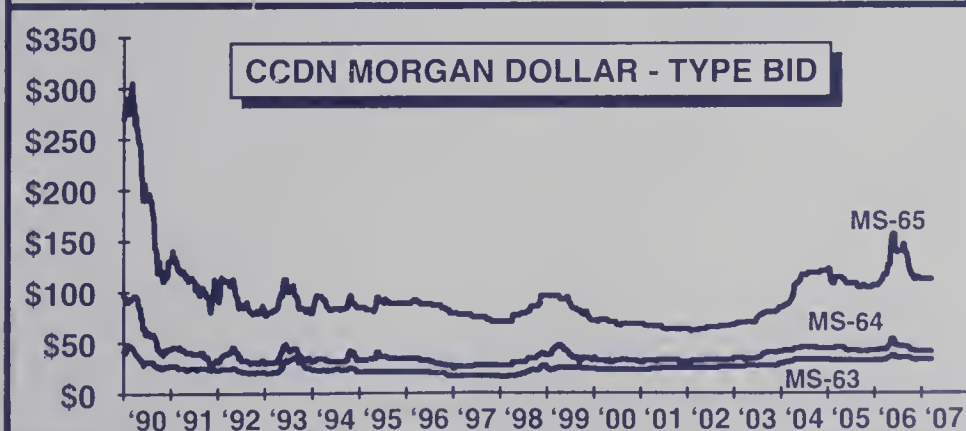

Type spots a few small odd denominations losing a bit of territory as Type 2 Gold Dollars and \$3 Gold lost ground in grades from MS61 thru MS63. A PCGS MS66 1857 Liberty Seated Quarter, No Motto suffered an 12 percent decline to \$3,950 Bid. A 1862 PCGS PR65 Copper-Nickel Indian Cent was scalped to the tune of 20 percent below Bid after realizing \$1,265 at auction, leaving a \$1,600 sight-unseen Bid outstanding. Yet even here those perusing the Market columns will find many offerings for levels well above current sight-unseen Bid.

The weakness experienced in Charlotte at the ANA was not expected to carry over to Baltimore. Dealers believed that it is a much better numismatic climate and marketplace and expectations going in proved this out. Early activity at Baltimore is encouraging as it is "far more upbeat than Charlotte," claimed one dealer. Collectors are actively looking for fresh coins on the bourse but they say it is very expensive to do business. Some can't touch various wants as the asking prices are even higher than what they had been quoted 6-9 months ago. The Stack's Brooklyn Sale held March 20-21 is in the books, claiming nearly \$7.3 million in Maryland (we listed a few of the many highlights herein). Bowers & Merena is currently conducting their Baltimore sale.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell to coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder
In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PCGS DMPL and NGC DPL Bids are for fully Deep Mirror Prooflike coins. Bids for PCGS PL and NGC PL dollars will be listed monthly in a supplemental insert. CDN (Gresheet) Bids have always represented fully, deep mirror prooflike specimens.

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

NGC's coin holder has taken on
a new dimension — *the edge!*

Introducing the new **EdgeView Holder**

*EdgeView perfectly displays
the groundbreaking
edge design of the new
Presidential \$1 Coin series.*

The US Mint's hotly anticipated Presidential \$1 Coin series, with its groundbreaking edge-incused inscriptions of mint year, mint mark, and national motto, arrives in February. And NGC's new EdgeView holder gives you the perfect way to inaugurate them. All Presidential \$1 coins submitted to NGC are automatically encapsulated in an EdgeView Holder.

EdgeView's unique pronged core insert allows you to view your coin's edge via four large surrounding windows, all while providing you with NGC's high standard of preservation and presentation. Think of it as getting the uniform size, attractive appearance, quality seal, and durable tamper-proof casing you expect from NGC — with an edge.

***Give your Presidential \$1 coins a new
dimension with EdgeView.***

Higher Bids Target Undervalued Issues Sight-Unseen Market Begins To Heat Up

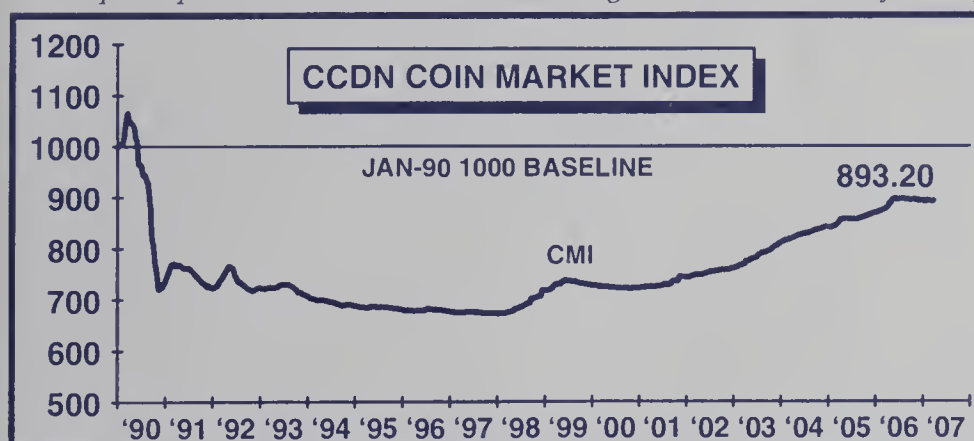

The rare coin market has concluded the first quarter of 2007 in frenzied fashion. Sometimes dealers think that they're running a marathon as each auction seems to follow another and shows appear non-stop with the finish line never really in sight. Yet, surprisingly with so much activity some dealers continue to find the market to be a trifle "sluggish." Yet they are quick to add that this isn't a bad thing because they still believe that the market is in a bullish cycle and not in a downturn. After all, several years ago this present market climate would have been considered red hot. Nevertheless, though perhaps not running at full tilt, it is still believed to be "solid" with collector demand for coins remaining strong.

Several factors have combined to maintain this sustained demand. The increased use of the internet for coin auction sales has been an important reason why the supply side has been struggling. We also know that coins are being taken off the market and that levies added pressure on price. Dealers concur that the strength of the precious metals has also played an important role in supporting this bull market. They believe that, psychologically, it provides ample fuel to the momentum already established. As supplies of fresh coins dwindle, astute players are looking for areas they can explore to keep their business flourishing. The sight-unseen market is one such venue and is closing out the quarter on an uptick.

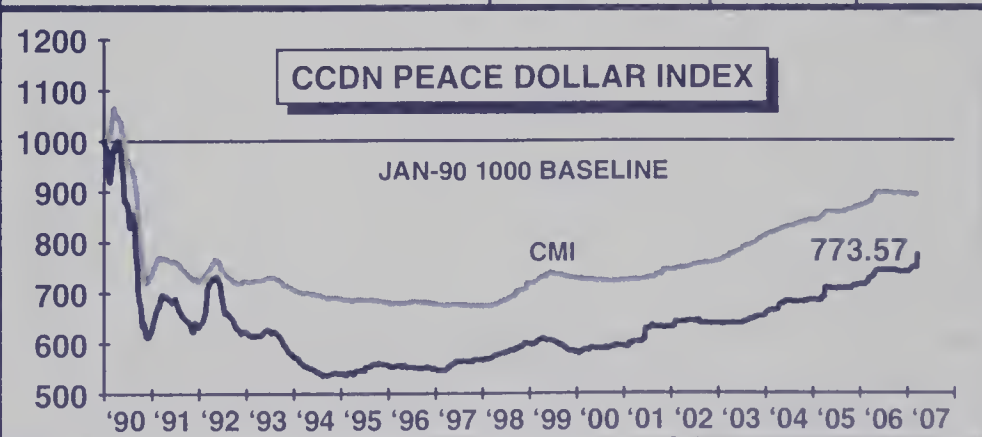

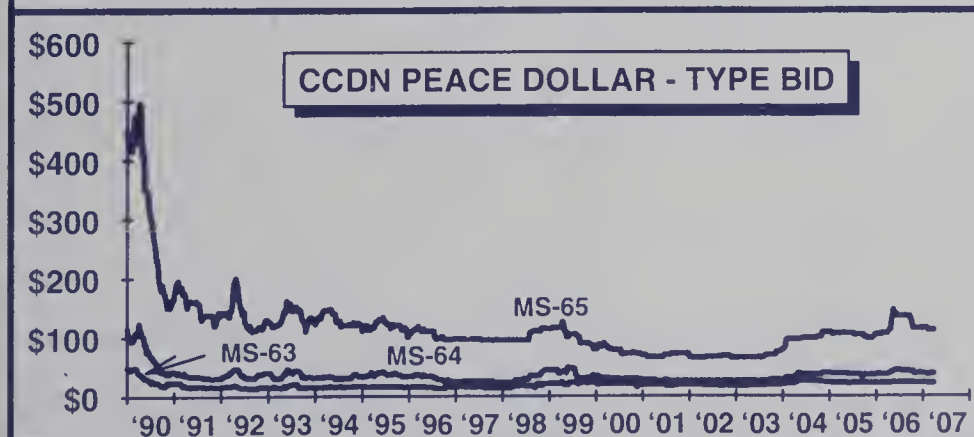

Several dealers are of the opinion that some areas of the market are simply undervalued. Morgan Dollars, Peace Dollars and Silver Commemoratives have received a lot of attention this week. Combined, this triumphant trio has racked up nearly 250 advances! Dealers believe that select sight-unseen Bids are just "too cheap" and they would be happy to own some of those coins at these levels. Select semi-key Morgan and Peace Dollars are one such area. One dealer that travels the continuous show circuit said that he would love to buy these Dollars in MS61 and MS62 at the shows he attends but there just isn't that much available. Consequently he would rather increase his sight-unseen Bids and just buy

"a whole bunch" from the electronic dealer trading networks. Initially these coins are slated for his inventory but he knows that he'll have little trouble finding customers for them. That's because these Dollars are seriously undervalued and for a collector trying to fill his or her Dollar set with reasonable coins this is a prudent idea. He is targeting the semi-key San Francisco and Carson City issues because they usually come nicely struck with ample luster, the downside risk is nil and demand is strong. He knows that he may get one or two slabbed horror stories but he remains confident that his success parables will provide a much greater benefit. Another dealer is taking a position in select Silver Commemoratives. Again, he believes that these are not only undervalued, but that NGC material is "a really good deal" with respect to Bids for PCGS slabs. Check out the Robinson-Arkansas and York issues, each gaining over 50 percent. These higher buy offers may be a good deal for someone on the selling side too. Discounting also plays a role in this market as dozens of Dollars are displaying minus signs. Silver and Gold Commems have their share of minus signs as well. A PCGS MS66 1937 Arkansas PDS set sold at auction forcing sight-unseen Bid down by more than 25 percent. Mint State and Proof Type declined a bit as well with several issues suffering double-digit declines. Mint Gold Type is mixed with a bias towards the negative side. However among Gold issues the percentage change is on the calm side. Select Buffalo Nickels, Walking Liberty Half Dollars and Proof Singles have also sustained strong declines.

Texas is the venue for an early April auction as Heritage has scheduled its Dallas Coin Auction to begin on the 9th. Key Morgan Dollars on the block include: a phenomenal PCGS MS66 1892-S, a rarely seen PCGS MS63 1893-S and a PCGS PR66 Deep Cameo 1895. Other rarities include: an NGC PR65 1880 Flowing Hair \$4 Stella; a PCGS MS64 1805 Capped Bust \$5; an NGC MS64 1834 Capped Head, Crosslet 4 \$5; and an NGC MS66 1909/8 \$20 Saint.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks & Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Low Premiums For Generic Double Eagles

Select Semi-Key Dollars Higher In MS61-MS64

Dealers though perhaps overwhelmed with bustling activity remain optimistic, having concluded an extremely productive first quarter of the year. The levels realized may not be as powerful as we have experienced earlier in the bull market's run but the prices being paid today are still exceptionally strong. Fresh coins are still desperately needed by collectors and dealers even after an amazing \$160+ million dollars has already been hammered home at public auctions since the first of the year. Of course the hectic pace that transpired during the first three months has taken its toll financially and physically, but dealers have little time to pause as auctions and shows continue to dominate the immediate horizon. The spring schedule finds that the Santa Clara Expo April 19-22 is up next in California. Here Superior will host the Santa Clara Elite Coin Auction April 19-20.

The continued success of the precious metals has also contributed its share to the numismatic demand. Gold and Silver have both rebounded nicely since their virtual low points of the year on March 9. Only one month later each of these metals have climbed ever higher and remain bullish as of this writing. Increased interest in these metals often triggers demand for rare coins as it invigorates those seasoned collectors and provides a stimulus for some new blood to enter the arena. Buyers of generic Gold Type continue to benefit from the extremely low premiums that are being charged above their intrinsic melt value. This trend continues in April as the reduced premiums for \$20 Liberties and Saint-Gaudens make them a superb alternative to strictly bullion coins. Sight-Unseen Bids for PCGS and NGC MS61 Saints and Libs are just \$660. With Gold Spot at \$665.70 per ounce, intrinsically these numismatic Double Eagles are valued at \$644 each. Therefore it is rather painless to buy at these levels if you believe Gold will hold or continue higher. Take a look at the dwindling premiums over a 6-year period seen within the charts at right.

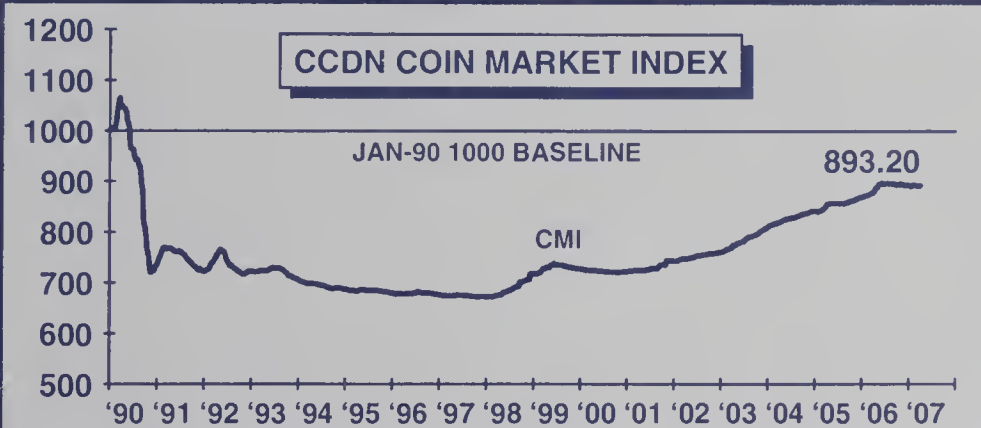

Slight discounting is still observed within the sight-unseen market and some of that activity is even occurring among Mint Type Gold. Yet as bullion is increasing the declines are more of a continuation of last week's weakness found among the better Gold Type including Type 2 Gold Dollars and \$3 Princesses. Still, dealers know that these small Gold jewels pack a powerful dollar punch as they are able to raise 4-figure

amounts of cash with their quick sight-unseen sale. Silver Commemoratives are mixed with more plus signs evident. Buyers are willing to bargain hunt while increasing Bid and acquiring some nice Gem examples for little money. PCGS and NGC MS67 Maryland, Wisconsin and York Half Dollars are all higher as dealers look to add a few Superb quality Commems to their inventory. Signs of the bull market are perhaps most noticeable in the popular Morgan Dollar series. Activity was brisk last week as many dates were sporting plus signs. Apparently they haven't reached their saturation point as buyers continue to chase after the Carson City and San Francisco semi-keys this week. Coins priced from \$300-\$600 are being sought-after. Many a collector is able to fit one of these rarities comfortably within their budget. PCGS and NGC examples are

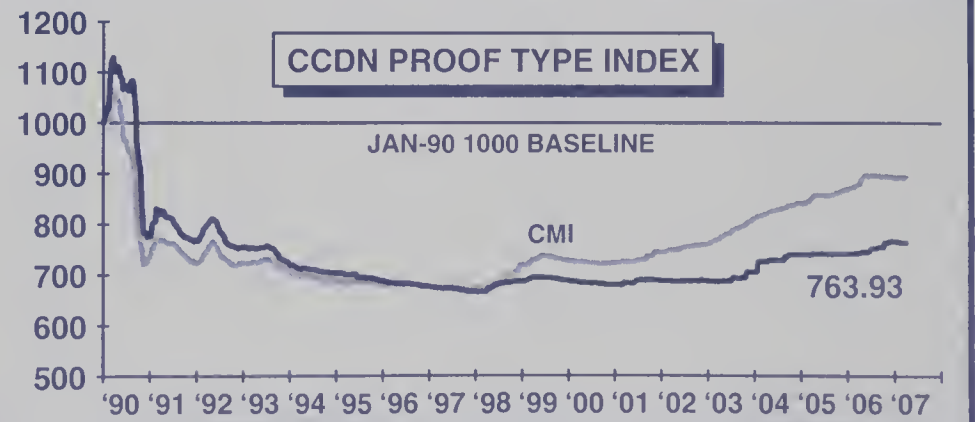

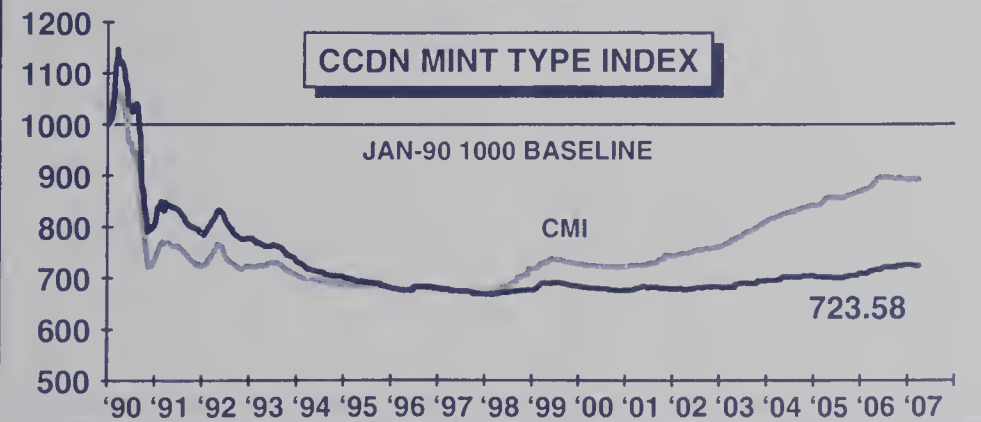

realizing higher Bids as the 1885-CC climbs in MS61 thru MS64. Peace Dollar demand is more selective with only the 1934-D semi-key increasing in three Uncirculated Grades for both PCGS and NGC. The trio of very popular designs, Buffalo Nickels, Mercury Dimes and Walking Liberty Half Dollars is mixed as dealers selectively chase after a few. For example, the 1937-D Walker jumped more than 10 percent in NGC MS67 to \$2,200 Bid. It is a case where dealers are able to spot good value and take advantage of the situation. Various later date Buffalo Nickels are also on the move as a small herd of high-grade PCGS offerings advance. Here we find one dealer still actively pursuing volumes of this material in spite of multiple auction and weekly offers appearing at well under his Bid. Various ANACS slabs are again finding increased sight-unseen Bids as many dealers are still feeling that the new holdered coins offer good values in this market.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

The Seven Day Guarantee™: ICG will award you a certificate good for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. The ICG grading turnaround time for coins is eight days. ICG will send you a certificate good for a free 20 coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes vintage coins, COMEX, A.M.E. coins and foreign coins. The guarantee is in effect from 9:00 a.m. to 5:00 p.m. on weekdays and is not in effect on weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG returns them back. No money back guarantee. See the ICG website for more information on the ICG grading submission form.

Market's Active Pace Continues

1880 Flowing Hair Stella Soars Past \$300,000

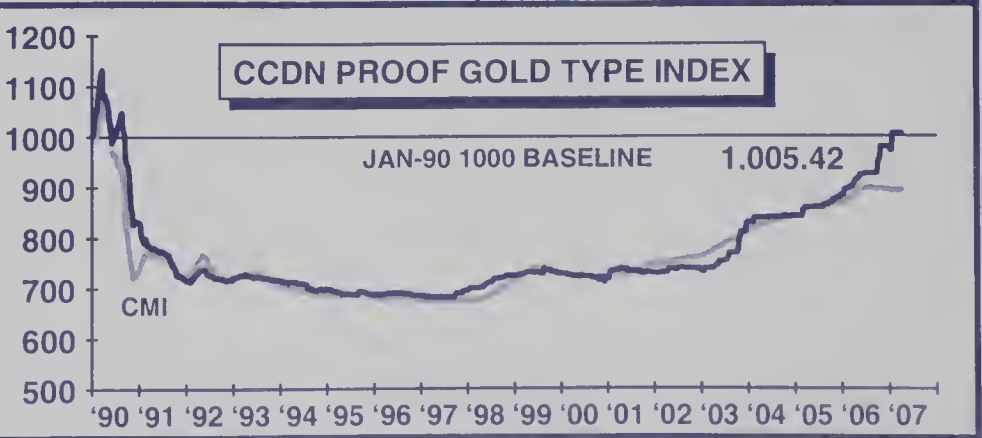

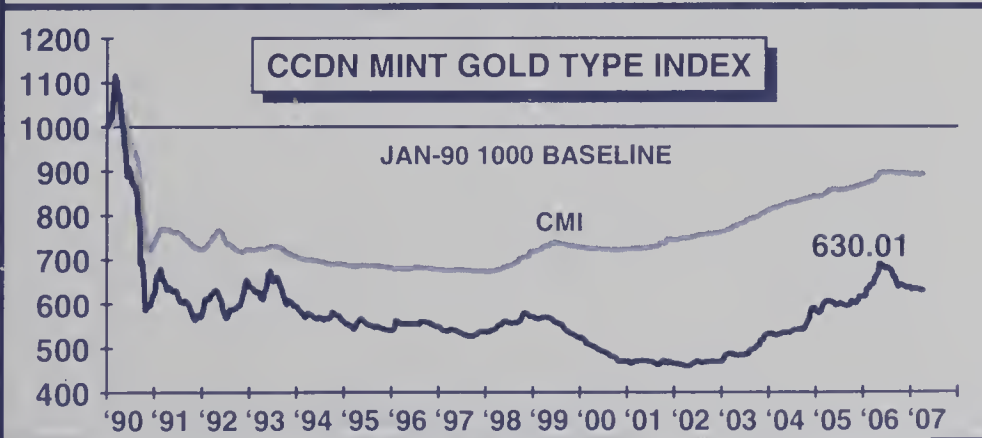

Strong activity appears to have become the norm this April as we spring towards mid month. An increased number of auction lots hitting the block combined with the unfulfilled needs of dealers and collectors make this scenario much more plausible. Of course the income tax deadline and the high price of gasoline around the country has only added to the pressure on the masses' disposable income resulting in less money available for rare coins. Some collectors that we spoke with are concerned about their finances and are looking for ways to diversify some of their holdings. The precious metals have been rather strong and enticing with Gold firmly entrenched above \$670 while Silver is reaching the \$13.80 per ounce level. As new investors grab at the metals for some financial stability a goodly percentage of them will end up buying numismatic coins in one way or another. The increased demand for coins puts an added burden on those dealers already hard-pressed to supply their current customers' needs. This new demand may very well be looking at entry-level coins. However, as many of these were jettisoned to raise funds for auction purchases dealers are scrambling, looking to buy them back as quickly and as judiciously as they can. The sight-unseen market is a perfect vehicle for this project and increased Bids may just be the ticket to fulfill this need.

Heritage's Dallas Coin Auction realized more than \$7 million April 9-10. A few of the sales many highlights include: a PCGS MS66 1892-S Morgan Dollar at \$189,750; a PCGS MS63 1893-S Morgan brought \$149,500; an NGC PR65 1880 \$4 Flowing Hair Stella sold for \$316,250; and an NGC MS64 1834 Capped Head, Crosslet 4 \$5 realized \$103,500. Naturally, dealers needed ample funds to manage some of these rarities. Also, the Jackson Hole collection of Morgan Dollars within this sale may have stimulated the entire Morgan Dollar market. This week's increased

sight-unseen Bids have fanned-out across many segments of the Morgan market, reinforcing this sentiment. For beginning collectors on a budget, this attractive series offers many different options they can easily handle. Yet the strong percentage sight-unseen gains that are occurring in this series are for Generic as well as some moderately better dates. The past few weeks found MS61 and MS62 Bids advancing with not enough supply to fill the demand. Now we see MS63 thru MS65 dates moving higher as general interest sharpens to select those issues still believed to be under-valued. This includes many better than common thru semi-keys that can be bought for less than \$1,000. Dealers are more than willing to stock any date that represents an excellent value. For example, Bid jumped better than 30 percent for NGC MS65 1898 and 1882-O. Also, a PCGS MS63 1898-S spiked 26 percent while an 1892-CC grabbed nearly 20 percent for PCGS or NGC MS61 examples. Prooflike Dollars are also benefiting from this increased activity. While Silver Dollars remain hot, buyers are reluctant to pursue Mint State Gold Type. Obviously they believe that some better opportunities currently exist for their money. Silver and Gold Commems are still mixed, the exception this week includes: the York in NGC MS67 and Maryland in NGC MS65 and PCGS MS66 up a significant 55, 30 and 25 percent respectively. Mercury Dimes are also active as numerous later dated entries exhibiting Fully Struck Bands are being effectively targeted by at least one well-known buyer as PCGS MS65FB - MS67FB material is on the rise. In many cases sight-unseen Bids for PCGS coins eclipse their NGC counterparts by 3 times. Walkers in the 1930s and 1940s sold off a bit further as funds have been redirected to areas that may provide a greater return. The numismatic action turns to the west as the popular Santa Clara Expo April 19-22 is next on the circuit along with Superior's auction April 19-20.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers. Individual responsibility of the dealers and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

The Seven Day Guarantee™ is your solution to 'Grading Service Gridlock'. At ICG you will find these important things: The top experts, the best customer service, the finest holders and the fastest turnaround times. This guarantee applies to all 15-Day and Economy Service submissions. If we do not perform on our current guaranteed turnaround time of seven days on 15-Day Service and Economy Service submissions, we will grade double the submission for a free 20 coin economy submission. Guarantee only applies to regular US coin submissions with no special orders. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing is guaranteed to be returned to the sender without a return label. ICG is not responsible for any loss or damage to coins in transit.

Peace Dollars Draw Value Hunters Showers Of Higher Sight-Unseen Bids

April continues to be unusually active and it appears that this taxing month will conclude in robust fashion. Most dealers are now actively pursuing their customers' needs along with their own in California at the Santa Clara Coin & Collectibles Expo. This important west coast show follows on the heels of Stack's Clara Collection auction that realized more than \$1.4 million in New York April 17. This ongoing auction demand is part of a bigger picture as the market is desperate to work out the demand/supply imbalance. However the demand is becoming more and more select as knowledgeable dealers and collectors target those coins that represent a decisively good value for the money. This overall collector demand continues to prosper because of favorable market conditions. Bullion strength has been one area that has helped to put a solid charge into the bull. Gold Spot, after hitting an 11-month high above \$690 per ounce has dropped back a bit, now at \$683. Many analysts are predicting that the magic \$700 per ounce mark will be eclipsed soon. This likely scenario should have continued benefits for the rare coin market and for generic Gold Type in particular. As more potential precious metal investors are being educated about financial diversification relevant questions for acquisition strategies come up. Many of these newcomers don't have big sums to plunk into Gold so some are being directed into Silver coins as an alternative. Bags of 90 percent Silver Dimes, Quarters and Half Dollars are an easy choice but this initial ownership into coins may very well blossom into greater numismatic awareness. This underlying market demand will combine with the overall collector base growth to provide a huge platform as rare coin interest moves forward in 2007.

Sight-unseen activity has been selectively impressive this week as dealers continue to jump on those specific areas that they believe to be scarce and represent an excellent value. Peace Dollars are one popular series that they consider to represent good untapped potential. As a result many of the better dates from this short series meeting these criteria are being targeted. Buyers are currently looking for most of the dates from this series except for the common 1922-1925 Philadelphia examples. Bids are generally higher for the balance as more than 70 increases have been recorded in grades MS61-MS66. Increased sight-unseen Bids are primarily targeting MS63 and MS64 grades this week. Over the past 12 months the lower Mint State grades of MS61-MS62 have performed

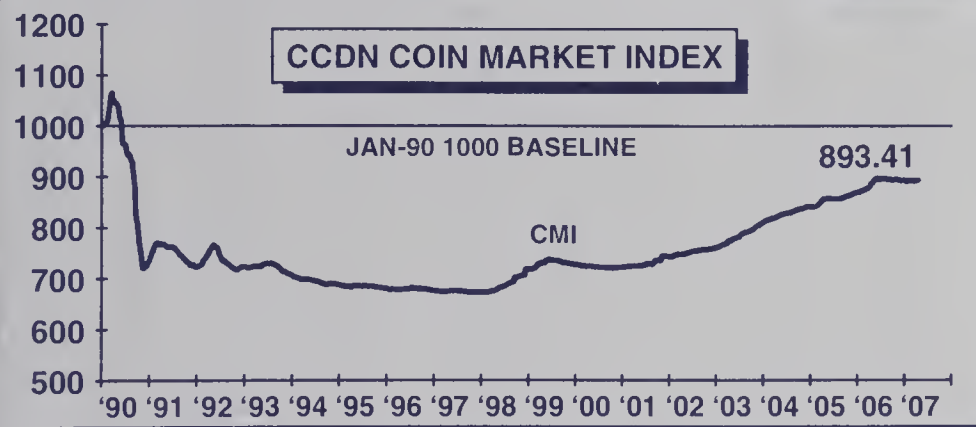

the best on a percentage basis as seen in the chart to the right. Dealers believe that many of these dates are extremely affordable and undervalued at current levels. Morgan Dollars also made some noise this week sparked by the initial year of the series, an 1878-S in MS61 that spiked more than 21 percent. Both PCGS and NGC examples participated. Similar activity was seen with an NGC MS62 1878 7TF, rev of 1878 and a PCGS MS64 1878 7TF, rev of 1879. Increased sight-unseen Bids for Proof Walking Liberty Half Dollars in PR61-PR63 are another example of dealers looking for areas representing a solid value with very little downside risk. 1941 Walkers in PR61 gained a huge 18 and 29 percent respectively for PCGS and NGC examples.

Some discounting is still evident as sundry Classic Commems as well as a few Morgans and select Gold Type drift a bit lower. Franklin Half Dollars and Standing Liberty Quarters are also down overall. Yet even here among softening prices some hard profits were available as several dealers had their Asking prices hit on the electronic trading networks during the recent surge in Gold Spot. State \$20 Saints and Libs made up the bulk of the transactions. Also the recent spike up for various heavily populated high grade Silver Commems has some wondering as many of these coin were recently readily available for less.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels. www.ccdnpublishings.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

\$5 Million Snags 1913 Liberty Nickel

Record Sight-Unseen Bids For MS67 Commems

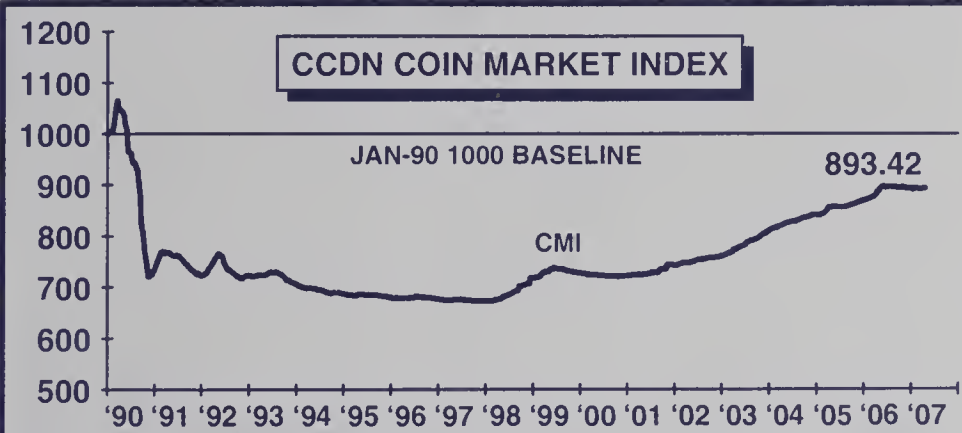

April 2007 will certainly go down in numismatic history as a blockbuster trade was consummated on 4/25. Several months after its no sale at auction in Orlando, a California collector has paid \$5 million for the famous Eliasberg PCGS PR66 1913 Liberty Head Nickel. The sellers, Legend Numismatics of Lincroft, New Jersey and Washington state business executive, Bruce Morelan jointly purchased the major rarity in May 2005 for \$4,150,000. Brokering the deal for his unnamed Southern California client was Ron Gillio. This is a very fitting way to end the first third of 2007 because not only does it illustrate powerful demand for rarity and quality but it also suggests the continuance of the bull market. Dealers agree as they have many sophisticated and well-heeled collectors just waiting to buy select material when it becomes available to them. We know that many dealers retain significant and aggressive want lists. Unfortunately it is not easy to fill many of these orders but that's the nature of this business. When patience and presence of mind are finally rewarded, both dealer and happy collector have reason to celebrate.

This action bodes well for another strong month for rare coins as the Central States Numismatic Society's convention is headed for St. Louis, MO May 10-12. The show will undoubtedly attract many a collector from heart-land America and the surrounding area as well. Bowers and Merena will host the May 2007 Rarities Sale May 8 followed by the CSNS 2007 Convention Coin Auction May 9-12 by Heritage. Naturally dealers strive to prepare for these auctions and shows by putting themselves in a highly liquid cash and credit position. Consequently this week's market columns indicate that some discounting is taking place in the sight-unseen market. A few select coins are allowed to sell at lower levels while dealers and collectors are there to scoop up the bargains. Gold bullion weakness was responsible for several Gold Type trades occurring. Check out the \$22,500 sight-unseen trade of a PCGS MS64 High Relief Saint. Morgan Dollars, an excellent source for raising some quick cash were hit this week as select dates sold for less at public auction. A PCGS MS66 1898 claimed \$460 this week causing Bid to drop more than 10 percent. The common 1885-O in NGC MS65 suffered a double digit loss after its poor

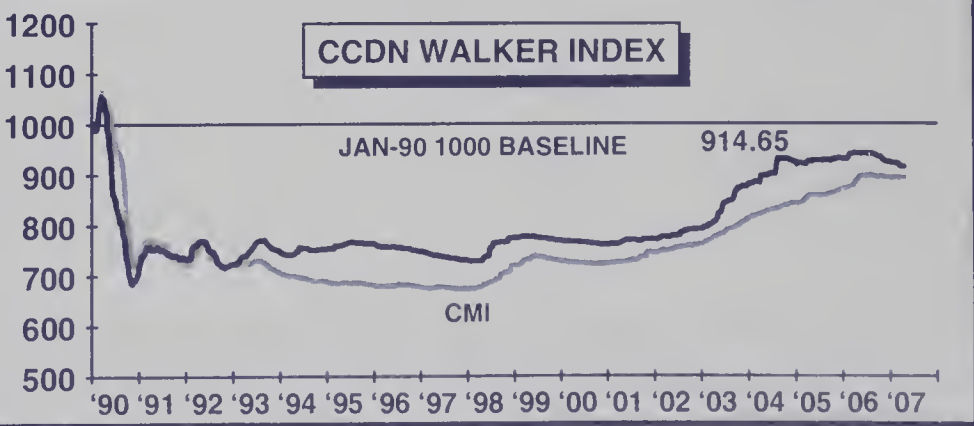

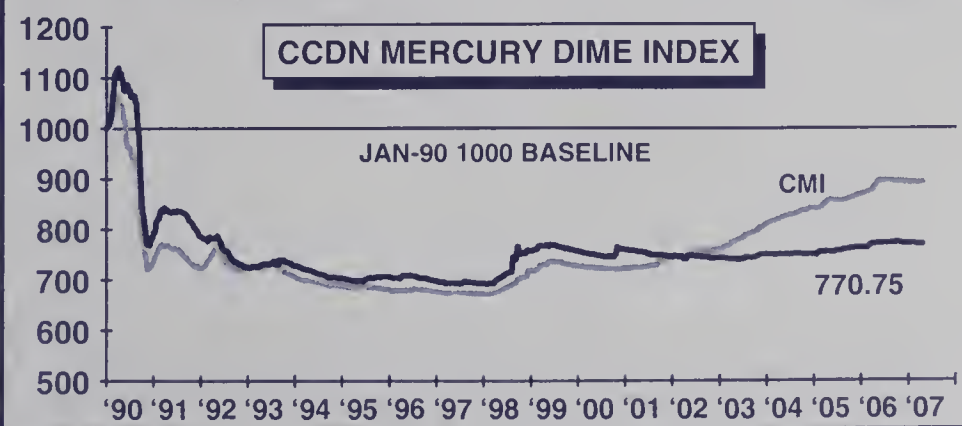

auction performance. These two were among 16 that lost ground. Additional weakness was experienced by the popular trio, Buffalo Nickels, Mercury Dimes and Walking Liberty Halves. Yet the recent increased Bids for Gem Full Band Mercury Dimes have inspired sellers to hit these sight unseen offers with regularity. Hundreds of PCGS MS65FB-MS67FB specimens are being gobbled-up. This in spite of our market column revealing many examples still selling at auction for below Bid and some dramatically below. Dealers with quantities are also able to benefit by cashing-in and taking advantage of opportunities.

Silver Commemoratives completed a strong week as Bidders tried to gain an upper hand on undervalued coins while pushing several issues higher. Texas was a target as strong percentage gains moved MS66 and MS67 1935 PDS sets higher. Both PCGS and NGC MS66 sets now claim an all-time high sight-unseen Bid of \$1,050 gaining more than 20 percent. In only 4 years, NGC Bid has spiked 153 percent off its all-time low Bid of \$415 April 18, 2003. However the greatest gain this week was turned in by an NGC MS67 1935 PDS set soaring 65 percent to \$2,500 Bid. York issues in MS66 and MS67 continued last week's momentum by establishing all-time highs as well. A \$4,000 sight-unseen Bid for PR67 Red Indian Head Cents is also an all-time high, up nearly 100% since January 26, 2001 when its low Bid was established at \$2,050. Today's collectors have a strong affinity with Type as it allows them to obtain many different designs without costing them a fortune. Dealers are doing their part in obtaining material that they believe to be undervalued for their customers. Trade Dollars are one such area and have inched higher in MS61 and MS62.

Modern enthusiasts take note NGC has announced that it will now grade and encapsulate "Blue Ikes" while still in their original packaging. This service also includes GSA soft packs of Morgan and Peace Dollars and is intended to preserve the integrity and pedigree of the original holders. The PCGS camp has stated that they will now recognize the up or down orientation of Edge Lettering on Presidential Dollars. Position A and B will now be noted on the holder and included in the PCGS population report.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month, "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder
In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit, on a sight basis.

NEED TO MAIL?

**Save Money
On Postage!
We will Pre-Sort your
Mailing Labels to get
You the Best Rate**

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

2007 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class order or Presorted for Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

YES, I want to order mailing labels averaging 5,000+ names from the 2007 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____signature

The Fine Print

*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CONECA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

Anxious Buyers Await CSNS Show

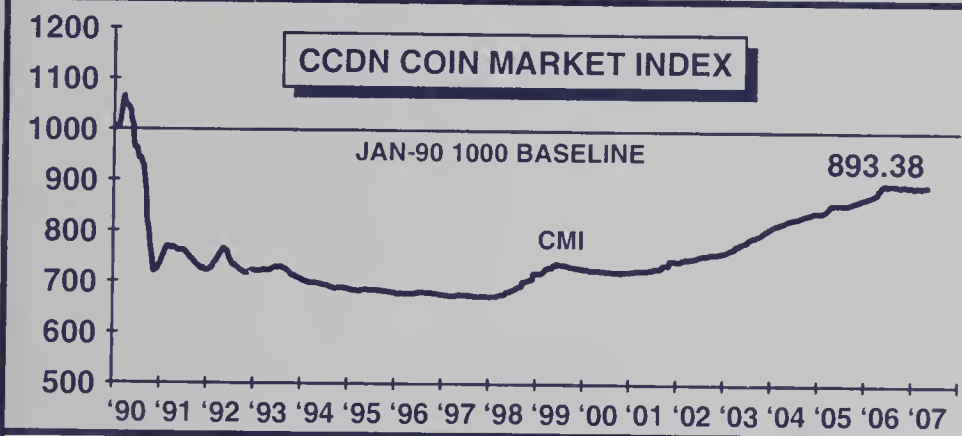

Make Room As Internet Auctions Increase

While we have repeatedly hailed that strong demand remains present for select sight-seen rare coins of all series it is a different picture for the generic sector. Those dealers that make their living by buying and selling common date coins and related Type on the electronic dealer networks have noticed a decline in the number of coins traded. They tell us that telemarketers are seeing a drop in retail sales and consequently their demand for this easily obtained material has weakened. This softening trend has been occurring over the past year or so yet it took some time for traders to accept the new (lower) levels. It also has some of them feeling a bit apprehensive. Dealers tell us those "blue collar bread and butter coins that were fast sellers have had a drop-off." Those that have a rich inventory of generic Commemoratives, Morgan Dollars, Walking Liberty Half Dollars, Type and select Gold Type have all experienced a decrease in their net worth. Yet coinciding with this minor Bidder's malaise we are still seeing weekly internet auctions finding homes for volumes of sundry material that certainly isn't all top tier caliber. The innovator of this genre, Teletrade have seen their offerings expand to tri-weekly outings and higher total prices realized per sale. David Lawrence has augmented their weekly sale to include a special Thursday *rocket* installment. The venerable Stack's has just announced that they will be joining the bandwagon, tossing their hat into the weekly foray starting May 7th. So it is clear that modest and slightly better collector coins still sell like hot cakes in this venue, albeit not at record levels. Conversely, those dealers that hold or have access to better dates as well as interesting rare coins with eye appeal have it made in the shade. After all, it is these "glamorous" coins that adorn many a collector's want list that will be vigorously hunted down at the Central States Numismatic Society show in St. Louis, Missouri May 10-12. They will also be aggressively Bidding for similar material at the Bowers and Merena auction May 8 and the CSNS Heritage sale May 9-12 also in St. Louis.

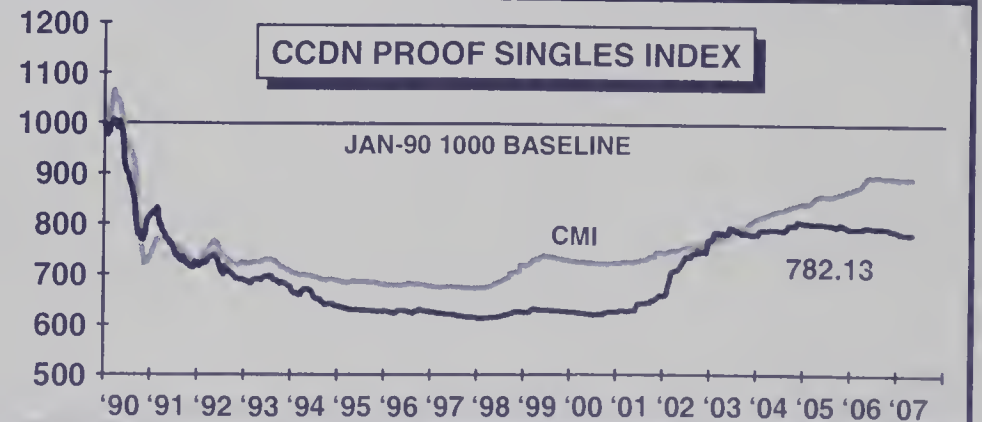

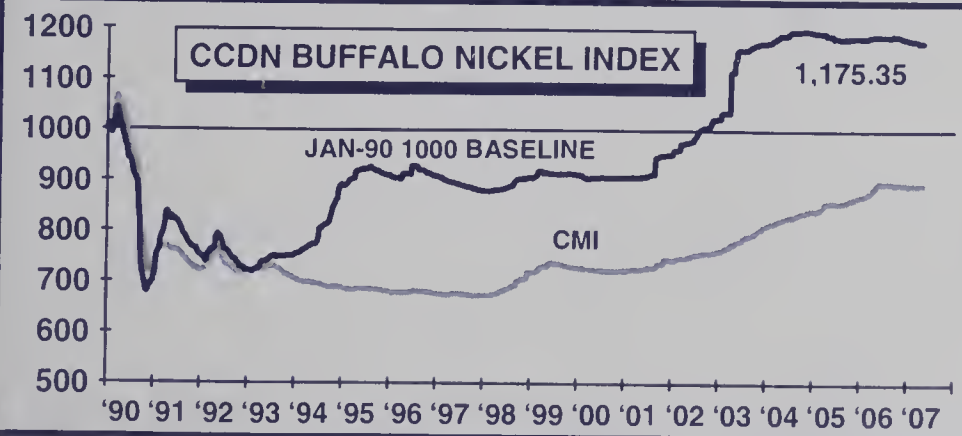

Some dealers are definitely among the group that considers themselves to be value hunters. They will often increase their Bids just enough to trigger

transactions for the quantity of coins that they need. They realize that scarcer material or condition rarities not often found in a particular grade requires hefty jump Bids to be successful. They will also attempt to weed-out the coins that remain desirable even though they are priced at or near their all-time high. Dealers rely on their expertise and prudence to capture this select material that they can present to their customers as being a potentially good buying opportunity, even in today's market. Acquiring these coins sight-unseen also allows them to obtain several of those needed dates at attractive prices. Walking Liberty Half Dollars have its share of rarities within the series but it also has many relatively common dates that make up the extended short-set that is usually targeted for quick sale. Yet, this isn't true for all the dates because buying the key to the short-set is still prized by dealers. Consequently the 1938-D is finding continued Bidder support as MS64 examples increase to \$460 Bid. This represents a new all-time high sight-unseen Bid looking back over the past dozen years. Interest abounds for several middle and late dates in various grades as well with Bids increasing by up to 5 percent. Top honors was garnered by a 1936-D in PCGS MS65 at \$325 Bid. ANACS slabs also found dealers hunting for similar dates with Bids increasing as much as 20 percent for an ANACS MS65 1947 at \$90 Bid.

In an encore performance from last week, the 1935 PDS Texas set is the lone star of the Commems. Again, it has been well over a decade since sight-unseen Bids this high have been recorded for PCGS and NGC MS66 sets. Washington-Carver 1954 PDS sets are scoring strong double-digit gains for ICG issues in MS64 and MS65. You can see that the balance of the sight-unseen market this week is rather quiet. Buffalo Nickels, Mercury Dimes, Mint State and Proof Type are all displaying lackluster trading. Maybe the upcoming CSNS show and auctions are affecting the activity. This is a travel week for many dealers as they will need to arrive in St. Louis with plenty of time to view auction lots and plan their strategies while preparing for the show.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

The 7 Day Guarantee™ is your solution to 'Grading Service Gridlock'. At ICG you will find these important things: The top experts, the best customer service, the finest holders and the fastest turnaround times. Guarantee only applies to regular U.S. coin submissions which exclude variations, N.A. coins, and all other coins. ICG's grading service is available 7 days a week, including weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. No other guarantee or refund is available for the ICG's grading submission form.

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

2007 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class order or Presorted for Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

YES, I want to order mailing labels averaging 5,000+ names from the 2007 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____signature

NGC. GSA Dollars. Ike Dollars.

The Perfect Companions.

*Just one of the ways

redefining the hobby*

NGC Grades GSA Soft Pack and U.S. Mint Sealed Ike Dollars in Original Issue Packaging

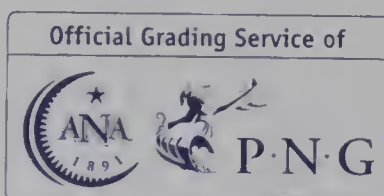

The perfect companion piece to NGC's certification offering for similar coins in rigid GSA and US Mint packaging, NGC now grades and encapsulates GSA Soft Pack and "Blue Ikes" while still in their original holders of issue.

In order to preserve the integrity and pedigree of their original holders, the entire soft pack holder is sealed in a semi-rigid clear plastic case with an oversize label across the top that includes necessary attribution information, the coin's pedigree, and NGC-certified grade. The case developed for this service is

made from the same high-quality, inert materials collectors have come to expect from NGC, and it is thoroughly sealed to guard against environmental hazards and contaminants. These coins are eligible for inclusion in the NGC Registry, and will appear in the NGC Census.

NGC is proud to be an innovator and market leader in producing new products and services that benefit the collector and numismatic marketplace. For more information and for submission instructions, visit **NGCcoin.com**.

Generic Dollars Begin To Slide Rare Gold Highlights \$1.82 Million Sale

With the rights of spring at hand many dealers are already experiencing some heated market activity. Now as the summer semester nears, the Central States Numismatic Society's show in St. Louis becomes the epicenter as dealers made their way to America's heartland. Those whom we spoke to said that they will be "aggressively buying" in St. Louis. Initially lot viewing dominated their arrival, culminating with the May 2007 Rarities Sale by Bowers & Merena on May 8 realizing over \$1.8 million (highlights below). Lot viewing was also taking place for the CSNS 2007 Convention auction by Heritage. Which although incomplete at press time had just concluded the first two of seven sessions and already amassed \$3.3 million. For dealers, the auctions were just some of their necessary "fun" as they pounded the bourse during PNG day hoping to escape with an early bargain. Dealers expect to see some high caliber and better date rare coins at PNG day and that's exactly what's needed. Often, it is these coins that are listed on some of their more knowledgeable and affluent customer want lists. This then is an excellent opportunity to look over some of this material and try to negotiate an acceptable transaction for themselves and thereby please their customer before the retail masses descend.

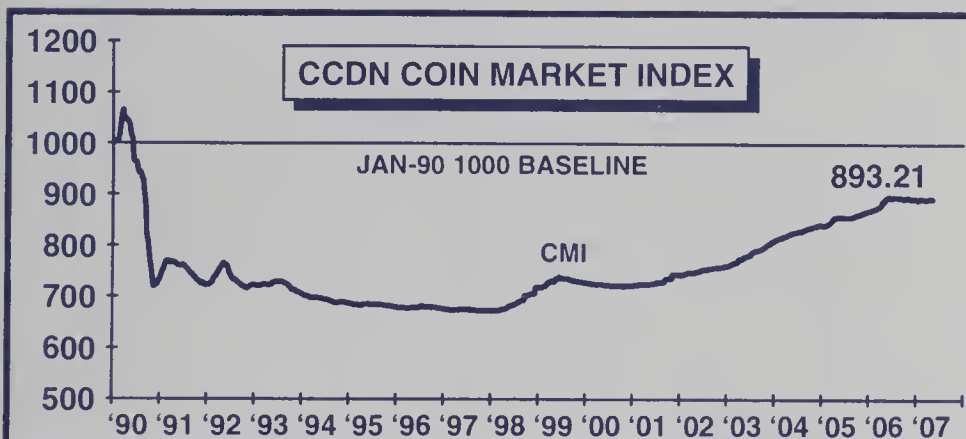

Naturally dealers try to plan in advance for these auctions and shows by putting themselves in a substantial credit and cash position. As they certainly want to be able to take advantage of any deal that may come their way. You never know when an exciting coin or lucrative deal may present itself. That's when the sight-unseen market earns its keep. This week we are witnessing "pulled Bids" for select areas of the market including Silver Commemoratives. As support wanes, weak auction sales will continue to push Bids down until new buyers are visible. An NGC MS67 1936 Wisconsin Half was hit with a 40 percent roll back after a sight-unseen \$400 Bid was accepted. Commemoratives are no stranger to being chosen for quick sale via the sight-unseen market. That's because they can be sold to raise money fast and they are plentiful enough to find when they are needed. Declines among generic Morgan and Peace Dollars were enough to pull down both of these popular segments of the market. However the largest percentage decline goes to a not so attractive NGC MS66 1889. Its last public auction appearance brought this Gem down some 15 percent. Still, with 99 graded MS66 by NGC they are available

and an excellent way to raise some money. Walking Liberty Half Dollars always seem to be virtually sitting ducks when funds are needed, too. That's because dealers look to sell the material that they are easily able to buy back with not too much strain. This may have been the case when an NGC MS65 1937-D was sacrificed in a public sale. The new \$500 Bid is more than 13 percent below last week's level. However, it is still comfortably above its low Bid of \$195 last seen in February 2000. Anyone looking for an opportunity might jump on the 1946-D in MS67. An NGC example's recent auction performance lowered Bid to a new low at \$845, a level last seen in November 1999. Considering that it had a high sight-unseen Bid of \$2,960 only three years ago, there may be some possibilities. Mint State and Proof Type markets are very quiet. Understandably, we don't see anyone willing to "blow out" any of these coins. It is more likely than not that dealers have many customers nearly always willing to buy one or more for their collection. Mercury Dimes maintain a brisk business front as volumes of later date Full Banded PCGS MS65-MS67 examples are still trading sight-unseen for levels, in some cases, by more than 25% over prices paid in weekly retail auctions.

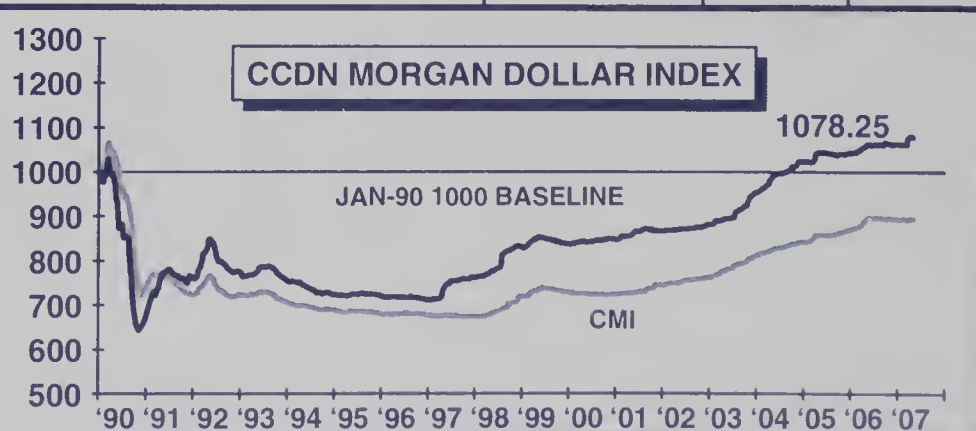

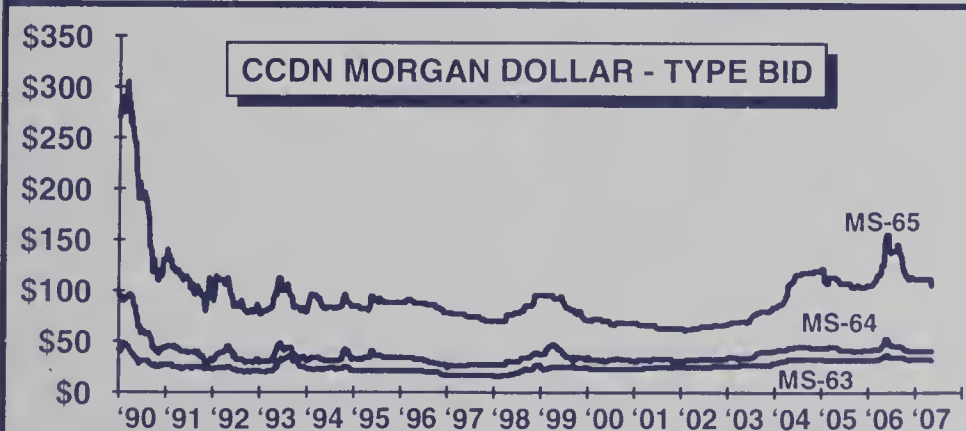

The Mint Gold Type segment is a direct reflection of the volatile activity we see for Gold bullion. The \$700 per ounce plateau is proving to be a difficult obstacle as a 3-day precipitous decline brings Gold to \$665, while Silver slipped to \$13 per ounce. However many analysts still believe that \$700 will be breached in 2007 and some say Gold is going a lot higher. Yet as the market was declining on May 10, Gold proved to have some hidden value for astute sharpshooters. Observant sellers were able to pull the trigger on dealer Bids for quantities of

generic \$20 Libs and Saints just as the electronic networks opened for trading. Certainly as Gold Spot remains impulsive it is a necessity to keep a watchful eye as minor fluctuations can be costly.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective with less reflectivity than the deep-mirror Prooflike.
Bids for P/L's are usually much lower than for DMPL's but command some premium over non-P/L strikes.

Sight-Unseen Market Mixed Pre-Long Beach Sales Up Next

The rare coin market is doing very fine according to many of the dealers that we converse with on a regular basis. These sentiments were confirmed at the Central States Numismatic Society's Convention and auctions associated with the show. Dealers on the bourse actively trading coins, is a definite sign of a healthy market and they still believe that a solid and growing collector base will propel them as we wind our way thru May. They certainly hope that this optimism and collectors enthusiasm is carried over for the rest of the month and through all the Long Beach Expo festivities. A pair of Pre-Long Beach Sales in Beverly Hills, California paves the way for the Expo. Superior will host their Elite sale May 27-28 and Ira & Larry Goldberg will feature their auction May 27-30. Since the demand for better date and quality coins remains strong, these sales are a welcome oasis to dealers and collectors. We have listed a few highlights below.

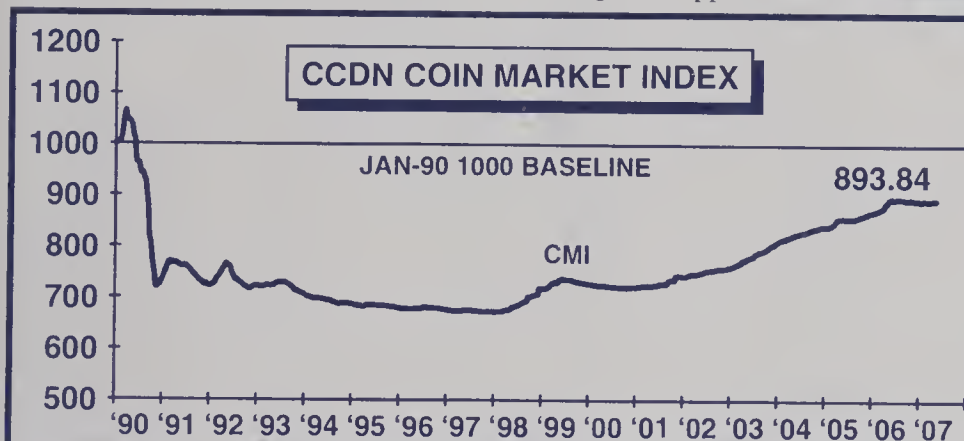

Meanwhile, the sight-unseen market is facilitating the transfer of important funds to dealers as they prepare for the Long Beach Expo and auctions. Coins have been sold very quickly, some at auction and others in electronic transactions via the dealer trading networks. Several examples have sold at auction for prices well below current sight-unseen Bids. Again, this is a situation where someone stands to benefit at the expense of the consignor. Accordingly this week's sight-unseen activity can best be described as mixed. Strong Bids are seen for dozens of Morgan and Peace Silver Dollars; Mint State and Proof Type coins; and Proof 66 and 67 Walking Liberty Halves. In many cases we are seeing double digit increases. As popular series, the Morgan and Peace Dollars have experienced strong demand throughout April and early May and that trend continues. Nearly four dozen collector coins priced below \$750 are the target of this week's higher Bids. Many collectors are actively working on building BU sets and these coins fit their budget as well as their need. They are chasing after slightly better date Morgan and Peace Dollars thru MS64 with an emphasis on MS61 and MS62. These are attractively priced and offer an excellent value and potential, but tough to find in quantity. However, it's a different story when it comes to Mint State Type. Here, one dealer is looking to buy four- and five-figure Capped Bust and

Draped Bust coinage. First year, one-year Type 1796 Draped Bust Quarters top the list. Bids for NGC examples in MS61 thru MS64 are up 41%, 32%, 55% and 61% respectively. This buyer obviously believes that this date represents good value, even at the new higher Bid levels. Who can blame him? With only 22 examples graded by NGC within all those grades, he may have already encountered many of them at one time or another. He probably sees little downside risk, if any. PR63 and PR64 Barber and Liberty Seated with Motto Halves are movers among Proof Type issues. Type is in hot demand by collectors so it isn't a bad thing for dealers to have some of these beauties in their inventory.

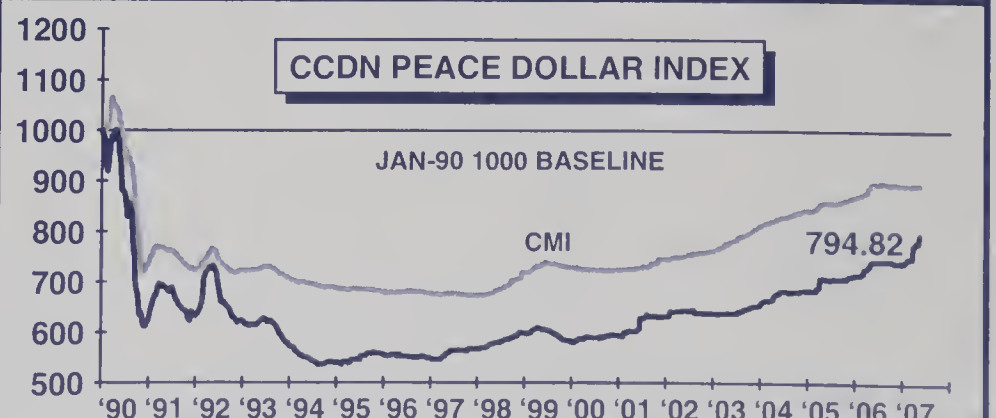

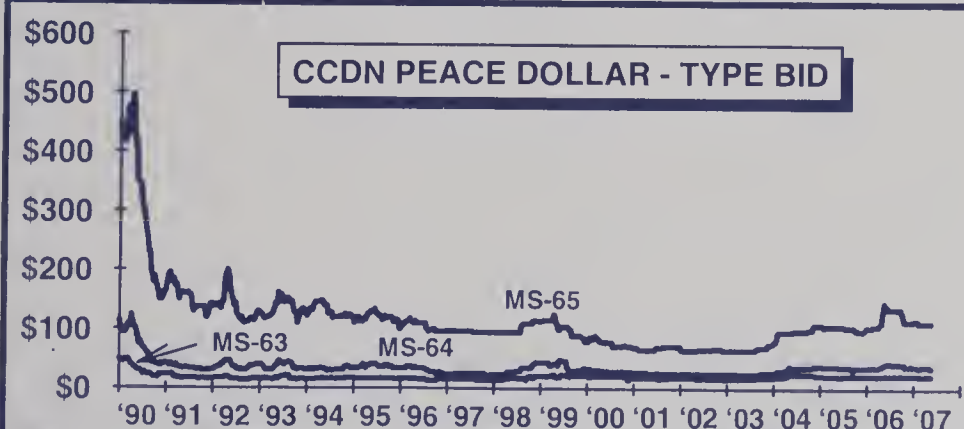

As we alluded to earlier, discounting is also quite evident this week. Dozens of Gem quality Silver and Gold Commems suffered declines as dealers looked to raise some quick funds for the west coast arena. Leading the way, a PCGS MS66 Vancouver Commem sold for only \$545 at auction pushing Bid down by 36

percent, registering a 10-year low. High quality common and near common date Morgan Dollars experienced double digit declines as well. The very common 1881-S in NGC MS67 fell a sharp 31 percent after a poor auction performance. An NGC MS66 1917-S Buffalo Nickel fell 19 percent to \$4,650 Bid from its recent all-time high, held since April 2004. High grade Full Band Mercury Dimes continue to sell at auction for 15% and more below standing sight-unseen Bids. Rewards remain available as these Gems are also still being found in dealer inventories for less than Bid.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

GOLD COMMEMORATIVES

CCDn does not buy/sell any coins whatsoever. CCDn will not recommend any particular dealers. Bid prices are represented as authentic to the CCDn, nevertheless, CCDn implies *no* guarantee whatsoever.

Stack's Auction Rakes In \$4.5 Million Sight-Unseen Bids Soften

Many dealers are optimistic about the state of the rare coin market as May concludes but that optimism isn't as vocal as we heard earlier in the year. There are several reasons for this but we will point to just a few of them. The demands on cash-flow for dealers has been increasing as have the number of transactions. As the price of fuel remains high and the economy a bit weaker so does the likelihood that Joe public will look to cash-in those "rare" coins that have been handed down from generation to generation to his local dealer. Yet over-the-counter sales and deals are only a small portion of that demand for cash. There is still an abundance of want list coins that dealers need to buy for their customers. They also need to refresh inventories regularly; this is just part of business. The John J. Ford, Jr., Part XVIII and the Henry Leon sales by Stack's conducted on May 22nd facilitated a diverse roster allowing acquisition of mainstream collectibles as well as the more esoteric. At its conclusion this varied sale grabbed some \$4.5 million. The star performer being a superb New England "NE" Shilling grading XF that brought a powerful \$414,000.

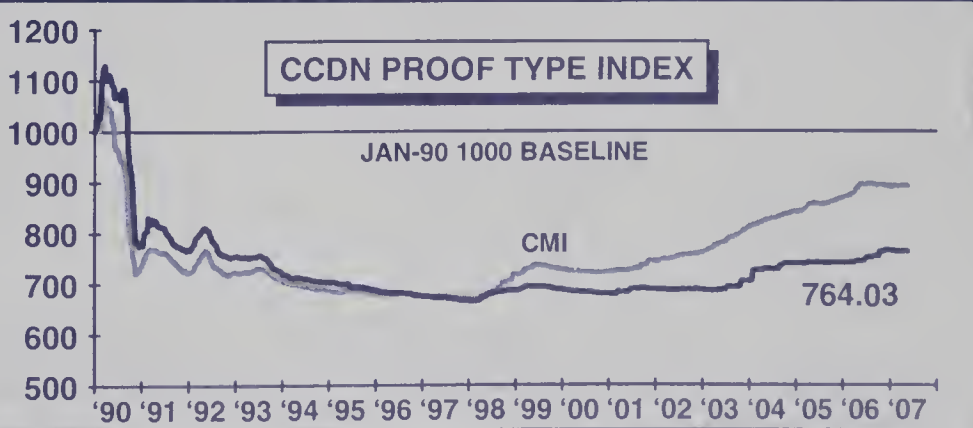

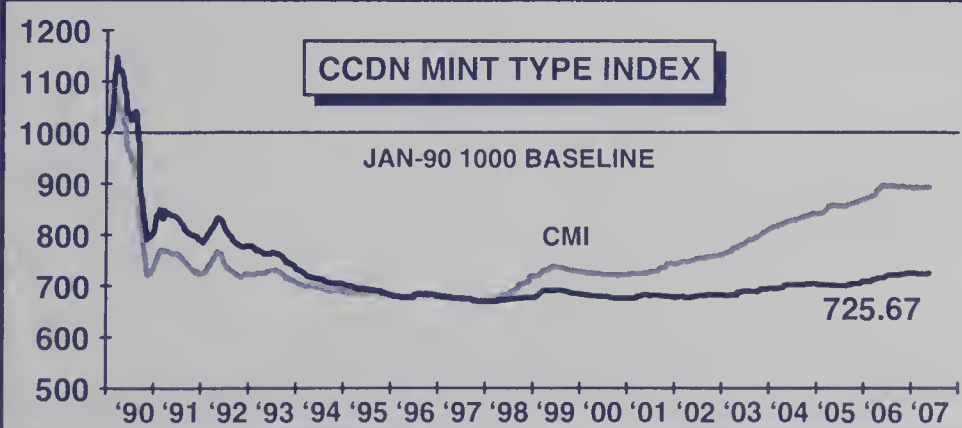

Now as the Long Beach Expo, May 30-June 2 is looming on the horizon dealers will have to dig deep into their coffers to make the trip a successful one. Pre-Long Beach Beverly Hills auctions by Superior and Ira & Larry Goldberg are set to begin May 27. Consequently, additional funds must be immediately available and the sight-unseen market is such an avenue. Yet, the electronic trading networks are quick to register any market weakness and that is evident this week. You will notice that many coins are seen dropping, mostly due to lower auction prices realized and reduced wholesale Asking prices. Weakness is most apparent among the more common dates of each series and denomination. However that doesn't mean that an occasional rarity isn't involved. Discounting is taking place in many series throughout the market and while there are some increases the down side is much more pronounced. Silver Commemoratives exemplifies the market's need for funds. More than 65 minus signs are seen with the majority selling at \$500 or less with several surrendering healthy losses. An NGC MS65 1921 Pilgrim landed

quite hard at Plymouth Rock falling more than 21 percent to \$275 Bid. In all, over a dozen Silver Commems declined by 5 percent or more this week. Gold Commems performed a bit better yet a dozen still lost ground led by a PCGS MS66 \$2½ Sesquicentennial, down more than 13 percent to \$12,750 Bid. One bright spot, the MS64 \$1 1916 McKinley advanced nearly 10 percent to a new sight-unseen Bid of \$900. Morgan Dollars are mixed however the emphasis is still on the negative and we see many trades occurring below standing sight-unseen Bids. Demand is observed for select dates in MS63 and MS64 with mostly those below \$1,000 that are slightly higher. Conversely a larger number are declining with greater percentages led by a 23 percent drop of a PCGS MS66 1884 to \$400 Bid. A pair of "toned" Peace Dollars brought poor results at auction, including a PCGS MS66 1925, the 2nd most common date in this grade. Another common date, NGC MS65 1923 dropped 10 percent to \$370, although a quick look in the *Market* column reveals that this coin sold at auction for only \$300. Mint State Capped Bust Dimes inched higher but Barber Dimes are soft in MS64 thru MS66. An NGC MS64 Type III 3-Cent Silver suffered a 12 percent hit, the top Mint State Type percentage loser. Proof Type issues are also lower with an NGC PR66 Matte Proof Buffalo Nickel sustaining the greatest decrease at 15 percent. Gold Type remains soft, reflecting the general weakness seen in the Gold bullion markets. All Gold denominations are down with an NGC MS66 \$3 Princess at \$19,000 Bid, off 15 percent. This occurred after the most common date, an 1878 was scalped at auction.

What's the story with modern Proof Singles? We see repeated sight-unseen Bids week-after-week for Gem Proof Mercury Dimes, Washington Quarters, Walkers and Franklin Halves. Yet weekly and bi-weekly auction prices realized are consistently below these levels. Sight-Unseen buyers have remained visible for some time, even looking for quantity, often up to 10 pieces in each grade. See for yourself, as nearly 4 dozen examples within the Proof Singles segment have higher published sight-unseen Bids than prices realized at auction as reported in this week's *Market* columns.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks. sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PCGS DMPL and NGC DPL Bids are for fully Deep Mirror Prooflike coins. Bids for PCGS PL and NGC PL dollars will be listed monthly in a supplemental insert. CDN (*Greysheet*) Bids have always represented fully, deep mirror prooflike specimens.

CCDn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

Walkers And Dollars Surge Ahead California Auctions At \$15.1 Million & Counting

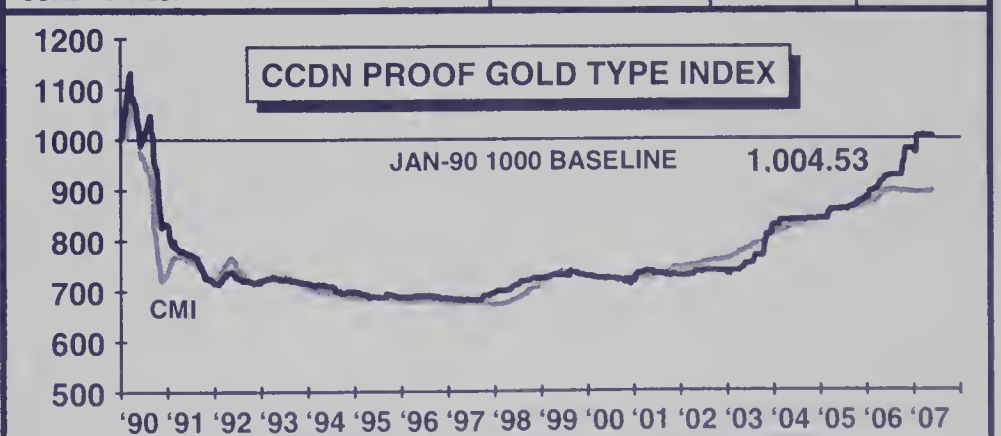

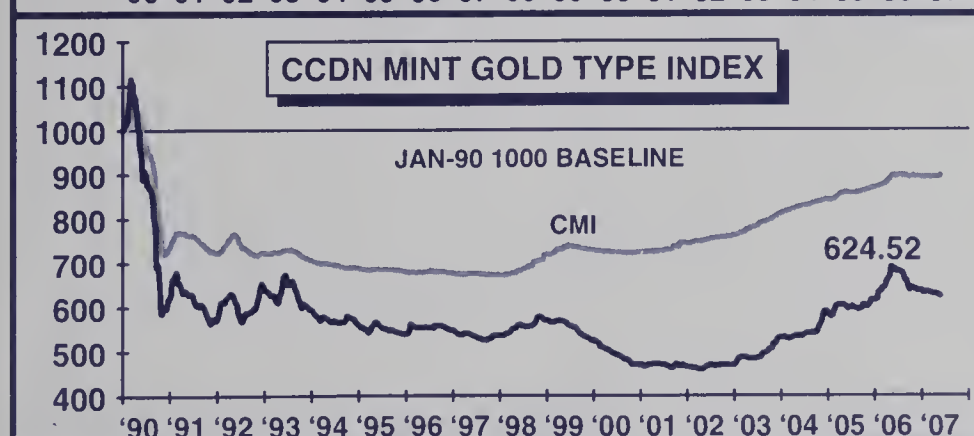

Set-up day for the Long Beach Exposition began with most dealers feeling quite optimistic. That's because they generally agree that the rare coin market is doing fine overall despite some lingering sluggishness. May gave numismatic aficionados plenty of reason to be confident as it was a particularly active one with many coins, both rarities and high quality Type changing hands in rapid fashion. Dealers are also encouraged by the tremendous strength of demand seen in the Beverly Hills sales and the Irvine auction, bringing the total to more than \$13.6 million for all Southern California auctions prior to the Long Beach extravaganza. Superior grabbed \$1.6 million May 27-28 while the lion's share went to Ira and Larry Goldberg's May 27-30 auction at \$11 million. Bowers and Merena's Collectors Choice Auction May 30 realized nearly \$1 million in Irvine. The Heritage Long Beach Sale is still in progress as we go to press and has already reeled in over \$1.5 million during the first session. Today's auction success stories are a testament to the bull market's continued momentum. Consequently dealers know that the market for coins that meet the strict requirements from their customers is solid. Unfortunately the initial reaction of dealers during set-up at Long Beach was rather cool. One said, "It seems a little slow." This observation was soon trumpeted by many others that we spoke with on that day. Another buyer said he wasn't able to do any business because he can't find the right coins and when he does, "Price and quality don't match." Yet, none of these dealers were willing to back off their favorable overall opinion of the coin market. Another commented that a lot of business had already been consummated in their hotel rooms prior to set-up. There is also plenty of business waiting to be transacted because the powerful demand for quality and rare coins is evident as May ends and June begins. What coins do dealers desperately need to find? One Gold specialist responded with what all dealers generally tell us, that he just wants original coins that are choice for the grade and possess attractive eye appeal.

The sight-unseen market though mixed at best last week is surging with activity this go around and the emphasis is definitely on the plus side. Today's

powerful and rejuvenated demand for coins is being experienced in the popular Morgan and Peace Dollar series, as well as with the Walking Liberty Half Dollars. Morgan Dollars find Bidders eager to buy dozens of better dates in grades from MS61 thru MS64. These are the dates that collectors are willing to buy and they are also a nice addition to one's inventory. This sight-unseen Bidder believes that they also represent an excellent value and would be happy to buy them in quantity. Ten Morgans are boasting increases of 20 percent or more with PCGS and NGC examples of 1892-CC in MS61 and MS62 leading the way. Consider that this popular "CC" this week alone is up \$200 in MS61 and \$250 in MS62 sight-unseen. However the top percentage gain was turned in by the semi-key 1896-S, jumping \$360 or 32 percent in NGC MS62 at \$1,460 Bid. The majority of the dates needed are priced below \$1,500 so these coins are quite affordable to many a collector. Also, ANACS demand added another dozen plus increases as well. Peace Dollars are experiencing similar Bidder fever as slightly better dates grading MS61 thru MS64 advance. Check out PCGS and NGC MS64 San Francisco strength as 1923-S, 1925-S and 1927-S jumped \$40, \$110 and \$60 respectively while the key 1934-S in MS62 added \$100. Walking Liberty Half Dollars scored a significant number of plus signs too. In a lot of respects this strength is incredibly strong as nearly 300 issues raced higher this week. Double-digit gains are commonplace with 16 examples enjoying 30 percent or better percentage moves. As the majority of the dates being sought-after Bid for \$200 or less these smaller priced coins are ripe with large percentage increases. For example, a 1939-S Walker in PCGS and NGC MS61 and MS62 jumped an amazing \$31 and \$33 respectively to \$106 and \$118 Bid. ANACS Walkers chimed-in as well with a strong showing as dealers seek good value. A dozen Mercury Dimes were hit this week as sight-unseen Bids were pulled, closing the window of opportunity over recent weeks for some astute players. Common date Gem Full Band examples succumbed immediately as auction prices realized dictated. Silver Commems are mixed while Proof and Mint State Type remain basically quiet. However Gold Type has a pulse with Gold Spot appearing to temporarily stabilize at the \$660 per ounce level.

The ICG Seven Day Guarantee is a service award you earn if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. If you do not receive a turnaround time of eight days, ICG will send you a certificate good for a free 20 coin economy submission. Guarantee only applies to regular U.S. coin submissions which excludes varieties, errors, COMEX, and other special coins. *Offer ends 1/1/08. Excludes weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coin until the day ICG ships them back. Nothing in this offer is intended to constitute an offer of insurance or any other financial product. For more information, please visit www.icgcoin.com or call 877-221-4424.

NGC. GSA Dollars. Ike Dollars. The Perfect Companions.

*Just one of the ways
our rare commitment is
redefining the hobby*

NGC Grades GSA Soft Pack and U.S. Mint Sealed Ike Dollars in Original Issue Packaging

The perfect companion piece to NGC's certification offering for similar coins in rigid GSA and US Mint packaging, NGC now grades and encapsulates GSA Soft Pack and "Blue Ikes" while still in their original holders of issue.

In order to preserve the integrity and pedigree of their original holders, the entire soft pack holder is sealed in a semi-rigid clear plastic case with an oversize label across the top that includes necessary attribution information, the coin's pedigree, and NGC-certified grade. The case developed for this service is

made from the same high-quality, inert materials collectors have come to expect from NGC, and it is thoroughly sealed to guard against environmental hazards and contaminants. These coins are eligible for inclusion in the NGC Registry, and will appear in the NGC Census.

NGC is proud to be an innovator and market leader in producing new products and services that benefit the collector and numismatic marketplace. For more information and for submission instructions, visit **NGCcoin.com**.

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XXII No. 23

Bust Type Roars

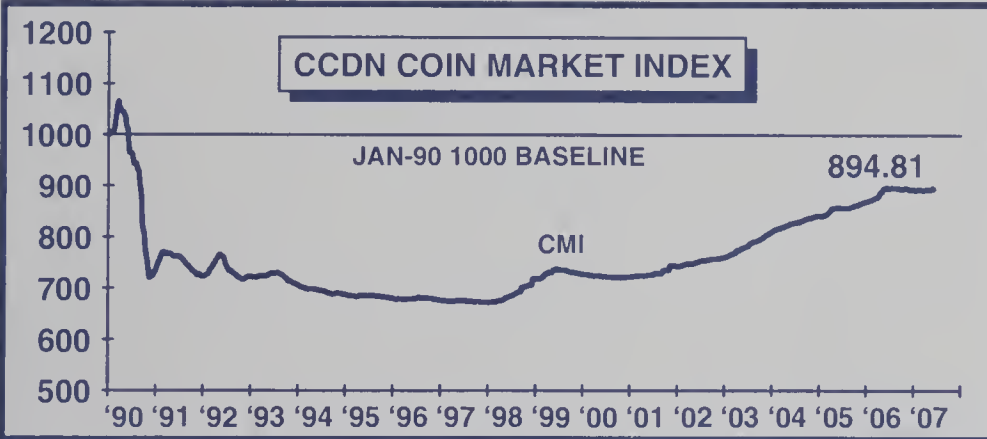

Expendable Material Jettisoned

The Long Beach Exposition confirmed to the majority of the dealers in attendance that the rare coin market is very much a blaze at current levels while catering to strong demand. Many of the same participants left California rather successful albeit the strong appetite for coins was certainly not totally satisfied. Want lists are still omnipresent echoing the needs of many a collector. Dealers are obliged to scour all avenues, hunting for those prized coins and they are more than willing to increase Bid for select material. This is how June is dawning and dealers aspire that this optimism will be retained later in the month as summer officially begins. More than \$22 million changed hands at public auctions during the end of May and the first few days of June. Successful buyers will soon be hearing the auction piper at their door with invoices in hand. Now the need to raise additional funds is on their immediate agenda. This is also true for the many that have spent more than expected on the bourse at the Expo as well. So it's not unusual to see all the minus signs appearing in this week's sight-unseen market as dealers unload some coins, paving the way to a better cash flow position.

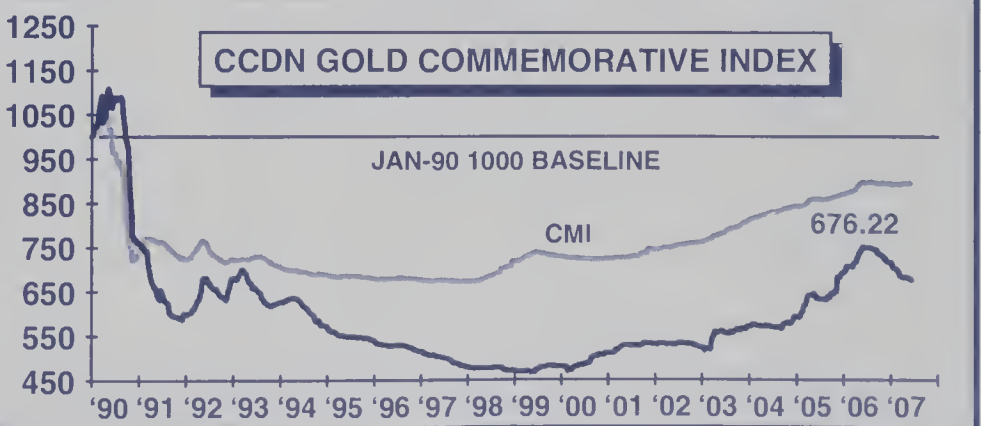

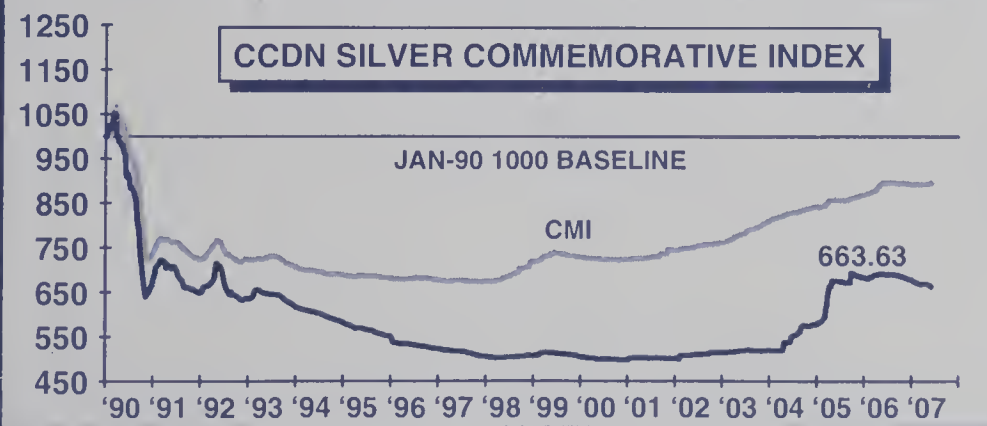

Some astute dealers are also using the sight-unseen marketplace to possibly pick up a few of the better coins that everyone is looking for. Last week buyers stepped up in a decisive way for Walkers and Dollars. This week we find additional dealers taking the initiative, raising their sight-unseen offers in an attempt to buy much needed material. Many of these dealers realize that most coins are of average quality that are bought sight-unseen through the trading networks. If a horribly over-graded or problem coin is acquired in this venue the grading service in question is often the first turned to for recourse. This practice may eventually result in an improvement in the overall quality of material on the market. Consider this week's increased sight-unseen Bids for early coinage as a step in this direction. Flowing Hair Half Dollars always seem to be in demand and now NGC MS61 and MS62 examples are higher. Still, the real story is found among the Draped Bust and Capped Bust series. Draped Bust Dimes, Quarters and Half Dollars are a huge target this week, several for their initial year status. Check out the increases among the Capped Bust Half Dimes thru Half Dollars, including the Reeded Edge variety. This tremendous demand for early Type has been evident throughout 2007 and these coins are still facing serious demand as we approach summer. Percentage increases are rather modest but remem-

ber that these early coins are being sought-after **sight-unseen** with more than 70 participating. Large Size Capped Bust Quarters in PCGS MS61 are showing the largest increase to \$1,620 Bid. Even though only 17 have been graded at this level it's still imperative to have one for a nice BU Type set. Certainly this multitude of raised offerings should pry a few prime examples from their hiding places.

There are a few other areas with plus signs but primarily we witness discounting taking place. Silver Commems, Gold Commems, Morgan and Peace Dollars have all been flooding the auction market. In many instances these are not the toughest examples to find from their respective series. Accordingly, dealers know that these are the issues that are expendable and can be found easily once again when the need beckons. A perfect illustration is an NGC MS66 York Commem that sold in a retail auction for \$299, rendering a lower sight-unseen Bid. NGC and PCGS have graded 1,112 and 1,275 in MS66 and another 353 and 476 in MS67 respectively so a dealer won't have too much difficulty replacing this Commem. The lone bright spot is the 1915-S \$2½ Pan-Pac in MS64, jumping more than 5 percent to a higher sight-unseen Bid of \$4,500. Mint State Morgan Dollars and Prooflikes are a bit soft although savvy buyers continue to search for value. Check out the bargain you would have received if you had bought the NGC MS64 1928-S Peace Dollar at auction last week for only \$402 (30 percent below Bid). A **sight-unseen** Bidder is still looking for up to three of them at \$580. Gold Type is also somewhat weak as Spot tries to find support after reports of European Central Bank sales of a large quantity of Gold. Three-Dollar Princesses led Gold Type lower with the PCGS MS64 example losing 13 percent at \$5,700 Bid. Buffalo Nickels appear battle weary as many sought lower ground as auctions took their toll. More than 20 Gem quality examples including some better dates were dismissed at reduced levels. For example, the popular and sought-after 1913-D Type 2 lost more than 10 percent after an NGC MS67 realized only \$5,175 at auction. NGC has only certified 6 at this level with just one finer. A similar scenario is seen among Full Band Mercury Dimes although the coins declining are mostly Bid \$750 or less. Walkers are mixed, with declining issues showing a much stronger percentage loss than those that posted slightly higher Bids. Buffalo Nickel Proofs scored strong gains in sharp contrast to its business strike cousins. The 1937 Proofs were the best performers as PR66 and PR67 quality examples starred.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers. are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PROOFLIKE MORGAN DOLLARS

P.L. Dollars may be semi-reflective, with less reflectivity than the top of most Proof Dollars. Bids for P.L.s are usually much lower than for D.M.P.s, but should not be compared to non-P.L. strikes.

We will Pre-Sort your
Mailing Labels to get
You the Best Rate**

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

2007 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class order or Presorted for Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

YES, I want to order mailing labels averaging 5,000+ names from the 2007 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____signature

Every Numismatic Library needs copies of the latest addition to the
COIN DEALER newsletter family of publications:

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - \$2.50 each • 11-25 issues - \$2.00 each • 26 & over - \$1.50 each

Or, you can purchase *complete sets* of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter (Greysheet)**
 from June 14, 1963 to December 22, 2006, now includes 2,220 issues.
 At \$1.50 each this would normally cost \$3,330, but a complete set
 is only \$2,250.

Complete set of the monthly **CDN Monthly Supplement**
 (formerly the Monthly Summary)
 from August 1976 to December 2006, now includes 365 issues. At \$1.50
 each this would normally cost \$547.50, but a complete set is only ... \$425.

Complete set of the **CDN Quarterlies**
 from January 1992, to December 2006, now includes 180 issues, a
 complete set is only \$200.

Combined weekly **CDN (Greysheet), Monthly Supplement & Quarterlies**
 now includes 2,765 issues, and extra savings at only \$2,750.

Complete set of the weekly **Certified Coin Dealer newsletter (Bluesheet)**
 from August 22, 1986 to December 22, 2006, now includes 998 issues.
 At \$1.50 each this would normally cost \$1,497, but a complete set
 is only \$1,025.

Complete set of the monthly **Currency Dealer newsletter (Greensheet)**
 from September 1980 to December 2006, now includes 316 issues.
 At \$1.50 each this would normally cost \$474, but a complete set
 is only \$375.

4,079
 Newsletters

For the most complete numismatic pricing library possible, you may order a
COMPLETE set of all of the Back Issues listed above for only **\$3,775.**

MidAmerica Coin Expo, Auction Up Next

Early Coinage Remains Hot

Now that the Long Beach Expo is history, many dealers are still on the road as the first show of the summer season will find most attending the MidAmerica Coin Expo. This Chicago area show is a popular venue and buyers hope heated business will ensue. Yet in order to be successful they will also need to replicate the same preparation for this event as they did for Long Beach. However, as cash flow positions will be sorely tested almost immediately any outstanding debts from southern California and related auctions need to be settled up pronto. Dealers know in order to take advantage of whatever potential deals come their way that securing additional capital is a must to compete at the Rosemont, Illinois show and auction. Opportunities abound as Stack's will host the Dr. Tory Prestera collection sale June 20-21 while the expo is scheduled for June 21-24. Immediately following this show and auction, dealers will trek to Maryland for the Bowers and Merena auction June 28-29 followed by the Baltimore Coin and Currency Convention June 29-July 1.

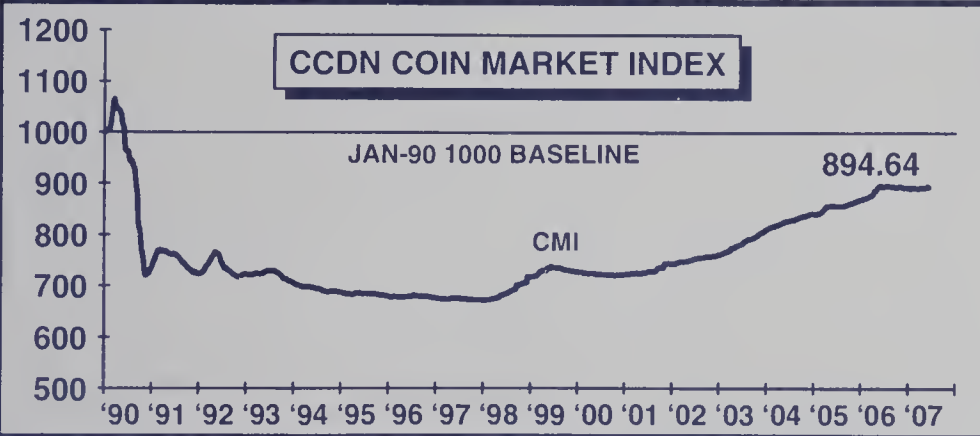

Raising cash in a hurry usually means that the sight-unseen market is targeted heavily. Dealers know that they only need to hit the Bid, sight-unseen, and the transaction is completed. Obviously this is a handy way to unload some generic material, and for buyers it is a nice way to grab a bargain.

That's why this week's sight-unseen market is similar to last week's. Weakness is following Silver Commemoratives, Gold Commems, Morgan Dollars, Mercury Dimes, and \$20 Saint-Gaudens. The percentage declines among Mercury Dimes is most conspicuous. After this series lost the support of an aggressive Bidder prices have fallen precipitously before finding additional interest. Mostly PCGS Full Banded Mercury Dimes were the hardest hit this week. For example, a PCGS MS65FB 1936-S Dime sold at auction for only \$57 forcing a new sight-unseen Bid. This represents nearly a 23 percent decline from last week's \$70 Bid. We know that these Gems are available as just over 1,000 have received this high grade from PCGS. The lone Full Band NGC Dime suffered a 20 percent decline when an NGC MS67FB 1944-S sold weakly at auction triggering a new \$82 sight-unseen Bid despite its being in a Superb Gem grade. Remember they are available as NGC has certified and encapsulated 210 and PCGS 202 in that lofty condition. It appears that generic and semi-key \$20 Saint-Gaudens share similar weakness seen in this popular series. Dealers know that selling some of these jewels is an excellent way to raise some serious funds. They also appreciate that these coins are found without

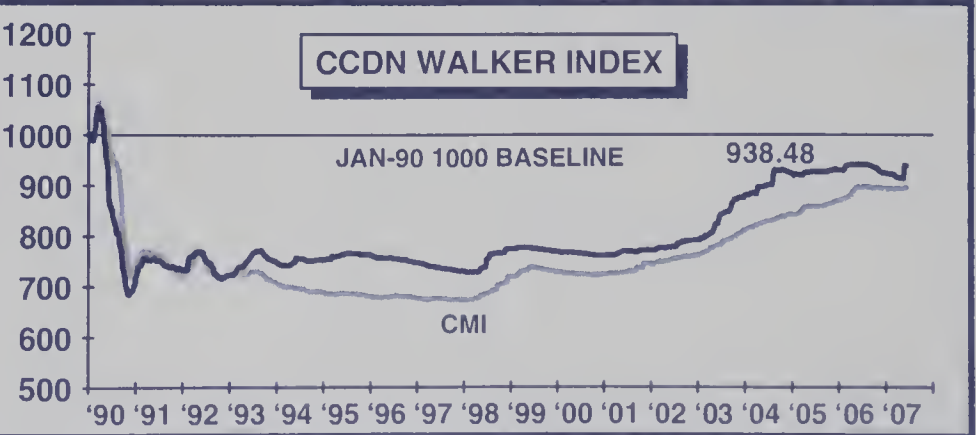

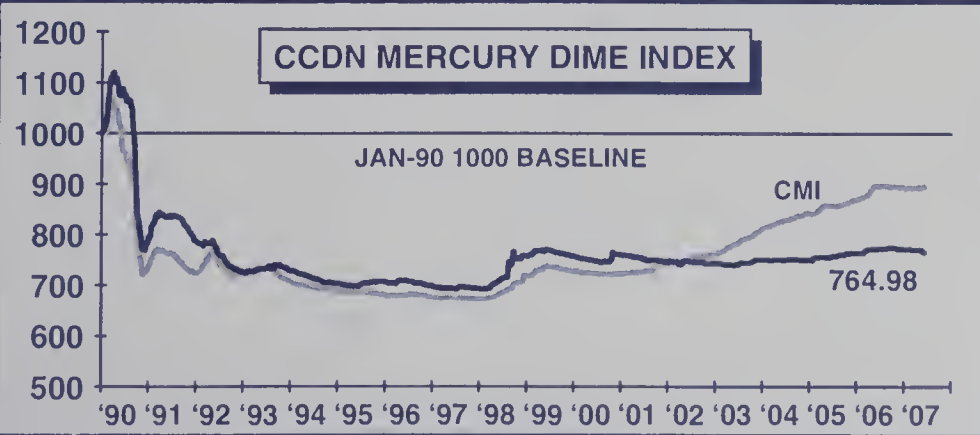

too much difficulty when the need presents itself. A PCGS MS65 1913-D Saint surrendered more than 11 percent from its last reporting following its poor auction performance. The common dates are being sold because Gold bullion has been rather weak of late, failing to generate much steam above \$650 per ounce. Common date Saints and Type 3 \$20 Liberties situated in lower Mint State grades are particularly vulnerable. Silver Commems are mixed. However the increases are quite meager while those suffering losses are more pronounced. A PCGS MS65 Robinson-Arkansas lost 13 percent while a PCGS MS66 Roanoke dropped more than 10 percent. A few Gold Commems were slightly lower after being offered up as fund raisers. Several better than common and common Morgans retreated as auctions and wholesale offerings take their toll.

Conversely early Silver denominations featuring the Flowing Hair, Draped Bust and Capped Bust designs are awash in strong demand that continues to chase these elusive coins. That's why the Mint State Type category is blazing this week. The greatest strength found in today's market are for those rare coins that are original, problem-free surfaces and exhibit exceptional eye appeal. These are the specimens that find willing buyers at very strong levels. Dealers have repeated to us that the demand for Flowing Hair and Bust coinage is "unbelievably" strong and it is exacerbated by the lack of supply necessary to satisfy this demand. Like last week's Bust coinage gains, the percentage increase in Bid may be small but the willingness to buy these coins' sight-unseen goes a long way in explaining the seriousness of the demand. Increases are found in Mint State grades from MS61 thru MS67 for denominations from Half Dimes thru Half Dollars. We know that dealers would be absolutely pleased to be able to capture any of these coins at these new higher levels. Franklin Half Dollars are also enjoying some support after weeks of much indifference. Double-digit increases are being enjoyed in this volatile series but it is important to remember that these advances are only for coins below \$100.

Counterfeit Trade Dollars among other designs originating from China have been a big problem for dealers for quite some time. Now the problem is even bigger as several eBay auctions and sellers originating from Beijing have recently been shut down for offering coins, allegedly, in counterfeit ANACS slabs. The auctions in question displayed images of the smaller white ANACS slabs that are currently only used to encapsulate problem coins.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

NATIONAL BANK NOTES

While there is a huge social stigma associated with being a sex addict, it is important to understand that this is a medical condition, not a character flaw. There is no shame in seeking help for this condition, just as there is no shame in seeking help for any other medical condition. In fact, seeking help is a sign of strength and courage. There are many resources available to help you understand and manage your condition, and you can find support groups and therapists who specialize in treating sex addiction. Remember, you are not alone, and there is hope for a better future.

Opportunities Blowing Near Chicago Baltimore On The Horizon

Most dealers are already busy conducting business at the MidAmerica Coin Expo in Rosemont, Illinois. Yet as their collective inventories are running quite lean they are hoping that the collector rich Chicago area may blow in some collectors looking to sell. While the demand is still blazing hot there continues to be a substantial shortage of solid collector coins. Some of this material was sold at auction June 12 in Lenexa, when Lyn Knight realized over \$420K in his inaugural rare coin sale. The first session of the Stack's, Dr. Tory Prestera sale is also in the books as collectors and dealers looked to fill some holes and lighten delinquent want lists. Realizing nearly \$1.8 million, spirited Bidding came from those in attendance and on the internet as battles ensued for rare and esoteric trophies. The competition for these types of coins has been so strong that those in possession of such material are definitely in the driver's seat. Fresh, problem-free coins are always realizing very strong Bids at public auction and on the bourse at shows all around the country. All of the key and better dates of each series are maintaining heightened demand, too. Accordingly it is tough to buy these coins at any venue because sellers often try to hold out for tremendous money. On the other hand when a dealer is finally able to successfully complete a transaction of a select coin an additional problem arises. That is because the dealer usually has more than just one or two customers for the same purchase. Selling to one customer often disappoints another. No rest for the weary as dealers will quickly trek east to the Baltimore Coin and Currency Convention in Maryland June 29-July 1. The June 2007 Baltimore Auction by Bowers and Merena is scheduled for June 28-29.

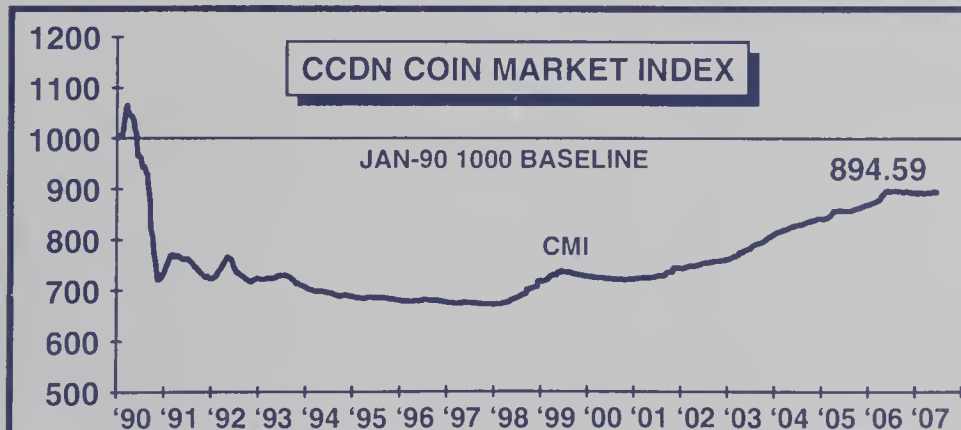

This week's sight-unseen market is rather strong considering the growing need for liquidity. The usual suspects are not letting us down though, as Silver and Gold Commemoratives continue to trade for lower levels. An NGC MS64 1892 Columbian Expo-

sition and a PCGS MS65 1934-D Oregon Trail led a small group of Silver Commems down the slide with double-digit declines. Yet a larger number of Silver Commems were able to generate some plus signs. Although only marginally higher it does point to some buyers trying to take advantage of the recent sharp declines. Gem quality Gold Commems are still on the skids as dealers try to make better use of their money. McKinley Dollars have been targeted for discounting as the 1903, 1916 and 1917 issues bearing his effigy suffered decreases. Morgan Dollars, though mixed have seen interest growing steadily forcing higher Bids, even for sight-unseen examples. Marginal declines appear to be focused on four-figure Morgans as funds are needed. This week's Market column reveals opportunities and casualties. The consignor may not be pleased but those paying attention probably noticed 1878-S examples graded by NGC that sold at auction in MS63 thru MS66. Granted these coins were quite unsightly but they each sold for 17 percent or more below sight-unseen Bid. After a few weeks of solid demand trying to buy Mint State Type Bust coinage

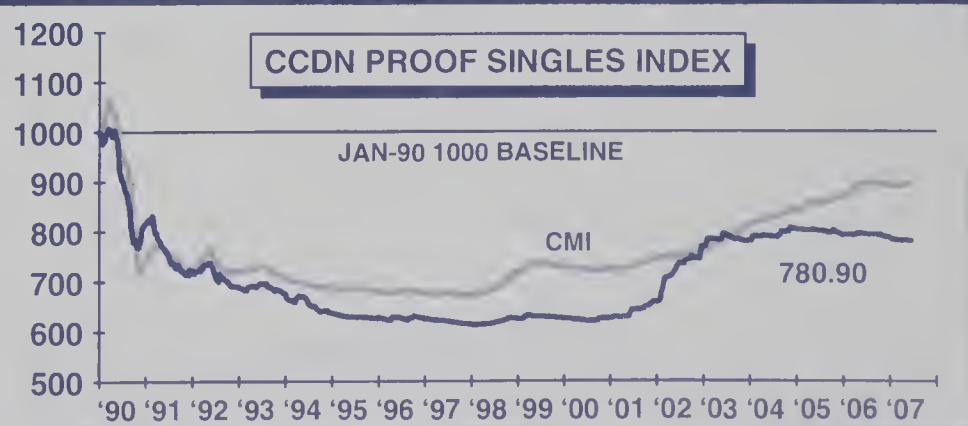

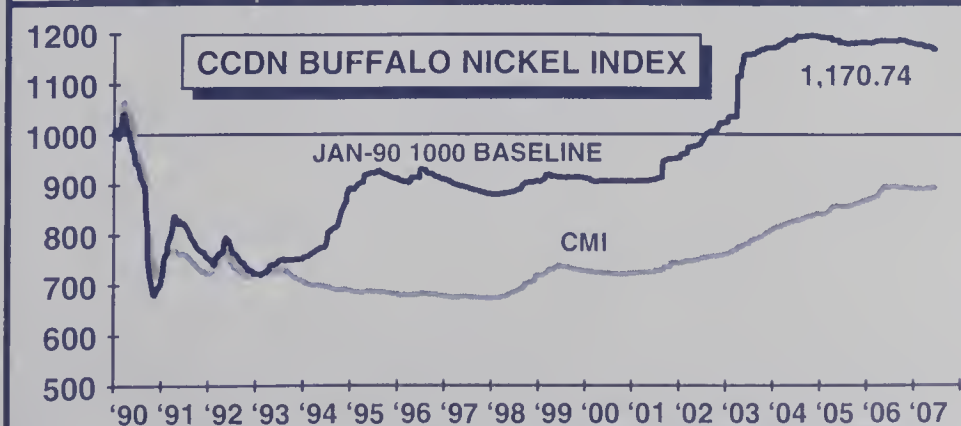

we continue to find some additional interest. Dealers haven't thrown in the towel yet as they have increased their sight-unseen Bids. Draped Bust, Small Eagle Dimes (1796-1797) are sought-after in PCGS MS61 thru MS63, enjoying small Bid increases. This two-year Type is extremely popular with collectors but difficult to find. PCGS has only encapsulated 33 combined with 6, 17 and 10 examples listed for the MS61 thru MS63 two-year Type. However, it just as easily could be a one-year Type as the 1797 Dimes are virtually non-existent. So despite the slight Bid increases, it still won't be too easy to secure one of these early federal beauties.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity (including nationally reported sight unseen Bids, Asks, Trades, prior levels and auction prices). The CCDN may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported Bid or by Asks. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly their own. The dealer, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading information and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher exercises due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guarantee that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin may display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

NGC's coin holder has taken on
a new dimension — *the edge!*

Introducing
the new **EdgeView™ Holder**

*EdgeView™ perfectly displays
the groundbreaking
edge design of the new
Presidential \$1 Coin series.*

The US Mint's hotly anticipated Presidential \$1 Coin series, with its groundbreaking edge-incused inscriptions of mint year, mint mark, and national motto, arrived in February. And NGC's new EdgeView™ holder gives you the perfect way to inaugurate them.

All Presidential \$1 coins submitted to NGC are automatically encapsulated in an EdgeView Holder.

EdgeView's unique pronged core insert allows you to view your coin's edge via four large surrounding windows, all while providing you with NGC's high standard of preservation and presentation. Think of it as getting the uniform size, attractive appearance, quality seal, and durable tamper-proof casing you expect from NGC — with an edge.

***Give your Presidential \$1 coins a new
dimension with EdgeView.***

Dealers Hope Baltimore Is More Their Type Generic Morgan And Peace Dollars Rally

Dealers maintain a hectic schedule as summer begins. Whether traveling, attending coin shows, viewing auction lots, or attending to the rigors of everyday business concerns make for long days and nights. Certainly not being able to buy all the coins they needed earlier this year has added to their urgency. Yet as the 2nd half of the 2007 campaign begins, dealers are still happy to be facing these obstacles since they represent significant demand. Indeed, the rare coin market is buzzing with action which reflects in their businesses bottom line. While profitable for most, this rigorous activity may be taking its toll on some, especially those who participated in Rosemont and have also made the trek to Maryland for the Baltimore Coin & Currency Convention, in progress as we go to press. Though battle weary and bleary eyed, dealers will be doing the usual — walking the bourse and making their appearance at the auction by Bowers & Merena. As unfulfilled want lists expand, competition will be fierce for those coins that are good fits for customers and for barren inventories. Almost in unison, dealers have told us that it just seems to get tougher and tougher to satisfy the ongoing demand. After all, the supply of true collector coins is a finite supply, and the legions of new and veteran enthusiasts continue to clamor for more. It's this **unrelenting demand** that keeps the bull market in place as July appears.

While the sight-unseen market is reflecting today's overall fast-paced activity and need for cash, it is rather quiet this week as most have already completed their electronic transactions prior to Baltimore. As we wrote, demand for problem-free coins is very strong, so dealers need to have ready cash available to act on any deal that arrives in their vicinity. Attractive coins that are original and boast excitingly clean surfaces often command colossal Bids today, too. Dealers utilizing the sight-unseen market as a vehicle to obtain funds quickly can also unload some coins that may only be average or a tad below for the grade. Opportunity exists as well for those able to capitalize on coins that sell at auction or are being offered wholesale at levels below legitimate sight-unseen levels. It is also the scene where dealers can benefit by buying selected coins at very attractive price levels.

We are seeing some of that bargain hunting in this report as most generic Morgans inch higher in MS63, MS64 and MS66, though MS65 commoners have drifted to \$104 Bid.

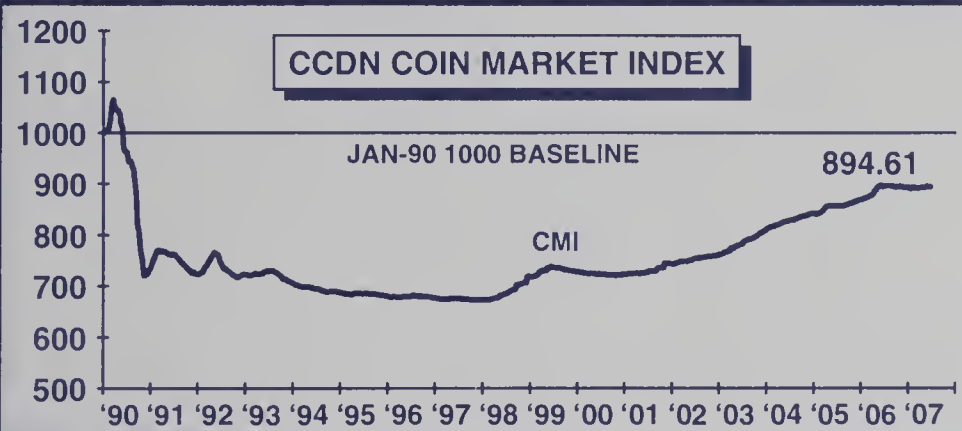

Common date Peace Dollars are impressive, as Gems climbed nearly 10 percent for NGC MS65 examples. As a matter of reference, take a look at the *CCDN Peace Dollar Index* over the last year. What began in late June of 2006 at approximately 742, significantly rose to over 800 today. The last time the index was this high was August 24th, 1990, when Peace Dollars in PCGS MS65 were Bid \$232.

On the other hand, we still see multiple coins selling for well below their sight-unseen Bids. Softer prices realized at public auction are the main culprit in this corner. For example, a handful of Morgans sold for 10 percent or more below Bid. An NGC MS64 1904 Dollar realized \$414, nearly 14 percent below current Bid. Further, an NGC MS62 1886-S at \$233

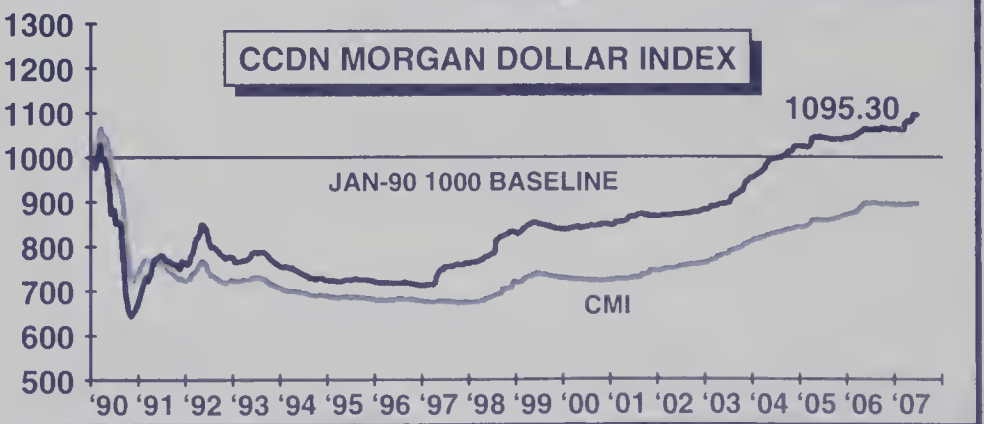

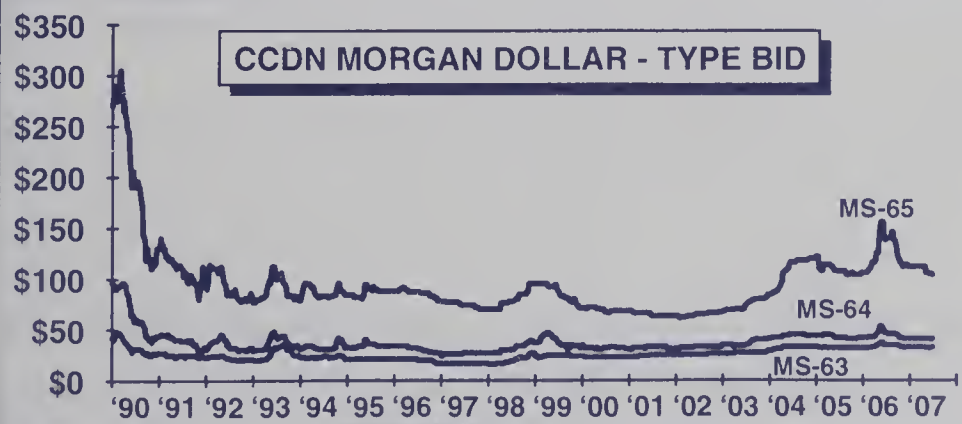

was more than 10 percent below its current sight-unseen Bid. As yet another example, an NGC MS64 1923-S Peace Dollar realized only \$160 at auction in the face of a 23 percent higher sight-unseen Bid sitting at \$210. This Bidder is looking for up to 5 examples at that price. Sight-unseen weakness is also apparent among some minor coinage. Two common date Gem 1938-D Buffalo Nickels fell sharply below Bid as a PCGS MS66 and MS67 succumbed to poor auction results. The MS66 realized 20 percent below while the MS67 fetched 12 percent below. A few Gem Mercury Dimes lost ground, highlighted by the 10 percent drop of an NGC MS65 1924-D now at

\$600 Bid. Interestingly, the Full Band 1924-D graded NGC MS65 outnumbers their **non** Full Band brothers 5 to 1. A few Gem Walking Liberty Half Dollars hit the skids after weak auction results. Leading the way, a lower wholesale Asking price for an NGC MS65 1943-S at \$400 represents a more than 15 percent decline.

Type is still very much in vogue today though, as we don't see many dealers willing to abandon their Mint State or Proof Type Bids. Plenty of customers are just waiting to buy, and so dealers will surely be trying to conjure up Type, among other needs, while in Baltimore. Bids are rather strong for Gold Type despite the weakness and volatility in the bullion markets. The majority of elevated Bids are chasing after rarity anyway. Type I and Type III Gold Dollars are advancing in MS61 with Type III hitting 13 percent increases for both PCGS and NGC. Gem \$5 and \$10 with Motto Gold is getting a boost, as MS66 NGC examples of the \$5 denomination report a jump of over 9 percent.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

The Seven Day Guarantee™ is a service provided by ICG. It is not a guarantee of a specific turnaround time. ICG will grade double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. The guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, and C.O.N.E. A. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer constitutes an offer of insurance or any other financial product. ICG is not a financial institution. ICG is a coin grading and submission firm.

\$1.5 Million Exchanged For Half Disme ANACS & ICG Attract Higher Bids

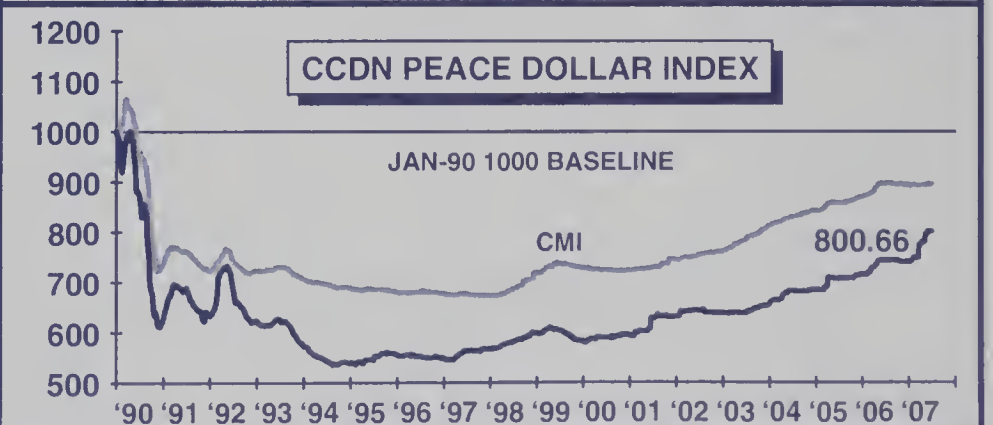

Currently, the rare coin market is experiencing the undivided attention of dealers and collectors as both vie for today's ever-shrinking crop of quality rare coins. As this demand flourishes in the face of a declining supply, it is easy to understand why prices skyrocket when an interesting rarity becomes available. Such fireworks were certainly observed on July 5, when it was formally announced that a 1792 Half Disme changed hands for a record \$1.5 million. The Cardinal Collection Educational Foundation of Sunnyvale, California is the new, happy owner of this NGC MS68 rainbow-toned beauty. Rare Coin Wholesalers of Dana Point, CA sold the rarity to this foundation which supports research and publications on early American money. This type of sale only reinforces the fact that dealers must always be ready financially to capitalize when a lucrative situation presents itself. Dealers returning from the Baltimore Coin and Currency Convention found that this optimism is still present throughout the market. Unfortunately, they were unable to locate a sufficient number of coins needed for their inventories and customers. It is a case where nearly everyone is on the same page, so when an interesting coin appears in a dealer's showcase or at public auction the excitement builds, along with the Asking price. This powerful demand for no-problem, original coins that also possess a fair share of eye appeal is more than capable of producing its own pyrotechnic display when such material becomes available.

Non-stop show and auction schedules place plenty of additional pressure on would-be buyers heading south next week, as the Summer FUN Show in West Palm Beach, Florida is on tap July 12-14. In addition to the new show, Heritage will host a signature auction in the sunshine state. Scotsman will round out the heated summer schedule later this month with their Midwest Summer Sale on July 27, this in conjunction with the Missouri Coin Festival. Along with the weekly grind of myriad internet only sales, the opportunities for new and recycled offerings are ongoing. While grueling for some, this current condition is more welcome than an opposite scenario of a coin market floundering in the summer doldrums.

This week's sight-unseen market is mixed as dealers try to craft an auspicious position for themselves to begin the second half of the year. Silver Commemoratives are an excellent barometer. These special anniversary issues are readily available to sell when cash is needed, yet they also experience strong collector demand, making them attractive buys when the price seems too inviting. Both conclusions are true this week as select PCGS and NGC Silver and Gold Commemoratives dropped, in some cases sharply, at public auction. For example, a PCGS MS66 Elgin was cut down, reducing its sight-unseen appeal in the Gem grade by nearly 30 percent to \$300 Bid. Isn't it amazing what happens to Bidders when they don't readily agree with the assigned grade? However, it is a totally different picture when one examines the ANACS and ICG Commem Bids this week. Strong percentage gains are found among ANACS and ICG Silver and Gold Commemoratives as bargain hunters try to take advantage of some amazing opportunities. Still, placing a much higher Bid doesn't automatically mean it will be hit. PCGS and NGC Morgan Dollars are mixed in this report. We are encouraged to see several common and slightly better issues posting higher Bids, but there are several four-figure Morgans decreasing as well. Since the common dates have run their course, dealers are bailing on some greater value issues to raise quick cash. Conversely, New Orleans Mint Dollars are popular with increases found among mostly PCGS issues this week. Collectors are always hunting for tough-to-find, well-struck New Orleans Mint examples. Though our coverage begins in MS63, increases as high as 23 percent for both ICG and ANACS were seen in lower Mint State grades. ICG leads the short list of declining Morgan Dollars: an ICG MS65 1881O fell nearly 35 percent to \$570 Bid. Mint State Type is facing a blaze of demand in today's market, and we are seeing some of that force focused on higher sight-unseen Bids for ANACS and ICG issues. This surge of support is chasing after a wide range of Type issues. Buyers are trying to capture a little bit of everything from Capped Bust coinage through Standing Liberty Quarters. At the moment, Mint State Gold Type remains mixed as the Spot bullion market doesn't exactly know which way to go.

COMMEMORATIVES
Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions.
Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions which excludes varieties, errors, CON, CA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

Collector Coins & Gold Hot At FUN Chain Cent Realized \$69,000 at FUN Auction

The middle of July normally means vacation time, but with the addition of the new FUN show on the calendar, many dealers have changed their immediate plans for much needed "R&R". This Summer FUN edition to West Palm Beach has an arguably auspicious start. Yet with overwhelming collector demand and an affluent base of support, this southern sojourn will be watched carefully. Dealers of course are cognizant of the current market and want to be its beneficiary while it lasts. Early reports from FUN indicate that most collectors in attendance were there to buy. Gold is very strong with a tremendous amount of interest for better than generic Type. One dealer told us that he was there "primarily to buy" and was satisfied, but he would like to fill more want list items. Not surprisingly, scarcer collector coins in virtually all series are under fire, and better Seated Liberty Type material is a hot ticket. The huge demand for select rare coins these days seems unparalleled, yet collectors maintain a propensity to add them to their collections. They are a savvy lot, looking to buy those coins that they believe to be attractive and interesting but also undervalued. This calculating demand has been fueling a bull market, and it is expected to push things forward for the balance of the 2007 campaign. We are definitely in the midst of a very selective market! Dealers tell us that their customers are becoming more meticulous. Many of the coins that dealers are on the prowl for are above average for the grade. They are looking for attractive coins, particularly those with aesthetically pleasing color. Coins that meet these stringent qualifications sell instantly today.

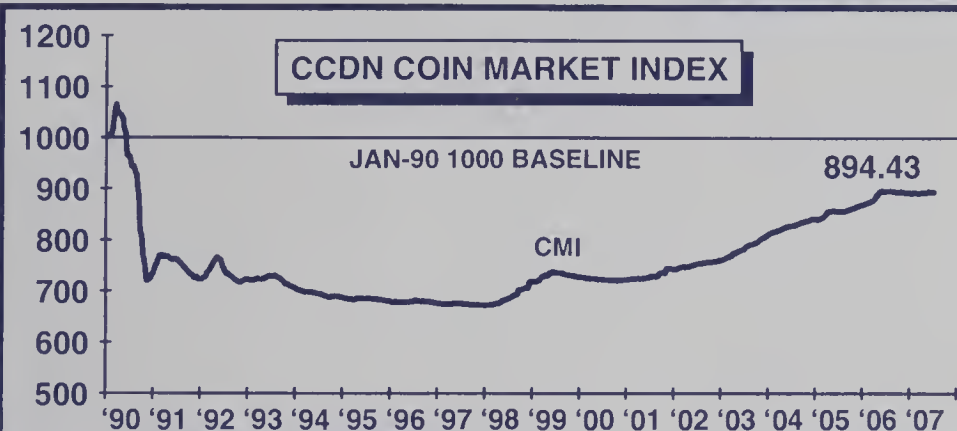

This week's sight-unseen market is mixed, indicative of an increasingly busy schedule for dealers even though it's summer. Activity is on the light side as most buyers are busy attending shows, catching up on normal business demands at home as well as participating in auctions, both online and in West Palm Beach. Naturally the rest are enjoying some overdue vacation time. Of course the continued liquidity need by dealers is still evident. This, in part, is seen by some coins selling at public auction at reduced levels. When cash is needed, it's not prudent to hold out for the last dollar, especially when that money can be used for a better purpose. Silver and Gold Commemoratives are

usually the target of money hungry dealers, but you can only go to the well so often. Still, some Commems which sold at public auction at bargain levels are giving somebody an opportunity. A popular Isabella Quarter grading PCGS MS66 had a lackluster auction appearance and Bid fell below \$4,000. This is a perfect example of how the consignor can generate a quick 4 grand while a buyer can add a Gem at a slightly reduced level. Commems are the usual suspects when money is needed. Here's one reason why: consider that PCGS and NGC have combined population of 265 Isabella Quarters in MS66 with an amazing 84 higher. Other near Gem Commems (MS64) loosing ground include the York, Elgin, Sesquicentennial Half Dollars and the 1903 \$1 Gold McKinley. Morgan and Peace Dollars are also a reflection of mid July. Light activity is seen with a few Gems of each Type on the short end of the auction result column. Interest is also evident as a bargain or two is being tempted by slightly higher Bids. A popular collector coin, 1892O, is slightly higher in PCGS and NGC MS63 and MS64. This date is not a bad item to maintain on an inventory list as well. Demand is seen for two San Francisco Mint Peace Dollars, one key and one semi-key in both PCGS and NGC. The 1934S is climbing in MS61 and MS62 while the 1924S is up in MS64. Type is quiet as well, yet Gem Type 2 Standing Liberty Quarters are a bit higher in PCGS and NGC MS65 and in NGC MS66. However, a richly toned PR67 1881 Morgan Dollar's poor auction result didn't live up to its billing, as PR67 Type Morgan Dollars fell back a bit. Gold Type was especially quiet, even though Spot has been more active while jumping past \$660 per ounce. PCGS and NGC Type III Gold Dollars jumped 8 percent each. Two attractive designs, the Winged Liberty Dimes and the Walking Liberty Half Dollars were practically "no shows" this week. However, the equally popular Buffalo Nickel

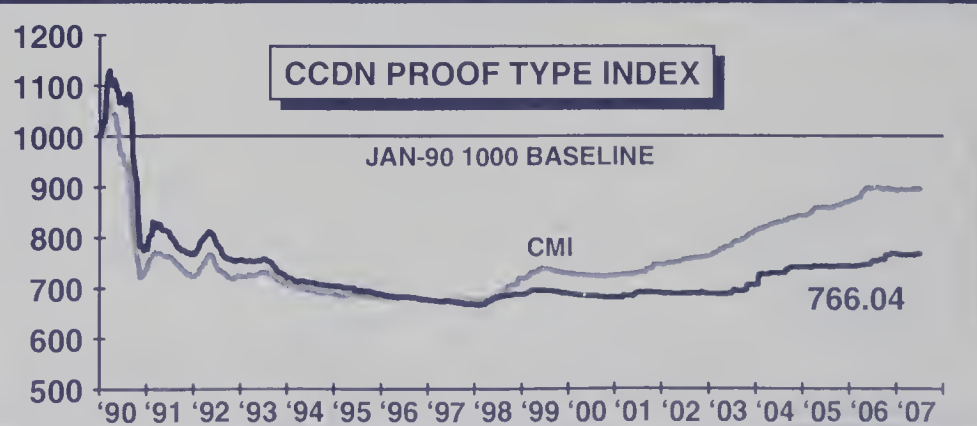

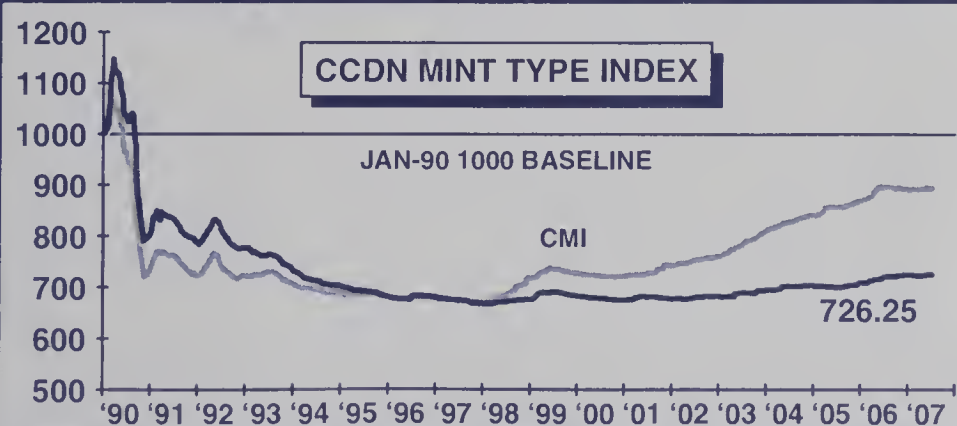

series found some interest as Bidders increased the ante for two San Francisco Gems, a PCGS MS66 1913S Type 1 and a PCGS MS65 1921S. Another Gem, a 1920 Philly in PCGS MS65 advanced as well.

Heritage's Summer F.U.N. Coin Auction's 1st session is in the books at \$1.2 million. We have listed a few highlights.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes.
Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

NGC and U.S. Mint Coin Covers The Perfect Companions

*Just another way
our rare commitment is
redefining the hobby.*

NGC Certifies Official U.S. Mint Covers in Original Issue Holders

NGC grades and encapsulates coins enclosed in their original covers, preserving their historical significance and pedigree while receiving the advantages of an NGC-certified grade.

The entire cover, with coins still enclosed, is sealed in a semi-rigid clear plastic case with detailed label, describing attribution information, the coins' pedigrees, and NGC grades. The case developed for this service is made from the same high-quality, inert materials that collectors have come to expect from NGC, and it is thoroughly sealed to guard against environmental hazards and other contaminants.

Eligible covers include:

- 50 State Quarters Official Commemorative Coin Cover
- Westward Journey Nickel Series Official Commemorative Coin Cover
- Sacagawea Dollar United States Mint Official Commemorative Coin Cover
- United States Mint Official American Presidency \$1 Coin Cover
- ...and more!

NGC is proud to be an innovator and market leader creating new products and services that benefit the collector and numismatic marketplace. For more information and submission instructions, visit **NGCcoin.com**.

Excitement Brewing In Milwaukee Auctions Crowd Calendar As ANA Approaches

Some dealers are back home after a pleasant vacation while others are returning with new "Christmas in July" numismatic purchases following the Summer FUN show in West Palm Beach, Florida. Many pundits we conversed with are encouraged by the market's heated activity in July. Expectations will culminate at the summer's zenith event in Milwaukee, where the American Numismatic Association's World's Fair of Money is set for August 8-12. Dealers concur that solid collector demand is evident, and they are enthusiastic about the upcoming ANA and auction opportunities. The coin market is expected to remain active, with competition only intensifying as quality material is pursued in the dog days of August. This fervent demand has been growing while supplies are evaporating to dangerously low levels. The bottom line is that dealers need quality coins, pronto! All avenues are being explored to remedy this imbalance and satisfy customers. Enter the sight-unseen market—an ideal venue to raise funds to pay for outstanding balances as well as for future needs. Liquidity will be key for dealers heading to Milwaukee, especially on the heels of millions of dollars in July auction sales. Therefore, some average coins and stale inventory are being cast off. Several of this week's sight-unseen pages depict this discounting while strong demand is prospering in other segments. For example, Silver Commemoratives are often a favorite of those trying to convert some coins to cash. This "weakness" is certainly amplified by more than a dozen issues which are declining this week. Some of these decreases are rather significant. Two Commem Halves, a PCGS MS66 common date Oregon Trail via Trade on the electronic dealer network, and an auction sale of an NGC MS67 Long Island got slammed. Interestingly, a PCGS or NGC MS65 Gem 1928 Oregon bucked the trend by advancing slightly. Gold Commems suffered similar weakness as these bright golden Americana were jettisoned for that much needed cash. Mostly, four-figure Gold Commems are being discounted. Possibly pleasing at least one new owner, a PCGS MS66 1903 Louisiana Purchase, Jefferson lost more than 4 percent after the Dollar's lackluster auction sale. Morgan Dollars may be very popular with collectors, but, like Silver Commems, they are also a popular choice for acquiring much needed green. A trio of NGC double-digit losers in Gem includes: an MS66 1878 7 Tail Feather, Reverse 1879; an MS67 1897; and an MS67 1902O. Nevertheless, strong demand still exists for Morgans as buyers are ever present for many into low four figures. A small group of Buffalo

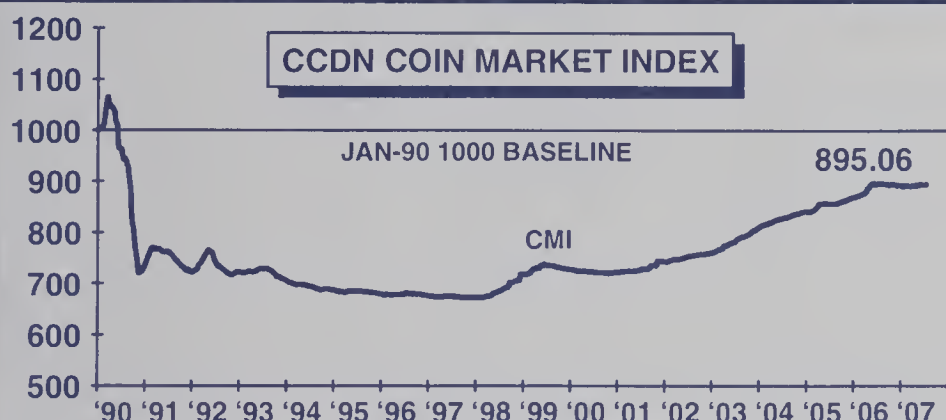

Nickels, Mercury Dimes and Walking Liberty Half Dollars contributed to the liquidity charity party as well. A PCGS MS66 1935S Buffalo lost 7 percent. Two PCGS 1944D Full Band Mercury Dimes were clobbered! An MS65 dropped 28 percent while an MS66 lost more than 16 percent. Of course their relatively small dollar amount and availability make these large percentage moves possible. Finally, an "ugly" 1934 Walking Liberty Half in NGC MS67 brought a 9% decline. Some Gem Standing Liberty Quarters are finding ready buyers sight-unseen. These beauties are popular with collectors, and current levels seemed too good to pass up. Mint State and Proof Type are quiet with much underlying strength in place.

Gold Type and Saints are prospering on the back of bullion's recent strength. Spot Gold, now over \$670 per ounce, has much to do with this increased interest. At least a dozen and a half plus signs are visible among Gold Type in most denominations. The \$5 Liberty, Motto in PCGS and NGC MS61 even claimed double-digit gains. In excess of 200 Saints are sporting plus signs with 11 reaching double digits. The initial year, 1907, leads the pack with a spectacular 25 percent gain for any PCGS or NGC example. Once again, dealers need to protect their "Asks" in a rising market. Many savvy buyers hit the

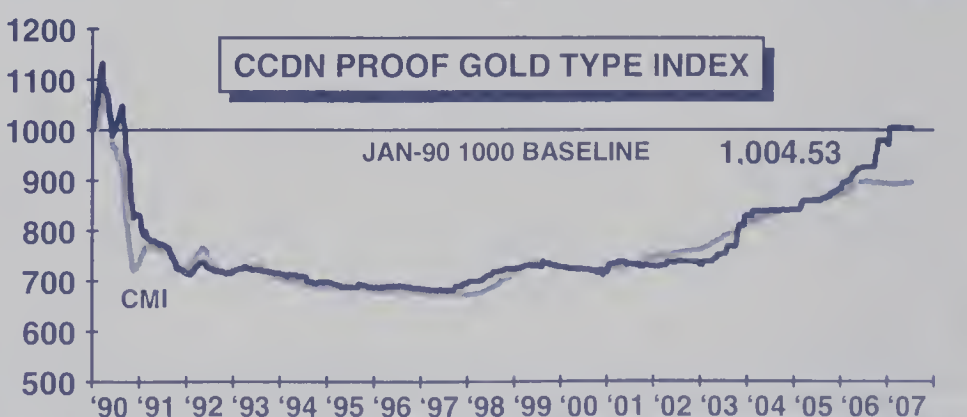

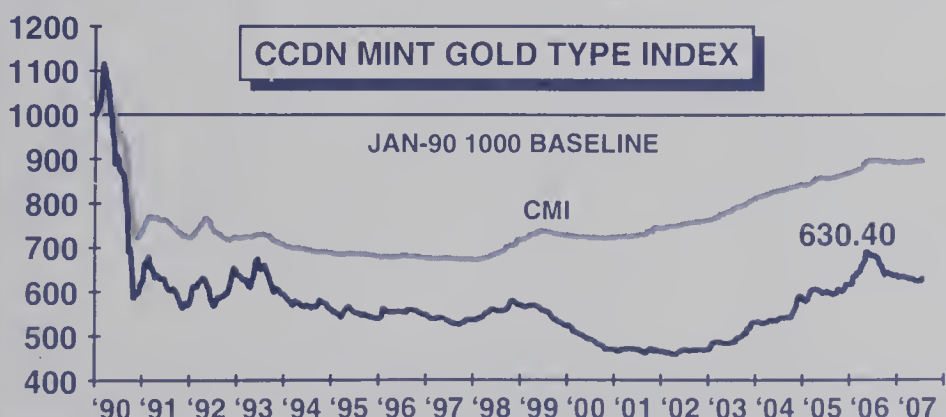

electronic networks early on 7/18 capturing some "yesterday priced" buys for \$10 Indians and \$20 Saints. Some ambitious dealers will maintain their road warrior status and attend the 47th Annual Coin Festival in Saint Charles, Missouri July 27-29. Scotsman will host the Midwest Summer Sale 2007, July 27 there as well. Three auctions will take place prior to the ANA. Superior will offer the 2007 Milwaukee Elite Auction August 3. The Bowers and Merena 2007 Milwaukee Rarities Sale is on August 4. Stack's will host the J.A. Sherman Collection sale on August 5 in Milwaukee. We have listed a few of the many highlights from the Stack's and Bowers & Merena sales.

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the responsibility of the dealers and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

1894S Barber Dime Captures \$1.9 Million Collectors Acceptance Corp's Service Unveiled

As we close out the books on July, the sale of a classic rarity is perhaps its most revealing chapter. The famous and purportedly finest known 1894S Barber Dime has just changed hands for an astounding \$1.9 Million. John Feigenbaum, President of David Lawrence Rare Coins, orchestrated the sale of this phenomenal PCGS PR66 specimen to a proud investment banker from New York City on July 23rd. This extreme rarity, kin to perhaps all of 9, last sold for just over \$1.3 Million on March 7, 2005 as the key offering in Part III of the Richmond Collection auction in Baltimore. While dealers certainly have high expectations for the fast approaching ANA, this sale will be a hard act to follow. Nonetheless, as they diligently prepare for the upcoming colossal numismatic event, dealers know there will be both aggressive buyers and sellers swarming the bourse. Many of those in attendance in Milwaukee will pull out all the stops, bringing those "special coins" with them—those rarely seen pieces that will make the ANA audience proud as well as generate some strong sales. As buying will probably take top priority at the August 8-12 show, dealers must have strong cash and credit reserves. Collector want-lists dating back to the last snowfall must be tended to as they look to procure suitable replacements for lean inventories. Their first chance to buy some fresh offerings is currently taking place in St. Charles, MO at the Scotsman auction. Following this, dealers will no doubt end up bleary eyed from canvassing the thousands of auction lots as there will be four sales taking place in rapid succession in Milwaukee from August 3-10. These auctions are being held prior to, and during the ANA happenings. Superior's Elite Auction kicks things off August 3rd followed by the Bowers and Merena Milwaukee Rarities Sale on the 4th. The J. A. Sherman Collection sale by Stack's is scheduled August 5th, and the Heritage ANA Milwaukee auction, including Platinum Night is on the docket for August 8-10.

The sight-unseen market is currently enjoying virtually unparalleled activity. Many dealers are utilizing this electronic trading venue to raise some additional last minute funds before they hit the road. Much of this assertive commotion is targeting those coins of average or lesser quality to sell at auction or via fixed price list at reduced levels. Dealers have repeatedly told us that the Silver Commemorative portion of the market is weak. This reported lack of demand is corroborated as dozens of issues lost ground this week. Many of these Commems continue to fall, and at some point, we expect some adventurous soul will step in and buy. The sales of Gold Commems have slowed, too, and while there is talk that current levels look attractive, we haven't seen many strong Bids crashing the gate. Morgan Dollars are often sold to generate some quick cash, but be sure

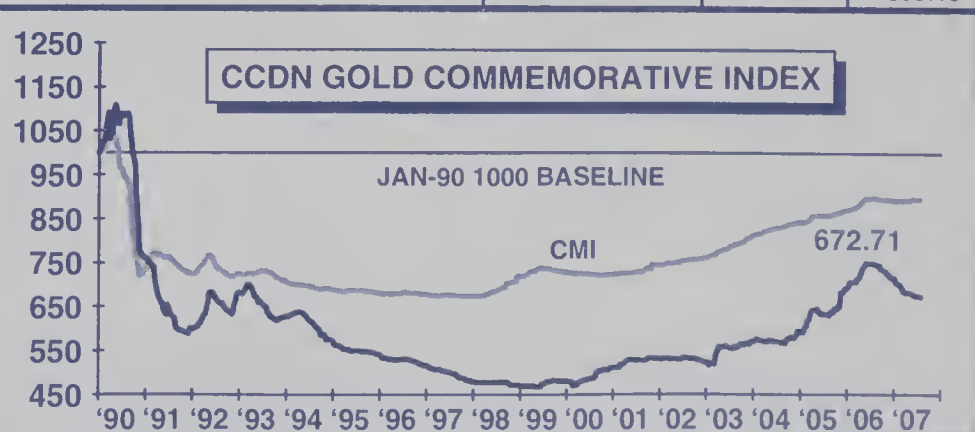

to notice that this doesn't apply to many of the key and semi-key dates. Generics in PCGS and NGC MS64 even managed to advance a trifle higher. Conversely, many Morgans are trading, mostly at auction, below their current sight-unseen Bid. A popular overdate, 1887/6, fell below \$2,500 at auction, establishing a ten-year low in the process. Opportunity knocked when a PCGS MS64 1878CC sold at auction for just \$368, while for most, a sight-unseen Bid of \$425 was totally ignored. What isn't being ignored is Type. This segment is, arguably, the strongest portion of today's market. Early Type has been very strong all year and continues to attract Bidders. Draped Bust and Capped Bust Silver coinage from Half Dimes thru Half Dollars is robust. The percentage increases may not be double digit in this round, but the need remains solid. These coins that combine true rarity with quality are a mainstay in any collector's portfolio. Walkers are experiencing solid demand as sight-unseen Bids increase for many MS61-MS64 Denver and San Francisco examples from the '30s and '40s. A PCGS MS66 1942D led all those advancing by a wide margin with a solid 13 percent increase to \$250 Bid.

Finally, we have been monitoring the progression and development of a new product that will soon be available. Collectors Acceptance Corporation (CAC), founded by John Albanese, will soon be applying "approval stickers" to those PCGS and NGC certified coins that are deemed to be solid for the grade. John says when he views coins he gives them an alpha-letter grade of A, B or C for their numerical grade on the slab label. Only coins that fall into the A and B category will be "stickered" with approval. A small tamper proof oval approval sticker will be placed on the front of the slab along with a larger sticker on the back with directions for authentication verification on their web-site. Certified coins that are believed to be under-graded will be issued special stickers designating the coins as likely upgrade candidates. CAC is planning on publishing the populations of "stickered" or approved slabs on their web-site, but will not list those certified coins that do not qualify. Pricing for this new service has not been finalized, but free opinions are planned to be given to collectors at select coin shows. Several dealers have announced that they are involved in the group, including: Certified Assets Management, Doug Winter Numismatics, National Gold Exchange, and Legend Numismatics. Labeling coins as premium quality or PQ is not a new idea as seen by NGC's "Star" designation, Heritage's "JH Exceptional" and Eagle Eye's "Photo Seal", which have been around for quite some time. The difference here is that this consortium of dealers will support their CAC "stickered" coins with published sight-unseen buy prices.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers. The responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month.

COMMEMORATIVES

NGC and U.S. Mint Coin Covers The Perfect Companions

*Just another way
our rare commitment is
redefining the hobby.*

NGC Certifies Official U.S. Mint Covers in Original Issue Holders

NGC grades and encapsulates coins enclosed in their original covers, preserving their historical significance and pedigree while receiving the advantages of an NGC-certified grade.

The entire cover, with coins still enclosed, is sealed in a semi-rigid clear plastic case with detailed label, describing attribution information, the coins' pedigrees, and NGC grades. The case developed for this service is made from the same high-quality, inert materials that collectors have come to expect from NGC, and it is thoroughly sealed to guard against environmental hazards and other contaminants.

Eligible covers include:

- 50 State Quarters Official Commemorative Coin Cover
- Westward Journey Nickel Series Official Commemorative Coin Cover
- Sacagawea Dollar United States Mint Official Commemorative Coin Cover
- United States Mint Official American Presidency \$1 Coin Cover
- ...and more!

NGC is proud to be an innovator and market leader creating new products and services that benefit the collector and numismatic marketplace. For more information and submission instructions, visit **NGCcoin.com**.

Will ANA Satisfy Collector Demand? Sight-Unseen Market Enjoys Surprising Activity

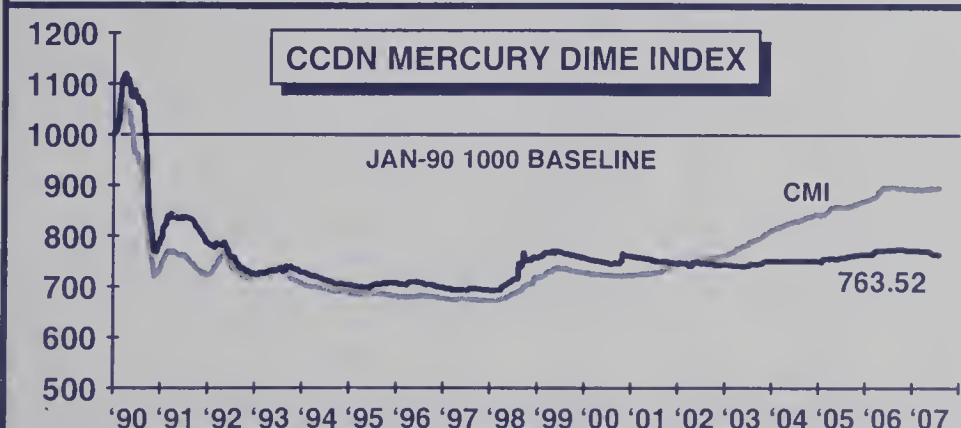

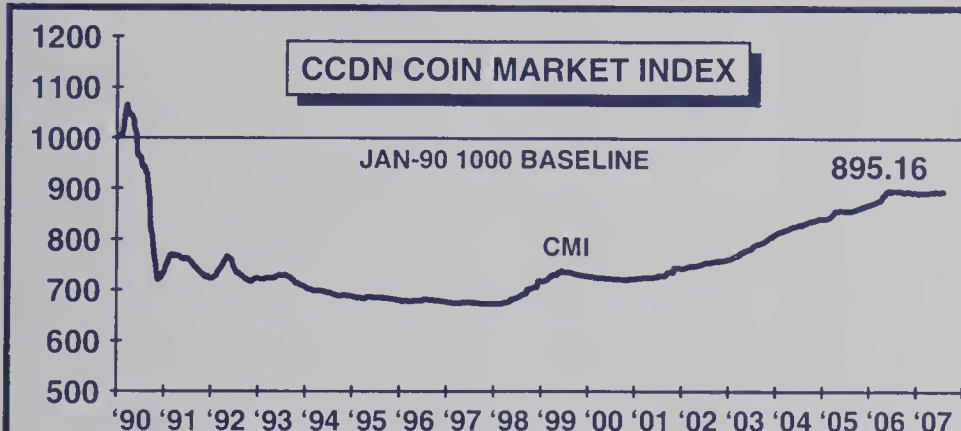

At this pivotal point in the year, dealers realize they don't have many solid opportunities left in 2007 for filling those tough want lists. Lately, it's been a grind, with hectic schedules and rare dates continuing to realize increasingly strong prices at auction. Planning, liquidity and some luck are all part of the equation for success. Customers realize they have to wait for their coveted issues, especially considering the difficulty in locating and securing attractive examples that fit their needs. This is part and parcel of the rare coin business and accentuates the challenges and rewards of collecting. After all, if reaching one's goals were too easy, the meaning would simply be diminished. The real fun begins while displaying one's accomplishments at a show or at a local coin club meeting. The story that takes flight by the time one finally buys a select rarity is often worth more than the price he or she paid for the coin itself. Therefore, collectors bide their time while turning down coin after coin that doesn't measure up to their qualifications. Generally, collectors try to put together matching sets, knowing rare dates are few and far between in any condition. Difficulty in locating this material is exacerbated by the swelling collector base, with more people battling each other for the same prize. As a result, better material will certainly be sought-after at the American Numismatic Association's World's Fair of Money August 8-12. This event, and the pre ANA auctions by Superior, Bowers & Merena and Stack's, held August 3-5, are already underway in Milwaukee, Wisconsin. The Heritage ANA Milwaukee Auction, August 8-10, will make a total of four sales, providing an exemplary opportunity for both dealers and collectors. Remember, it is the thriving collector demand that is driving the 2007 engine, and while the demand stays strong (all other factors being equal) then the market should continue to prosper.

The sight-unseen Bidders are depicting selective activity with value and liquidity on their minds as the ANA waits in the wings. There is also plenty of curiosity, speculation and anticipation from dealers and collectors alike regarding what effect the Collectors Acceptance Corporation (CAC) will have on the overall sight-unseen market. Founder, John Albanese plans on applying an approval sticker to existing certified coins that are solid for the grade and are of *Greysheet* quality. A group of dealers has already vowed to place substantially higher sight-unseen Bids for slabs sporting this approval sticker. This new service may curtail gradeflation to some degree and force 3rd party grading services to hold-the-line on quality. Gem 1922 \$20 Saint-Gaudens are a prime example of loosening grading standards. As of March

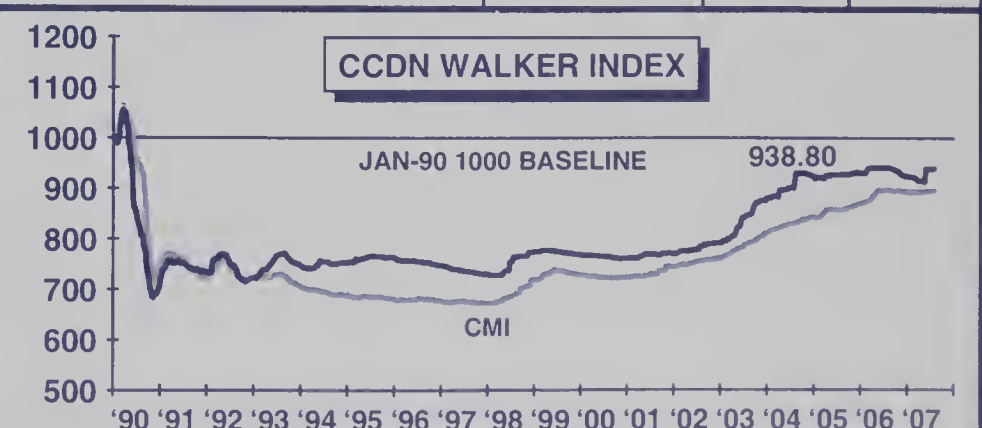

2002, PCGS had graded only 59 as MS65 after sixteen years in business while today they report 998 encapsulated at this level. *Greysheet* Bid has fallen from \$3,400 to \$1,650 over this same period while Gold Spot has more than doubled. Submissions to CAC are scheduled to begin in early October with fees starting at \$10 — only half of this fee charged if no sticker is given. Free evaluations will be offered to advanced registry set owners as well as to collectors at select coin shows. Only those certification services that publish **current** populations will be considered for CAC approval stickers. As of today, only PCGS and NGC will be in play. ANACS has not published such a book in nearly two years, and ICG, SEGS and PCI have yet to publish any such reports.

Type is demonstrating strength again this week by not declining, and continues to be among the strongest segments of all. Mercury Dimes experienced some precipitous declines as select Gems saw their value erode after continuing to sell at auction for below sight-unseen Bid. Two PCGS Mercury Dimes succumbed to this pressure. First, an MS65FB 1940S was hammered with a 35 percent decline in route to an all-time low at \$40 Bid. Next, an MS66FB 1940 lost nearly 23 percent at \$37 Bid. Walking Liberty Half Dollars are mixed. Gem quality generic PCGS and NGC examples found slightly higher sight-unseen Bidders while a small group of Gem Walkers, mostly from the 1930s, is seeing a bit of a loss. Proof Singles are making a splash this week as Dimes, Quarters and Halves from the 1930s and early 1940s find Bids increasing. This current activity may suggest last minute maneuvers as dealers attempt to acquire needed material to take with them to Milwaukee. Another strategy may be the posting of Bids with the hope of having them fulfilled at the show itself. With so many dealers in one place, and so much material needed, such transactions seem quite likely.

Dealers continue to surf the market for value. ANACS and ICG certified coins are making some noise in sight-unseen trading this week. Gold Commems, Morgan Dollars and Walking Liberty Halves are finding increased Bids for ANACS coins while ICG Morgans have hit on hard times as select MS65 and MS66 Gems are sharply lower. On the positive side, ICG Gold Type is making some exceptional gains, and Proof Gold is showing strong sight-unseen Bids at current levels. Looking at PCGS and NGC, only a handful each of Commemoratives and Morgan Dollars is declining. Some believe the discounting of Gold Commems may be near its end as bargain hunters have now increased Bids for select ANACS examples.

COMMEMORATIVES

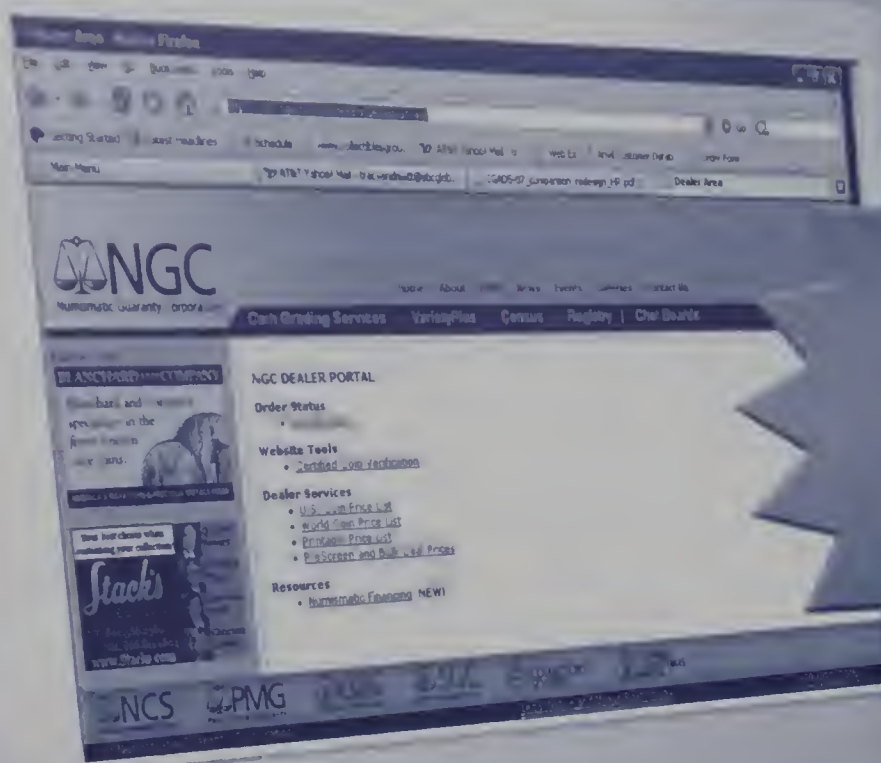

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

NEED TO MAIL?

**Save Money
On Postage!
We will Pre-Sort your
Mailing Labels to get
You the Best Rate**

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

2007 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class order or Presorted for Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

YES, I want to order mailing labels averaging 5,000+ names from the 2007 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____ signature

The Fine Print
*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CON, CA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. No other offer precludes or supersedes the terms and conditions on the ICG grading submission form.

Torrid Demand Outpaces ANA Supply McDermott Nickel Flipped In Milwaukee

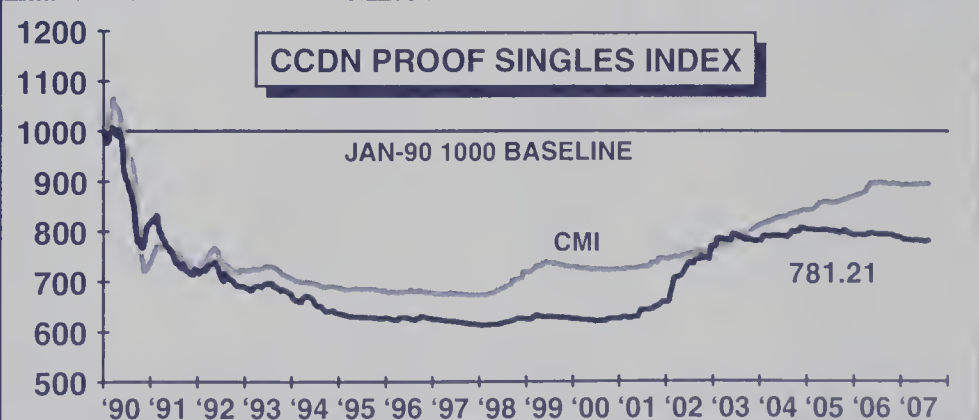

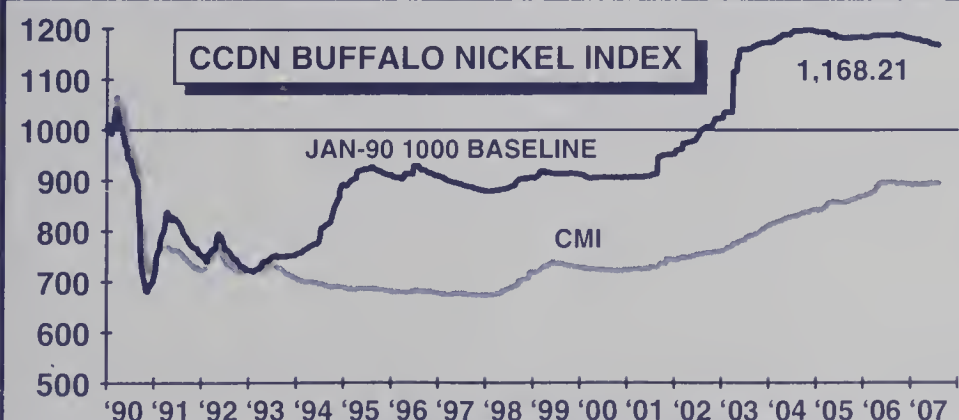

As pre ANA hype permeated the local Milwaukee airwaves, for an instant, it was literally heads or tails if one of the main draws to the show would appear there unscathed. As Donn Pearlman, along with treasury official Dawn Haley, were promoting the gala event, a local Fox morning show host took some unscripted privilege, flipping the famed McDermott 1913 Liberty Nickel in the air! A horrified, then relieved Pearlman, looked on as the interviewer caught the \$3 million coin which was only protected by a *Kointainer*. Aside from the unintended levity, early reports from ANA central confirm it was an active PNG day and opening day on the bourse. Consequently, that strong demand for a wide range of rare coins translates into a buyer's market in Wisconsin. This could pose a problem for some in Milwaukee as the majority of dealers attend the ANA to reload depleted inventories by buying as many problem free coins as they can lay their fingers on. Certainly, most major players have enjoyed a prolonged cycle of prosperity, yet they have been under severe pressure throughout this campaign because collector demand has been taking many coins off the market. This trend has, if anything, accelerated, leaving dealers vulnerable and in desperate need of salable material. Simply stated, the heated competition has forced buyers to pay a bit more than intended, and in some instances, considerably more. Aggressive wholesale buying has definitely taken command on the bourse with retail sales lagging a bit. Dealers also confirmed that the pre ANA auctions were a hot venue. PQ, attractive coins were scoring high hammer prices. Many pundits said the Capped Bust \$10 series from 1795-1904 was especially hot. The trio of pre ANA auctions from Superior, Bowers & Merena and Stack's from August 3-5 claimed nearly \$18 million. So far, the Heritage Milwaukee ANA Auction has realized \$3.7 Million at conclusion of its 2nd session, with Platinum Night still ahead as we go to press. Rare and eye-catching examples have brought strong money at public auction and continue to attract heightened competition on the bourse. Expert opinions also pointed to powerful demand targeting all denominations of Flowing Hair and Bust coinage. Dealers trying to acquire this sizzling property came up empty more times than not. There just isn't enough of this stuff to satisfy the overwhelming demand! One dealer was extremely happy with his coup, though, as he purchased a tough 1802 Draped Bust Dime. This early federal rarity in NGC

MS61 condition has already been placed with an ecstatic collector. Along the same line, there seemed to be a paucity of Chain Cents and Wreath Cents, disappointing several early Copper specialists in attendance. Another strong segment comes as no surprise - key dates. The need remains great for keys of all series. Many dealers were observed busily reviewing box after box, attempting to find coins needed for their customers. One dealer was pleased because he bought, on the bourse, a PCGS MS62FB 1916D Mercury Dime. As dealers' *recyclables* make the rounds, fresh deals and popping fresh material, however, are few and far between. Many serious collectors attend ANA shows because of the specialty meetings held there and the opportunity to visit with other collectors who share mutual interests. These variety buyers of tokens, medallions and a multitude of other more esoteric exnumia have specific needs, and it's not easy for dealers to fill them.

The sight-unseen market is pulling back, as expected, with Bidders failing to generate much enthusiasm. Coins are being discounted because many buyers are in Wisconsin, and thousands of auction lots have been thrust on the market in short order. Lesser quality coins are left unsupported and that spells significant percentage declines. Silver Commemoratives have been soft for some time, and it appears that their woes are continuing. A PCGS MS67 Maryland fell to \$1,450—an all-time low. The drop was significant at just over 20 percent. Morgan Dollars are also a trifle weak apart from a few 1878 issues. A PCGS MS65 1885S brought under \$1,000 at public auction. It lost more than 16 percent, a low for the last 10 years. Yet, with 360 graded at this level, there is bound to be at least one or more unattractive examples around. Mint State and Proof Type are solid with very little dumping in these categories. A small herd of Buffaloes graze toward lower ground as a few better dates were discounted at auction. A scarce NGC MS63 1924S stumbled nearly 13 percent, a level not seen since November of 2002. Gold Type is mixed. Type 3 Gold Dollars jumped 11 percent, and are now at \$300 Bid in MS61. Conversely, some weakness among MS61 and MS62 Type 2 Dollars is noted. An NGC MS64 1899 \$5 fell 8 percent after its August auction result at \$1,150. Strength is seen in Saints, with MS63 examples now Bid \$730, while High Reliefs ascend to \$23,600 in NGC MS64.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers. are strictly the responsibility of the dealers, and may fluctuate according to needs. PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflike. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

The Fine Print

*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CONECA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

Every Numismatic Library needs copies of the latest addition to the
COIN DEALER newsletter family of publications:

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - \$2.50 each • 11-25 issues - \$2.00 each • 26 & over - \$1.50 each

Or, you can purchase *complete sets* of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter (Greysheet)**
 from June 14, 1963 to December 22, 2006, now includes 2,220 issues.
 At \$1.50 each this would normally cost \$3,330, but a complete set
 is only \$2,250.

Complete set of the monthly **CDN Monthly Supplement**
 (formerly the Monthly Summary)
 from August 1976 to December 2006, now includes 365 issues. At \$1.50
 each this would normally cost \$547.50, but a complete set is only ... \$425.

Complete set of the **CDN Quarterlies**
 from January 1992, to December 2006, now includes 180 issues, a
 complete set is only \$200.

Combined weekly **CDN (Greysheet), Monthly Supplement & Quarterlies**
 now includes 2,765 issues, and extra savings at only \$2,750.

Complete set of the weekly **Certified Coin Dealer newsletter (Bluesheet)**
 from August 22, 1986 to December 22, 2006, now includes 998 issues.
 At \$1.50 each this would normally cost \$1,497, but a complete set
 is only \$1,025.

Complete set of the monthly **Currency Dealer newsletter (Greensheet)**
 from September 1980 to December 2006, now includes 316 issues.
 At \$1.50 each this would normally cost \$474, but a complete set
 is only \$375.

4,079
Newsletters

For the most complete numismatic pricing library possible, you may order a
COMPLETE set of all of the Back Issues listed above for only **\$3,775.**

Premium Coins Thrive, Generics Slide Market Bifurcation Continues

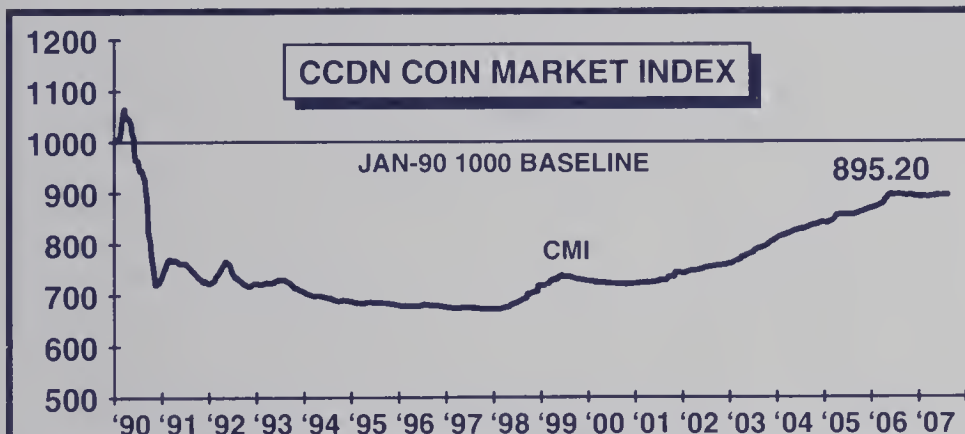

Most dealers have returned to their home bases after a grueling stretch of auctions and the ANA show. The non-stop Milwaukee marathon proved a worthy summer sojourn for many who attended. Some were able to buy much needed coins while others found eager buyers for their material. All in all, it was a very exciting event, and for those who put in the long hard hours, it made for a profitable experience. Powerful demand and strong money are still poised to strike out at any coin clearly premium quality for the assigned grade. Buyers remain in a tight queue looking for these no-problem issues exhibiting sharply struck surfaces and attractive, original color. Those possessing blazing luster only add to their desirability, and Bids for these wonder coins are increasing at a rapid rate. Despite the thousands of auction lots that just sold and the mammoth bills coming due, there appears to be enough capital to pay for this material. The consensus is that there are plenty of well-heeled collectors and dealers willing to pay huge amounts for these top echelon coins if and when they get the opportunity. With that said, dealers readily agree that a definitive 2-tier market remains firmly in place. On the one hand, generic and much of the run-of-the-mill stuff is trading back and forth at lackluster prices. On the other hand, quality coins, those that possess the attributes we referred to, are generating exploding demand, finding buyers willing to pay greater prices with virtually each passing day. Unfortunately, there aren't enough of these high quality coins to meet the billowing demand, and the higher prices being offered aren't necessarily forcing these "PQ" coins from hiding. This inelastic demand, one that's not as responsive to strong price changes, is creating havoc with those eager buyers as August winds down. Some numismatic pundits expect this imbalance to continue, even though they believe the rate of collector growth has slowed. The world's financial problems may also influence future collector demand. The underlying concern is that the extraordinary sell-off in the financial markets, a result of the sub-prime mortgage fiasco, may weaken our economy going forward. All financial indexes, even Gold, Silver and Platinum, have been hit hard. Naturally, those coins tied to their intrinsic value will suffer immediate consequences, while those harboring a numismatic component should retain some cushion.

Meanwhile, back at the sight-unseen ranch, the market is still reeling as consignors are willing to sell their generic material at reduced levels to get out of Dodge. This seems to be the case among Silver Commemoratives, Morgan Dollars, and Mercury

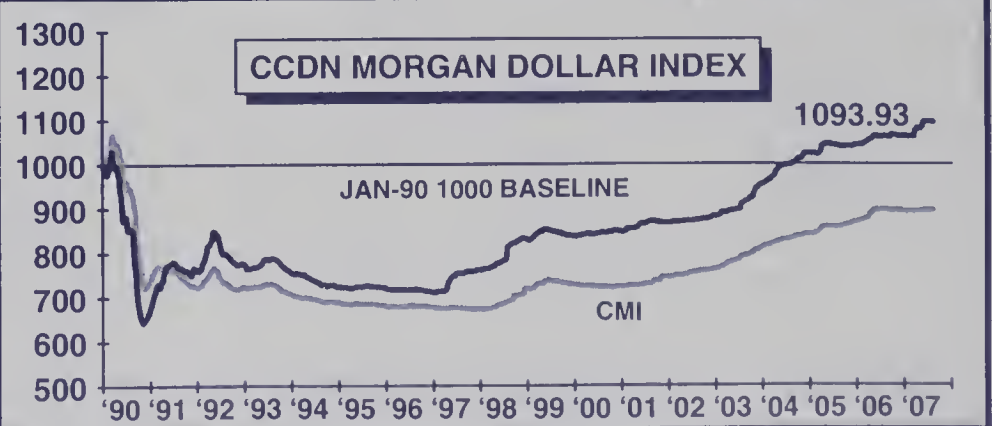

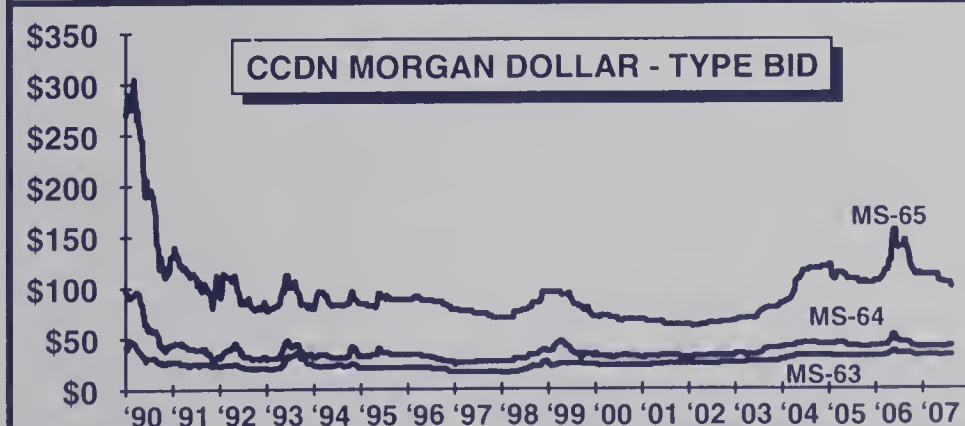

Dimes. Just when you thought Silver Commems would be turning the corner, declines continue. Surprisingly, it is occurring among some of the better issues, such as the Lafayette Dollar, Isabella Quarter, and the Pan-Pac, Spanish Trail and Hawaiian Half Dollars. Gold Commems performed equally, as many of these little jewels continue to slide. A similar pattern is found in Morgan Dollars. Better date issues are being discounted thru weaker sales at auction. The 1879CC Capped Die, 1893CC, 1894, 1896O and an NGC MS66 1897O are losing ground. The latter's decline is more than 14 percent, at \$41,000 Bid. Consignors know that better date coins can certainly provide more punch than their generic counterparts [see chart below of common date Dollars over the past year]. Mint State Type has held up better than most areas, but even here an NGC MS61 Liberty Seated Half, with Arrows lost 9 percent. Proof Type is thankfully quiet. Gold Type reflects the weakness of bullion as dealers pull in their Bids for many generics, yet the ever-popular Saint-Gaudens series appears solid hosting to a wave of gains. Three better date Mintmarked Buffaloes suffered double digit declines. A 1934D PCGS MS66 example declined 23% before settling at a new, 10-year low. More than a dozen Mercury Dimes were kicked around a bit as an NGC MS64FB 1936D now stands at \$30 Bid, 40 percent lower than its previous level. Walkers are quietly on the mixed side as holders of these coins aren't so willing to part with them. Wow! Franklin Halves are picking up the slack, posting over 2 dozen plus signs in this usually vacant arena. A word of caution, especially to internet buyers: recent auctions originating from China were shut down by eBay when it appeared that the NGC slabs being

offered were counterfeit. For those on an unlimited budget, Teletrade is auctioning off the mother of all Gold coins as the Royal Canadian Mint's 100 Kg (slightly over 220 pounds) .9999 Gold Maple Leaf hits the internet auction block 8/16. This impressive piece carries a face value of \$1 Million Canadian Dollars, and at 3,215 oz, her melt value is \$2,084,285 as we go to press.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

NGC and U.S. Mint Coin Covers The Perfect Companions

*Just another way
our rare commitment is
redefining the hobby.*

NGC Certifies Official U.S. Mint Covers in Original Issue Holders

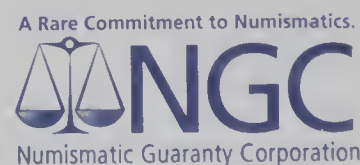

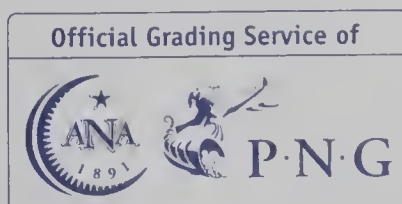

NGC grades and encapsulates coins enclosed in their original covers, preserving their historical significance and pedigree while receiving the advantages of an NGC-certified grade.

The entire cover, with coins still enclosed, is sealed in a semi-rigid clear plastic case with detailed label, describing attribution information, the coins' pedigrees, and NGC grades. The case developed for this service is made from the same high-quality, inert materials that collectors have come to expect from NGC, and it is thoroughly sealed to guard against environmental hazards and other contaminants.

Eligible covers include:

- 50 State Quarters Official Commemorative Coin Cover
- Westward Journey Nickel Series Official Commemorative Coin Cover
- Sacagawea Dollar United States Mint Official Commemorative Coin Cover
- United States Mint Official American Presidency \$1 Coin Cover
- ...and more!

NGC is proud to be an innovator and market leader creating new products and services that benefit the collector and numismatic marketplace. For more information and submission instructions, visit **NGCcoin.com**.

Sight-Unseen Activity Slows

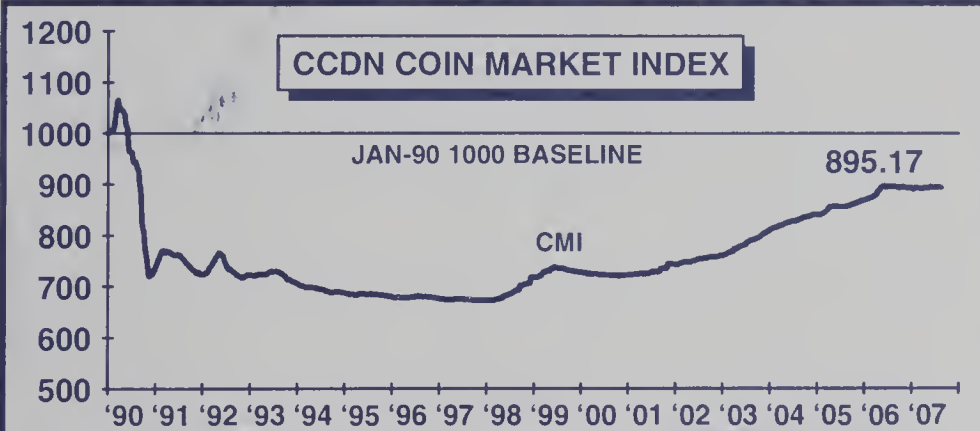

Is This The Calm Before The Storm?

Most dealers and collectors have put the productive ANA road trip behind them as summer wafts through its final phases. Usually, this is a quiet time in the market, yet most hobbyists continue to have their sights trained on rare coin acquisitions. Although many dealers are weary after the summer blitz of shows and public auctions, they too are looking forward to the usual increase in activity by mid September. Consequently, dealers and collectors are on the same page, confident that the bullish coin market will continue its present course. As most dealers are still suffering from lean inventories, they will be especially ravenous for any quality coins that are served up. The Long Beach Expo and related auctions will be the soonest opportunity for fresh material as dealers trek west to attend this important left coast extravaganza, September 27-29 in California. Meanwhile, as dealers review their customer want lists, they will strategize on a plan that will hopefully pay dividends for them. Most wanted items continue to be the better dates in attractive, problem-free condition, so it doesn't look to get any easier finding this material during the last third of 2007.

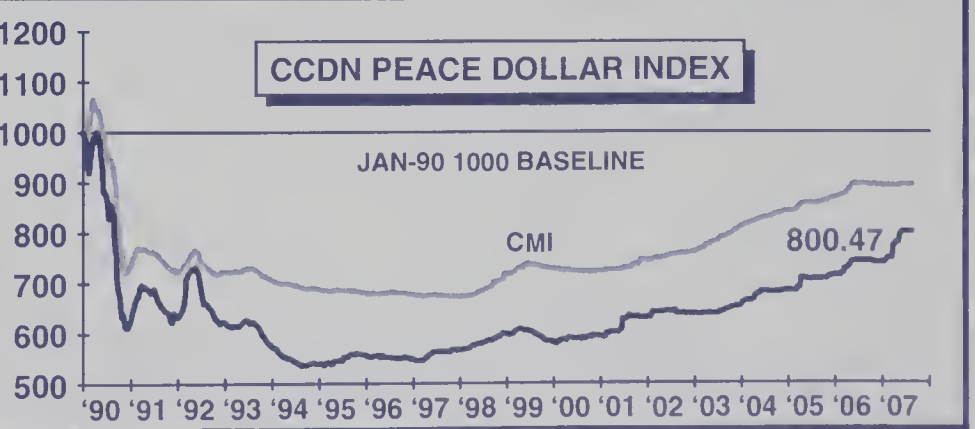

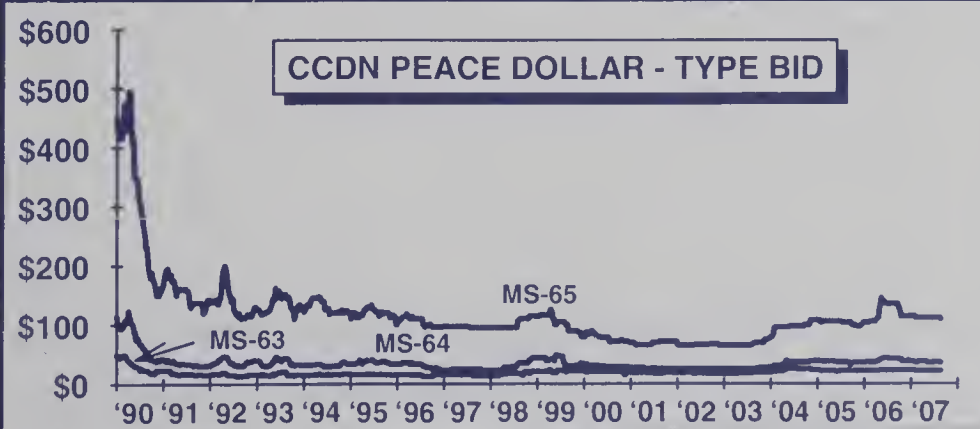

The somewhat weary sight-unseen market has been acting like it should be taking a summer sabbatical. Recent weeks have seen dealers dumping select generic material in an effort to raise funds. Apparently, the majority of this activity has ended. Most dealers are in a strong cash and credit position, despite some outstanding auction bills. This scenario may point towards strong future Bids on the electronic trading networks, at auctions, at shows or any combination thereof. With a number of Silver Commemoratives declining this week, these coins remain the redheaded stepchild of the current coin market. The issues showing minus signs are among the most common for this series. Near Gem and Gem quality examples were sold with an NGC MS65 1935S San Diego giving up 13 percent after a toned specimen sold at auction for under \$100. Other common Silver Commems declining include: an NGC MS66 Maryland and two PCGS MS64s, an Iowa and a 1920 Pilgrim. You can see just how common these Commemoratives are when you realize that there are 551 NGC MS66 Maryland examples and over 1,650 examples each of the

Iowa and Pilgrim Half Dollars. A *toned* NGC MS67 Robinson-Arkansas has been offered for peanuts (down over 20 percent), forcing a new all-time low at \$1,025 Bid. PCGS MS66FB Mercury Dimes are still being offered at significantly reduced levels. Walking Liberty Half Dollars are also seeing a few issues sliding. Several hundred common date Morgan Dollars have traded sight-unseen recently on the heels of lowered Bids. Most Morgans that lost ground in this report were in response to weaker auction results, though the percentage declines weren't severe. An NGC MS65 1900-O at \$104 represents the largest drop at 9 percent. Rare dates are still very much in strong demand. Peace Dollars are relatively quiet, although this lack of activity doesn't preclude one from taking advantage of those few dates selling at public auction for below current sight-unseen Bid. Type, both Mint State and Proof, continue to be quiet in the sight-unseen market, although Mint State Type Large Cents, Bust Silver coinage and select Liberty Seated material, among others, are the beneficiaries of continued strong support. Copper and Silver Proof Type have a legion of followers as well with the strongest area of interest being Proof Gold Type. There are no plus signs in sight, but tons of Bidding at current levels. In the Proof Singles category, Mercury Dimes and early Washington Quarters, though appearing silent, have at least one loud buyer present with visible support throughout the PR66 and PR67 Bid columns. Mint State Gold Type is experiencing some plus signs as Indian Gold and Saints are needed in MS61 and MS62. The slight premium over melt has been widening for Double Eagles recently. Even though Gold Spot is dipping, sellers are reluctant to lower their asking prices on generic Twenties.

eBay makes the news again this week, as the internet auction giant has begun enforcing new rules regarding raw coin listings. The use of Sheldon numbers in listing titles is now restricted to **certified** coins only, which may give a boost to PCGS and NGC material. This news may also be encouraging to those selling slabs as potential buyers will no longer see raw material when searching for coins like an MS65 1881-S Dollar. Such terms as Choice, Gem, Superb, etc. will still be allowed for raw coin offerings.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks. CCDn does not exercise due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied warranty or that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "l" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

NEED TO MAIL?

**Save Money
On Postage!
We will Pre-Sort your
Mailing Labels to get
You the Best Rate**

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

2007 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000 current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class order or Presorted for Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Need a trial sample? Contact us for details!

YES, I want to order mailing labels averaging 5,000+ names from the 2007 Numismatic Dealer Directory. I understand that my \$325 fee entitles me to only one usage of these names. _____ signature

Mint State Gold Type Shines Stack's Leads September Auction Armada

A lot is riding on a continued healthy economy, and the rare coin market is certainly one that benefits during good times. Yet as August comes to a dramatic close, the financial markets remain in disarray; the housing market continues to decline, and many Americans are starting to lose confidence in the overall economic strength of the country. Still, on the numismatic front, optimism maintains its positive spin from dealers that fervently believe prices are headed higher for the stretch run of 2007. Another positive reinforcement comes courtesy of the precious metals. Although volatile too, Gold has maintained stability in the \$660 range, with some pundits stating that the \$700 plateau is highly plausible by year's end. In fact, a major Gold player from Florida has completed evaluating his inventory and found it necessary to raise his Bids to ensure that ample material will be on hand through the holiday rush. A quick look at the surge throughout the Gold Type Bid columns will substantiate this. What you will see on page 4 represents the highest number of increases in this category since May 12, 2006 when Gold Spot was \$711 per ounce.

The upcoming numismatic calendar boasts a flotilla of public auctions as the second half of September sets sail. Leading the armada is Stack's Autumn Sale, September 18th in New York City. (We have listed some of its upcoming highlights.) Next, things get hot and heavy as we shift to the left coast for a trio of pre-Long Beach sales in Beverly Hills, California. Ira and Larry Goldberg C&C is scheduled September 23-26, Superior's effort September 23-25 and Ponterio and Associates September 25-26. Also on September 26th, Bowers & Merena will take final internet Bids as well as sealed Bids at their Irvine, CA office for their September Collector's Choice sale. This robust prelude culminates with the Long Beach Expo, Sept 27-29 and the 2007 September Long Beach Signature Auction by Heritage on the 27-28. This is one of the stronger of the three popular Long Beach extravaganzas, and many look to this show as a buying opportunity and a market indicator. We know that dealers' depleted inventories are cause enough to get them excited about the show's prospects. This myriad of auctions will certainly supply ample opportunity for those still on the prowl for some of the better dates for their customers.

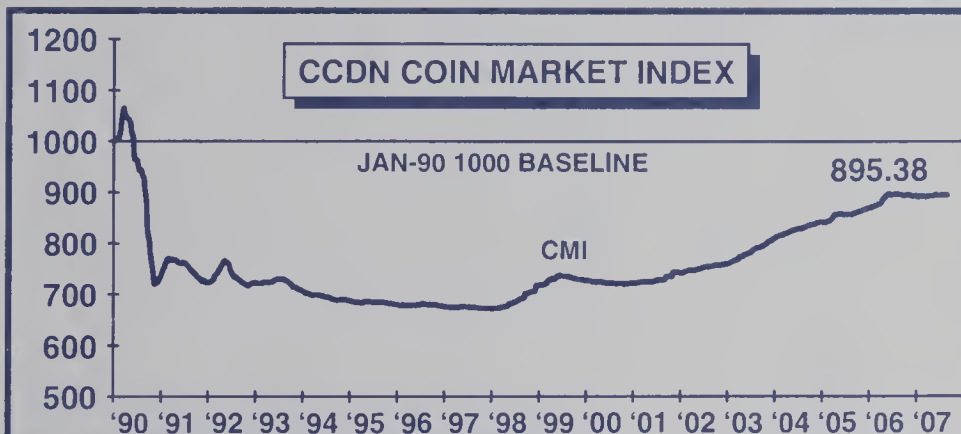

The sight-unseen market is still mixed as the negative territory is a direct result of dealers knowing how important it is to have enough

ready cash available for September's action. Commemorative Gold is a relatively painless way to get some quick money as they are usually available when needed, and they provide solid funds when sold. President McKinley Gold Dollars sure lost their constituents this week. The 1903 Louisiana Purchase/McKinley Dollar and the 1916 McKinley Memorial Dollar both lost backing in grades ranging from MS64-MS67. An NGC MS67 1903 McKinley lost 9 percent after falling below \$5,000 and set a new sight-unseen all-time low. It is also approximately 35 percent below the \$7,500 Bid it attained as recently as March of this year. Conversely, we don't see any mass sell-off occurring among Mint State Gold Type despite the nation's credit crunch. Instead, there seems to be solid demand with increasing Bids in all denominations and virtually all grades. Yes, this is numismatic Gold, but owning some is still another safe way to ride out economic storms. Increases up to 10% and over are taking place in a wide cross section of issues, some much more scarce than others. Among common Type, the \$5 Liberty With Motto in MS61 is up over 10 percent for both grading services. Also, check out the 5 percent increases for Gem \$5 Indians. PCGS/NGC combined population for MS65 \$5 Indians stands at 1,111. Compare this to the 40,540 grading MS62. Or the 25,704 tabulated for MS63 specimens. Walking Liberty Half Dollars, popular enough with collectors, are sprinting ahead this week. Generic MS66 examples are hot, as eight dates leap by as much as 14%. At these levels, who can resist? A dozen or so Morgan Dollars were on the downside this week. Dealers are trying to put themselves in a position to ride out any credit crises by staying lean,

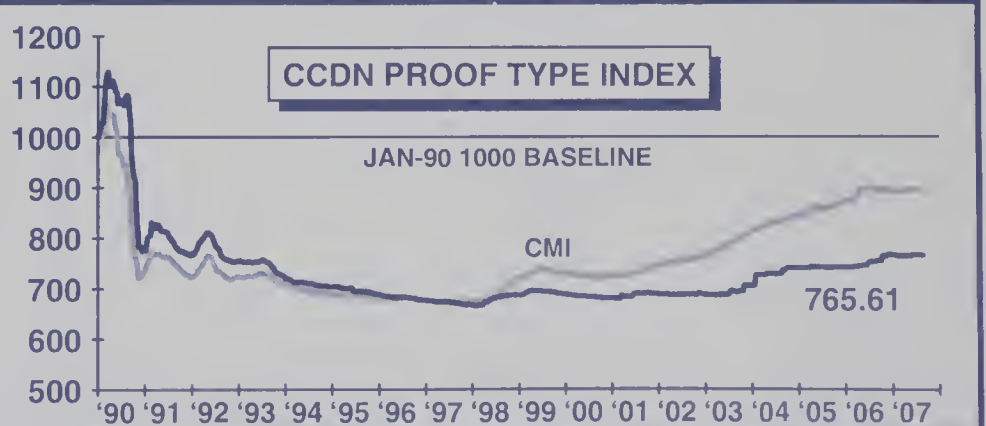

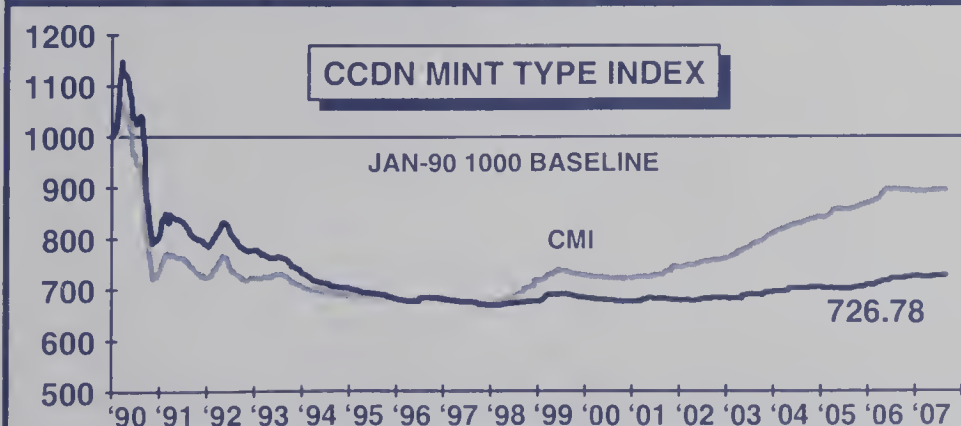

while keeping their best coins available in inventory. Two popular Gem Carson City Morgan Dollars, an 1891CC and a 1900O/CC have been reduced by more than 5 percent each due to lower asking prices. On the positive side, a half dozen generic Peace Dollars turned slightly higher. Mint State and Proof Type remain rock solid as widespread supporting Bids remain in place at current levels.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Spot Gold Poised To Break \$700 Barrier Sight-Unseen Market Active, But Guarded

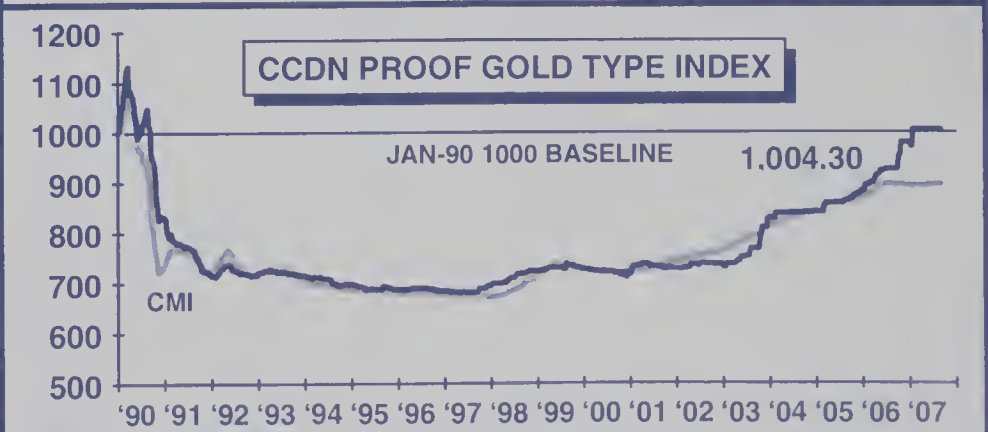

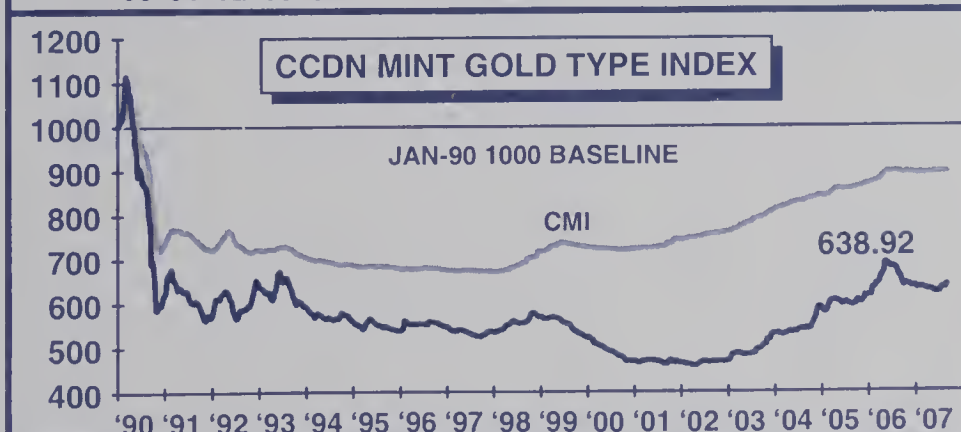

Financial markets continue their roller coaster like volatility as nervous traders try to mitigate their concerns. Consequently, the rare coin market is proceeding to ride on the cautious side, but this doesn't mean liberally strong Bids aren't available for exceptional coins. Liquidity was badly needed to support the economy in light of the credit crises, and the Federal Reserve Bank responded. We are not out of the woods yet, though, because future rate changes for those holding adjustable rate mortgages will be taking effect over the next several months and into 2008. Dealers are aware of the higher cost of credit now, and liquidity is an essential tool for doing business. Fortunately, many dealers maneuvered themselves into a strong cash position just prior to the August ANA. By the end of the show and auctions, many were able to retain much of their cash as they weren't able to spend all the money they had allocated. September, being an auction-rich month, offers numerous opportunities to spend those additional funds wisely and rectify deficiencies and rare coin shortfalls. Many dates and denominations remain unfulfilled on customers' want lists, and it is this underlying demand that helps keep the coin market bullish. In addition, the market will likely get a boost from the precious metal sector as Gold, in particular, **rockets** through \$690 with its trajectory appearing to be headed for the \$700 major trend line.

Activity is increasing as dealers are getting a jump on their to-do lists by hitting the sight-unseen market for additional positioning, just prior to the September auctions and Long Beach Expo. Stack's Autumn Sale, September 18, in New York City is first up. What is the precipitously higher Spot doing for Mint State Gold Type? Well, nearly all denominations are showing increases. Interestingly, while the bullion sensitive \$20 Liberty and Saint-Gaudens issues are indeed higher, the perceived volatility may indeed be preventing bolder Bids. Other news regarding Gold coins involves ICG slabs as several continue to sell at auction for well below their sight-unseen Bids — some by as much as 23%. Remember, these are retail sales, when in fact wholesale dealers are offering to pay more **sight-unseen**. Silver Commemoratives remain lackluster, as they have

been for the past several months. However, the degree of decline is lessening as is the number of issues declining. It's a different story when it comes to the Gold Commems, as many increases are taking place for a pleasant change. One dealer is stepping up to the plate in a big way, hoping to score with some hits to his higher Bids. At least 10 Gold Commem Dollars increased 3 percent or more as MS64 and higher grades are being targeted. These "undervalued" jewels could only drop for so long before somebody noticed a buying opportunity. A PCGS MS64 1917 McKinley Gold Dollar gained the most constituents, leading the pack by jumping 8 percent in the Bid polls to \$1,300. Morgan Dollars, a good indicator of market conditions, are displaying mixed results with the bias leaning to the plus side. Some weakness is rather noticeable, though, as MS63 and above ANACS and ICG issues suffer losses. For example, an ICG MS66 1921D gave up more than 20 percent after its poor auction result. GSA "CC" cartwheels are attracting Bidders. For some time, these special Morgans have been soft, but now they finally have the support they've been looking for. What could one say about Type? Terrific demand continues to impress this segment of the rare coin market. Dealers have repeated their customers' needs in this area, and it is continually confirmed by numerous supporting Bids and some higher postings. Early coinage is responsible for the largest portion of the demand as dealers target the Flowing Hair and Bust denominations of all metals. NGC is capturing the lion's share of increasing Mint State Type Bids as select Bust Dimes, Quarters and Half Dollars move higher. Proof Type remains healthy with a hearty supply of supporting Bids throughout. Mint State examples for the three popular designs: Buffalo Nickels, Mercury Dimes and Walking Liberty Half Dollars are a bit sluggish in both PCGS and NGC. While the better dates of each of these series continue to find buyers, the sight-unseen Bids are being placed prudently. Increasing interest is noticeable among ICG and ANACS Walking Liberty Halves. Higher ANACS Bids are particularly impressive as over a dozen plus signs pepper the Walkers in MS61-MS66 columns.

The Fine Print

*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CONECA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. No cash refund. This offer precludes or supersedes the terms and conditions on the ICG grading submission form.

NGC and U.S. Mint Coin Covers The Perfect Companions

*Just another way
our rare commitment is
redefining the hobby.*

NGC Certifies Official U.S. Mint Covers in Original Issue Holders

NGC grades and encapsulates coins enclosed in their original covers, preserving their historical significance and pedigree while receiving the advantages of an NGC-certified grade.

The entire cover, with coins still enclosed, is sealed in a semi-rigid clear plastic case with detailed label, describing attribution information, the coins' pedigrees, and NGC grades. The case developed for this service is made from the same high-quality, inert materials that collectors have come to expect from NGC, and it is thoroughly sealed to guard against environmental hazards and other contaminants.

Eligible covers include:

- 50 State Quarters Official Commemorative Coin Cover
- Westward Journey Nickel Series Official Commemorative Coin Cover
- Sacagawea Dollar United States Mint Official Commemorative Coin Cover
- United States Mint Official American Presidency \$1 Coin Cover
- ...and more!

NGC is proud to be an innovator and market leader creating new products and services that benefit the collector and numismatic marketplace. For more information and submission instructions, visit **NGCcoin.com**.

Gold Type Surges As Bullion Blitz Persists Ebay Tightens Coin Auction Rules

The rare coin market generally does well when the economy is healthy, and dealers and collectors watch with interest if any changes are taking place. Commanding everyone's attention today is Gold surpassing and holding above the \$700 per ounce benchmark for five consecutive days in extraordinary trading. This surge represents only the second such occurrence in history. The first was in 1980, when Gold reached its historic high of \$850 per ounce. In May of 2006, Spot did rise above \$700, but that visit was short lived as the rally fizzled after only two days. Obviously this time around dealers are taking the Gold rush of 2007 more seriously as even generic \$20 Saints have increased substantially in MS61 and MS62 since our last report. What had been a comparable spread between these entry level numismatic coins and Gold bullion such as American Eagles and the like has widened with the increase in the collector demand and appeal of these numismatic offerings. Of course this doesn't necessarily mean smooth sailing for the rare coin market as other factors must be observed. Yet the benefit for many of the more bullion related Gold Type pieces, those that rely on an increasing intrinsic value rather than only collector demand to advance, is incredible. Dealers are also observing strong interest and strong Bids being entertained for rarity and early and better Proof and Mint State Type material.

Those of you looking at this week's sight-unseen market for Mint State Gold must be encouraged by the sheer demand. A plethora of Mint State Gold Type is escalating, as is to be expected given the current strength of the yellow metal. A declining dollar is certainly aiding in the decision of those looking for a golden safety net. Several relish double-digit gains here as a flight towards Gold is quite evident. Still, the Gold Type hitting the highest percentage gains is for those coins having a greater degree of numismatic value compared to the most common bullion sensitive representatives. \$10 Liberties with Motto are leading the onslaught as NGC MS66 specimens claim a \$5,400 Bid: an imposing 17% advance. The popular \$5 Indians are taking in nearly a 16% hike as MS63 examples from both services race to \$1,900. Rounding out the double-digit parade are NGC

MS65 \$10 Indians up 12%, and their PCGS mates claiming an 11% push. The again in-demand \$3 Princesses are sprinting as those grading MS64 are up 11%, charging to \$7K. As we alluded to, even the more bullion sensitive \$20 Saints are marching as MS61 examples are up a solid 11% since our last report, as multiple examples are needed at \$760. All in all, an amazing 98 plus signs are recorded!

This demand is lifting several of the better Silver Commem issues as some believe them to represent an excellent value right now. The 1935 Hudson Sesquicentennial Half Dollar tops the list with a powerful 14 percent spike to \$1,350 Bid for NGC MS65. On balance, though, most Bid increases were rather modest. Since NGC has graded and certified 474 MS65 Hudson Halves, it probably won't be very long before this Bid is hit. Gold Commems are holding with supporting Bids evident at current levels. Morgan Dollars, like last week, remain mixed with the negative eclipsing the positive. Percentage changes are not large enough to establish a trend in either direction, although massive quantities continue to trade at current levels. The Proof and Mint State Type markets are relatively quiet. Yet Gem Barber Quarters in Mint State 65 and 66 are considerably higher as a well-known East Coast dealer raises the action by over 21% for MS65 specimens graded by PCGS.

Gold isn't the only story making headlines this week as eBay representatives have begun informing dealers that the auction giant is continuing to revise its policy on certified coin auctions. Now, in addition to the Sheldon number restrictions previously reported, coins listed as certified must be in a slab from one of the following authorized services: NGC, PCGS, ICG or ANACS, and a photograph of the entire slab — front and back — is required as well. While some auctions have already been shut down for not meeting the photo requirements, the grading service rule will go into effect Monday, September 17th. Auctions for coins in slabs such as PCI or SEGS must now be listed in the uncertified (raw) category, and sellers may not make any reference to the grading service, value, numerical grade or price guide.

The rare coin market will assume an accelerated pace as the Stack's Sept 18 auction, Superior and Goldberg Sept 23 Pre-Long Beach Sales and the Long Beach Expo and auction get into high gear. Heritage will host the Long Beach Signature Auction Sept 27-28. We have listed a few of its many highlights.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

The choice for the Millennia Collection was NGC

*“NGC is the most
knowledgeable in the field.”*

— Ira Goldberg, President, Co-Owner
Ira and Larry Goldberg Coins & Collectibles

The Millennia Collection features over 1,000 of the most important world coins from ancient times through the early 20th Century. Many predictions suggest that when this collection sells in 2008, it will become the most valuable collection of world coins ever sold.

We are proud to say that the entire Millennia Collection has been certified by Numismatic Guaranty Corporation. This important collection deserves nothing less than the rarest commitment.

Ira Goldberg, of Ira and Larry Goldberg Coins & Collectibles, who will sell the Millennia Collection on May 24-28, 2008, stated, “NGC is the most knowledgeable in the field. We chose them for their accurate, unbiased, third-party opinion of grade, and also for the protection that their superior holders give to these coins.”

All of the most important collections to come to market in recent years have been authenticated and graded by NGC, including the Eliasberg World Gold, Reiver, and Damon collections.

For the world's greatest coins, the clear choice is NGC.

Gold Type Pandemonium Continues

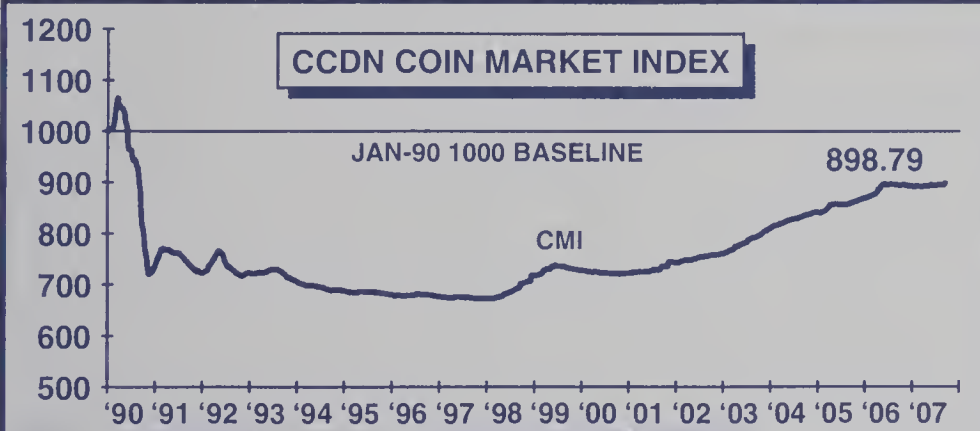

Long Beach Expo & Auctions On Deck

Autumn is upon us, yet there is apparently no fall for the precious metals. Gold in particular has provided much of the kindling to generate extreme heat as summer comes to a blistering close. The stampede to Gold Type coins has clearly coincided with Gold Spot racing through the \$700 threshold and then eclipsing the \$730 barrier. Now, as dealers prepare for the all important West Coast junket, they are fielding an onslaught of inquiries from the excited public wanting to get onboard the golden express. Dealers, in a word, are ecstatic. This demand, coupled with instant higher prices for bullion sensitive coins, means Gold "stuff" that has been languishing in inventory can now be sold. With final preparations honed, those making an appearance at the Long Beach Expo and related auctions will appreciate these late September sales even more when they have ample cash available for purchases. Their first opportunity came on September 18th as Stack's Autumn Sale realized just over \$2 million in New York City. (We have listed several certified highlights.) As we exit stage left, September 23rd is the opening date for the Superior and Goldberg Pre-Long Beach sales in Beverly Hills. Next on the grueling agenda is the highly anticipated Long Beach Expo which opens September 26th for dealer set-up day. Of course, keen competition is expected during this show and auctions because many of the coins in demand today have been making their exodus from the market at an alarmingly rapid rate. These coins have found their way into the tight hands of collectors/investors that aren't willing to sell just to claim a quick short-term profit. Consequently, those collectors still trying to accumulate some quality rare coins are having a rough go of it. Dealers tell us their customers are becoming frustrated by the lack of quality material that is available. These educated buyers are looking for a wide spectrum of dates and denominations, but unfortunately, they aren't able to locate all they want at today's levels.

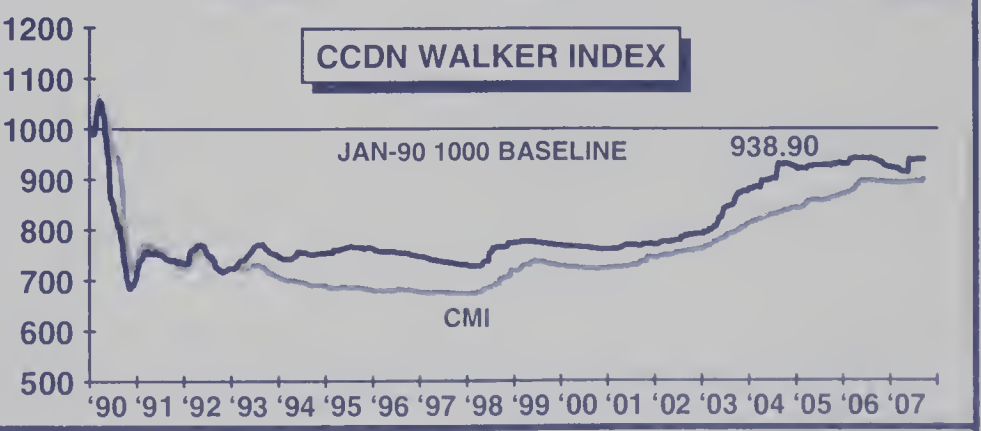

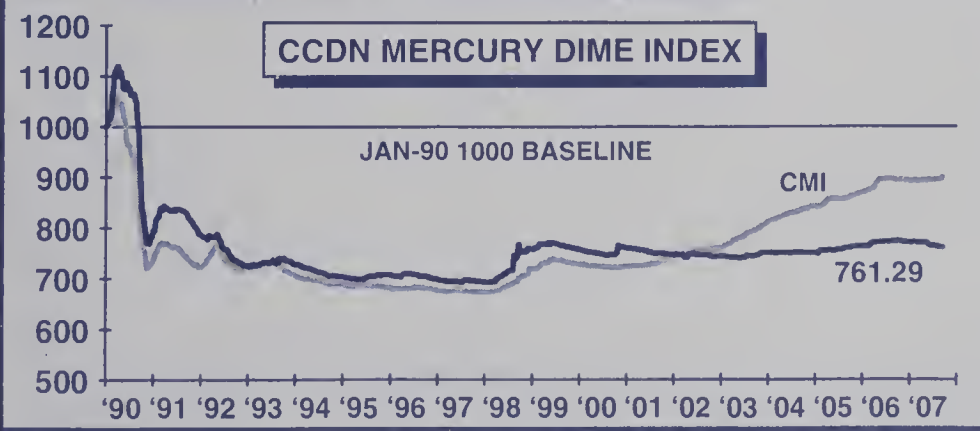

The sight-unseen market is a beehive of activity this week. Gold Type, as expected, is leading the charge of the golden light brigade as bullion buyers rush in to accumulate

as much of the yellow metal as they can get their hands on. Naturally, this includes common date numismatic Gold Type where a barrage of issues have posted plus signs in grades ranging from MS61 thru MS66. The percentage gains range from nominal to just over 10 percent. NGC and PCGS MS63 \$10 with Motto Liberty issues claim the strongest escalation at 10 and 7 percent respectively. It won't be too difficult for dealers to find examples, as PCGS and NGC have graded over 53,000 in MS63. Take a look at the \$20 Saint-Gaudens chart to see how strong Gold's push affects rare coins. Nearly every date and mintmark is seeing action, with dozens enjoying double digit percentage increases since our last Saint report. Silver Commemoratives are a good example of the strong activity occurring in the overall market as the plentiful increases and decreases leave this category a bustling mixed bag. The true strength among Commems is for those struck in Gold. Everyone wants Gold today, and we observe strong demand and percentage increases for select issues, especially for Quarter Eagles. For example, the \$2½ Pan-Pac in MS64 thru MS66 is higher this week, and the \$2½ 1926 Sesquicentennials in MS63 and MS64 lead the Commems, rising over 15 percent each. Surprisingly, Morgans are quiet, with generic MS65s maintaining their \$100 Bid level. This is in stark contrast to May 2006, the last time Gold went up over \$700, when common cartwheels were 40% higher at \$140 Bid in Gem. Peace Dollars continue to impress, as buyers are lined up for most issues in several grade columns. In fact, sight-unseen buyers are present for every single date and mintmark in MS64 at Bid or more. Buffalo Nickels got a surprising leg up as the popular 3 legged 1937D grading PCGS MS64 shuffled a 29% advance to \$6,000 Bid. Walkers found motivation too, as the key to short-set, 1941S found NGC MS65 examples sprinting 44% to \$575, matching their PCGS mates.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers - are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Turnaround Times: The 7 Day Guarantee™: ICG will send you a certificate for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If you submit 10 coins for grading and the turnaround time is less than 7 days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which is subject to verification errors (ON/CN). ICG will send you a certificate for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Not valid for business grades or submissions for coins and conditions by the ICG grading customer form.

Every Numismatic Library needs copies of the latest addition to the
COIN DEALER newsletter family of publications:

the Backsheet

Now that we have your attention, we really haven't started an additional newsletter — but your library should include **Back Issues** of our publications. Back issues are available two ways:

You can purchase small quantities to fill in missing issues, to obtain articles necessary for your research, or to follow your special interests. You may also combine your order for back issues of any of our publications to obtain the lowest price:

1-10 issues - \$2.50 each • 11-25 issues - \$2.00 each • 26 & over - \$1.50 each

Or, you can purchase *complete sets* of back issues for really dramatic savings:

Complete set of the weekly **Coin Dealer newsletter (Greysheet)**
 from June 14, 1963 to December 22, 2006, now includes 2,220 issues.
 At \$1.50 each this would normally cost \$3,330, but a complete set
 is only \$2,250.

Complete set of the monthly **CDN Monthly Supplement**
 (formerly the Monthly Summary)
 from August 1976 to December 2006, now includes 365 issues. At \$1.50
 each this would normally cost \$547.50, but a complete set is only ... \$425.

Complete set of the **CDN Quarterlies**
 from January 1992, to December 2006, now includes 180 issues, a
 complete set is only \$200.

Combined weekly **CDN (Greysheet), Monthly Supplement & Quarterlies**
 now includes 2,765 issues, and extra savings at only \$2,750.

Complete set of the weekly **Certified Coin Dealer newsletter (Bluesheet)**
 from August 22, 1986 to December 22, 2006, now includes 998 issues.
 At \$1.50 each this would normally cost \$1,497, but a complete set
 is only \$1,025.

Complete set of the monthly **Currency Dealer newsletter (Greensheet)**
 from September 1980 to December 2006, now includes 316 issues.
 At \$1.50 each this would normally cost \$474, but a complete set
 is only \$375.

1921 Saint Captures \$1 Million Trading Thrives Opening Day In Long Beach

The Long Beach festivities are in full swing and thriving as we have already seen nearly \$15 million in rare coins and paper money change hands at public auctions in Southern California. Three Pre-Long Beach sales are in the books as we go press. Bowers & Merena claimed nearly \$1.4 million with Superior realizing \$2.7 million, while Goldberg's offering took in over \$10 million. This triumphant triptych of sales was held September 23-26 in Beverly Hills and Irvine. We have listed a few of the many certified highlights from the expansive Goldberg auction. Dealers were thrilled with these sales, which provided a much-needed opportunity to purchase those tough coins needed for inventory and waiting customers. The prices realized clearly confirm the availability of strong money for the right coins. Indeed, there seems to be a massive sum of cash out there chasing select rarities, which is certainly indicative of the bull market that has accelerated throughout 2007.

With that said, autumn has been a golden one thus far, as the yellow metal catapults out of its narrow trading range to the \$730 threshold. The excitement from this escalation is seen worldwide as buyers from Asia and Europe seek protection and financial refuge that's afforded them by owning Gold. In the United States, many calculating citizens are trying to shore up their wealth as well. As action remains hot, interested individuals have been on the horn and traveling to rare coin shops in great numbers throughout America. It's not only the tire kickers, as serious demand is brewing from established collectors, while dealers are doing their utmost to satisfy this burning demand.

On the Long Beach bourse, dealers concur that the market is robust and healthy, and most were thrilled with their opening day tallies. A wide spectrum of early Type coins continue to cater to extreme demand. Not surprising is the strength seen for early Gold Type material, also piping hot for all denominations. Nice Type coins are readily selling on the floor as well. One dealer completed a tidy \$150,000 in business while another sold a PCGS MS64 1927S Standing Liberty Quarter, wholesale, for approximately \$10,000. The non-Gold generic market is also improving. Common date Morgans are creeping higher, though the rare dates are seeing fewer increased Bids. Walkers are still somewhat spongy, but common dates in MS65 and better are still trading. Demand for high end Mercury's is on the rise as buyers prowl for a healthy array of PCGS MS65-MS65FB

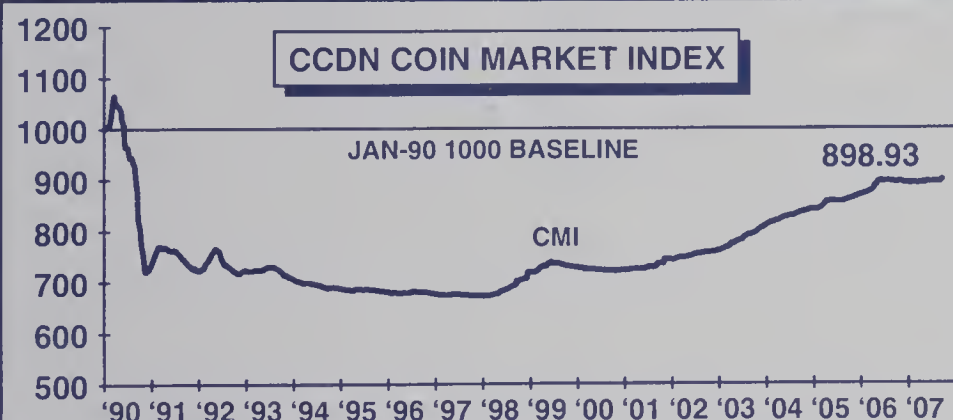

examples. One dealer summed up his pre-public trading day by revealing that he accomplished more than at any other Long Beach show in recent memory.

On yet another positive Long Beach note, PCGS is displaying a portion of their massive grading set at the show, providing additional excitement and an opportunity for learning. Piquing the curiosity of both the seasoned dealer and neophyte collector, this remarkable assembly includes multiple examples of the most popular U.S. coins from grades AG3 to MS67. In addition, a full case of problem specimens in PCGS holders provides quite an unusual sight, as such material is customarily returned in body bags—not slabbed—under normal circumstances. Of course, these coins, presented for educational purposes only, are clearly labeled as being whizzed, artificially toned, altered, environmentally damaged, cleaned, etc. Another fascinating feature of this collection includes counterfeit and altered material. One such piece that was allowed to float around the bourse Thursday afternoon fooled several experts: A Gem 1927 Saint-Gaudens with an added D mintmark.

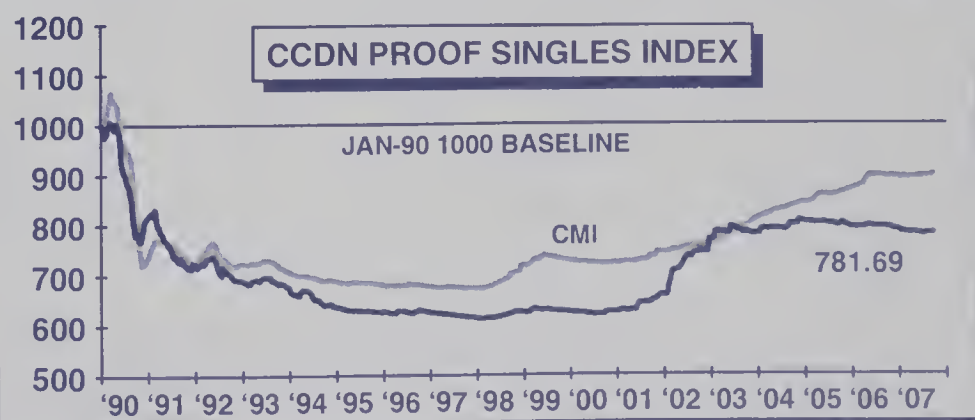

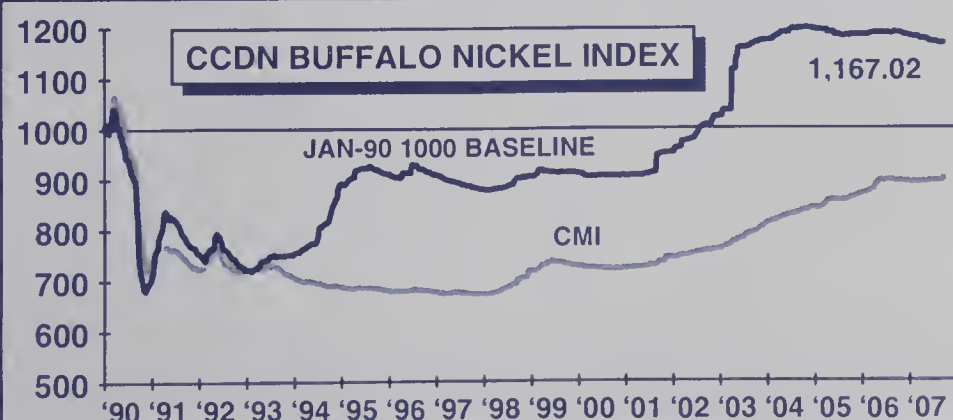

The sight-unseen market is fashioning more signs of strength as well. Just take a look at this week's market column as many Pre-Long Beach auction results reflect this health. Yes, even Silver Commems found some slight increases. We also note that generic MS65 Morgan Dollars are finding new blood as dealers raise the blind buy 4 percent. Generic MS66 Peace Dollars offer some solid action with a NGC 1923 taking top honors, jumping more than 13 percent to \$425 Bid. The tough 1934S is always in demand as a 5 percent elevation takes NGC MS65s to \$4,500. Type, both Proof and Mint State, is showing little in the way of plus or minus signs, but dealers tell us that the

general Type market is very raucous. Gold Type produced powerful action again as the Type III \$20 Libs pound out a 31% hike. Many late date Full Banded Merces are rising as a well-known West Coast dealer is putting a Bidding charge under PCGS MS65-MS67 material. One should be forewarned that these increased levels will likely subside as numerous examples routinely sell for less in retail venues.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks. *sell lists* coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month, "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Wanted: Matte Proof Lincolns Pair Of Rare Eagles Nest On \$6.7 Million

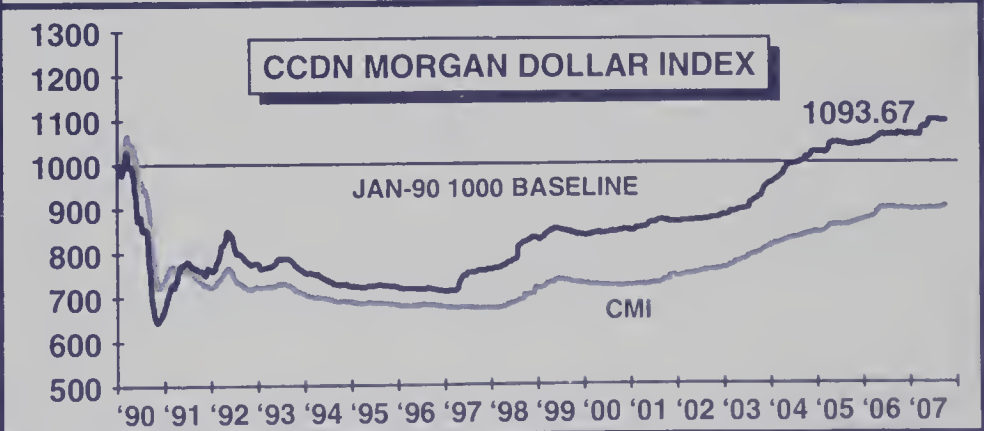

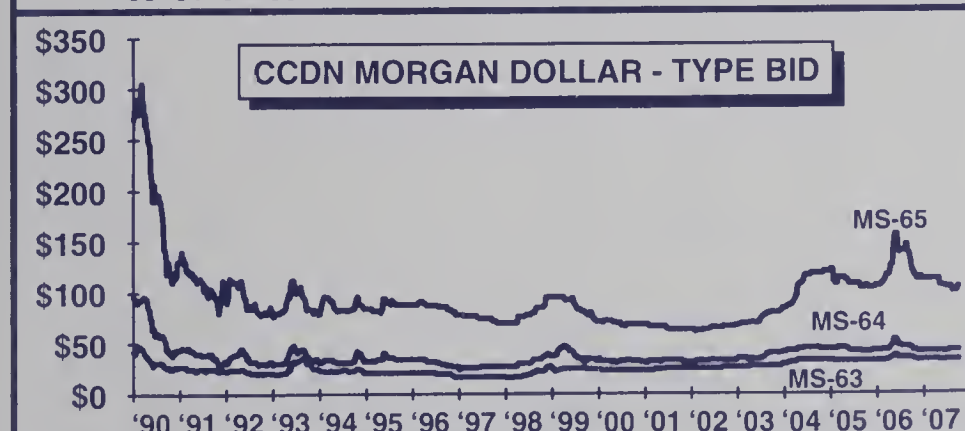

On the heels of an active Long Beach adventure, many dealers and serious enthusiasts are headed back to their home confines, by most all accounts having had a productive show in Southern California. Although the bourse was active and solid prices were had at the various public auctions, the void for many want list items remains tantamount. While original and eye appealing material was somewhat difficult to come by, what was available was selling for much more than what dealers had budgeted for. Some had to capitulate to the prevailing market, while others had to hold off. Fortunately, Gold bullion was having an unusual, stellar Long Beach performance that dealers are just not used to. This in itself was able to stem the tide for some who were otherwise unable to locate much in the way of coveted early rarities and Type coins. Yet amazingly, after a series of California public auctions which realized over \$25 million, it was a pair of private transactions which told the tale of this torrid market. Two of America's most famous, rare Gold coins have been purchased for record prices. One of the four known plain 4 1804 Proof Eagles graded NGC PR65★ Ultra Cameo was sold for \$5 million on September 26, 2007 in a transaction brokered by Albanese Rare Coins of Albion, New York. In the same transaction, the buyer, apparently having Gold fever, also acquired the Farouk/Pittman specimen PCGS PR65 1838 Eagle for \$1.7 million! David C. Albanese said that the buyer and seller wish to maintain anonymity, only revealing that both are Northeastern United States entrepreneurs who have been collecting coins since they were young boys. Superb rarities as well as premium quality and attractive coins are those that everyone is currently chasing. If the budget allows, and coins can be found, deals will be struck immediately. As the mega sale above illustrates, buyers are looking to acquire early Gold and nice Type whenever they can. Rare dates and interesting coins are also a hot commodity these days. Naturally, it takes a great deal of money to capture such material, but evidently, plenty of cash is available today for the right coins.

The sight-unseen market is cognizant that fall is here and is begrudgingly obliging with sundry minor rollbacks. There is no need to fear because select material is still finding willing and sometimes strong buyers. It is not entirely

surprising to see some declining issues because September's auction bills will need to be paid pronto, so dealers are looking to "blow out" some coins. With an eye on the calendar, they will also be gearing up for the holiday season and looking to raise additional funds. Silver Commems continue to face the music as the numismatic maestro lowers the baton on these coins that are favorites for obtaining some quick cash. Gem examples readily sold at auction at levels up to 14 percent below the last known Bids. Gold Commems, though quiet, are holding their own, thank you, and attracting more interest at current levels. Morgan Dollars display a touch of softness, but this can be overshadowed by the fact that many buyers are sniffing around looking to add these popular cartwheels to their collections. Mint State Type is relatively silent as a few issues trickle back. There is some startling demand for Proof Type. Matte Proof Lincoln Cents are hot with buyers looking for Brown, Red & Brown and full Red specimens. Dealers are chasing after these Copper Cents in all grades with several issues hitting double digit gains. Serious Type collectors are eager to include a nice early Matte Proof Lincoln Cent to their holdings. This seemingly insatiable demand has helped drive prices skyward as at least one dealer is Bidding up on every date and grade. Perhaps the interest in this coin category is being fueled by the upcoming, newly designed Lincoln Cents, scheduled for takeoff in 2009, celebrating the bicentennial of our 16th President's birth. The new obverse designs for the four commemorative cents, each of which represents a significant phase in Lincoln's life, have been recently recommended to Treasury Secretary Henry M. Paulson. Mint Gold Type has been extremely volatile, matching the gyrations in the price of the yellow metal. Gem Buffalo Nickels succumbed to auction pressure as a small herd headed south. An NGC MS66 1929S lost more than 33 percent to \$465 Bid as a result of its weak auction appearance. Select Gem Mercury Dimes, Walking Liberty Halves and Proof Walkers also found minor tweaking in early October. On the other appendage, it is a little different for ANACS and ICG issues. Value seekers are pushing Bids higher in several areas with Gold Commems, Gold Type and Walking Liberty Halves paving the way higher as a few new players enter the arena.

A photograph of a 1910-D Buffalo Nickel coin held within a blue, textured plastic protective holder. The coin is centered in a square window of the holder. The holder has a label at the top with the following text: "1910-D" on the left, "10c Nickel" in the center, and "117" on the right. The coin itself shows the profile of a bison facing left, with the date "1910" and the mint mark "D" visible. The holder has a wavy, decorative border.

Gold Surges Past \$750 Market Fueled On Southern Comfort

Hospitality that the deep south is noted for has apparently followed the rare coin market to Atlanta. Initial confirmation is that the Whitman Coin and Collectibles Expo bourse is a bustling marketplace. Those in attendance are highly optimistic, motivated and perhaps a bit pleasantly surprised at the significant business taking place in Georgia. One dealer sizing up the situation reported that things are looking exceptional and trading is quite brisk. Another said that, judging by the solid number of top dealers in attendance, coupled with the thriving activity level, his pre-show expectations have already been eclipsed by a sizable margin. With an assist courtesy of Gold Spot's surge over \$750 per ounce, Gold coins of all denominations are selling like hot cakes. Many established collectors, as well as those potential new customers drawn in by the surging metals and related media hullabaloo, have voracious appetites and need that Gold fix now.

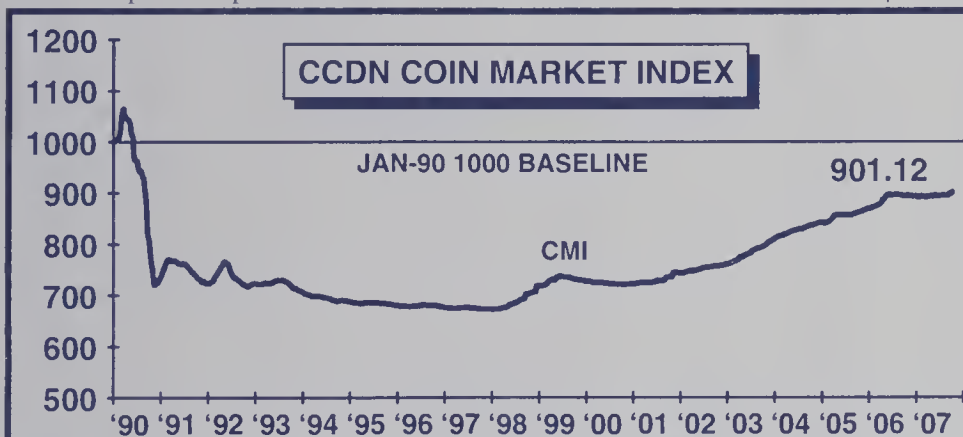

While some retailers, especially the Mom and Pop shops, may be on the cautious side when it comes to restocking Gold Type at these near record levels, stocking up on Gold is exactly what one wholesale dealer is enthusiastically attempting. One of the quickest ways to accomplish such an inventory boost is through the sight-unseen electronic trading networks. This dealer, who's been an active fixture on the circuit, said, "We are focusing on Gold right now because it's been so strong. We are trying to buy Gold coins sight-unseen in all denominations in Uncirculated grades." The propensity of demand honed in on \$10 and \$20 Liberties; \$10 Indians; and the \$20 Saint-Gaudens. Believing an important aspect of today's demand is that buyers are willing to own this Gold in quantity, he adds, "We are willing to purchase 25 to 50 pieces of these denominations if we can get it." This is the case because promoters and telemarketers have the sales to warrant this demand.

Yet remember, it's not only Gold that's driving this bull, as there are many people looking to buy truly rare coins right now, and that's a sign of a market where prices could be headed even higher. While not carrying quite the same intensity of Gold, there is significant sight-unseen demand for generic Morgan and Peace Dollars in MS64-66. Renewed interest in better date MS65 and MS66 Morgans exists as well, but these coins are being eyed with sight-seen Bids. One item not in the bargain bin is Matte Proof Lincoln Cents. Last week we noted strong demand for Type, and this week it is even more defined as individual dates are swarming with advances. Check out the 28 percent spike for NGC PR64 Red 1912 Lincoln Cents at \$900 Bid. (It won't

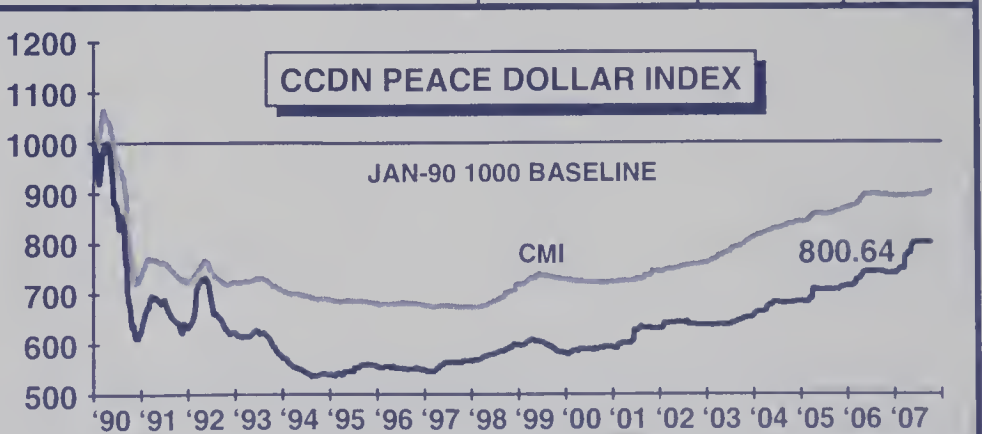

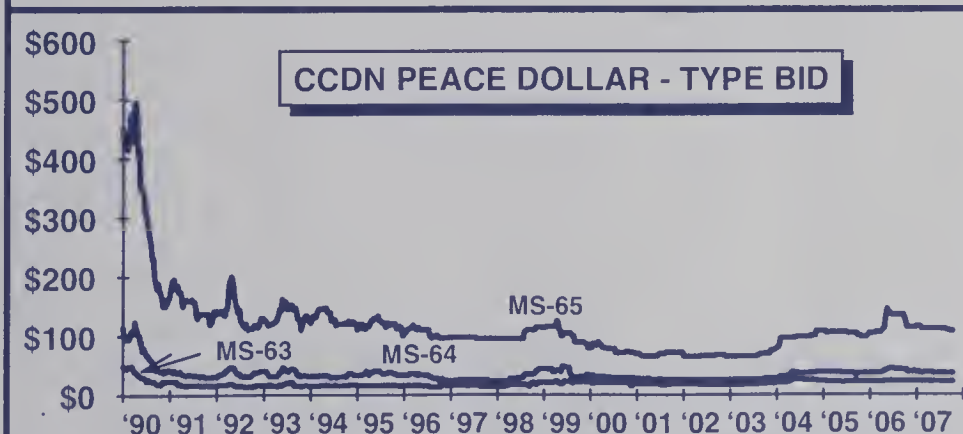

be easy for the buyer as only 10 have been awarded this level with just two better.) Strength in this market segment has provided a boost to the *CCDn Coin Market Index*, which topped 900 for the first time since August 31, 1990. It has taken over 17 years for the sight-unseen marketplace to return to this level. At that time, Gold was trading at \$388 per ounce compared to \$751 today; Silver was at \$4.84 vs. \$13.88, and Platinum was only \$482 compared to the \$1,420 it trades for now.

Not surprisingly, select Silver Commemoratives continue to have plague-like symptoms, being tossed aside when cash is the remedy. The top loser was an NGC MS66 1935 PDS Texas Independence Set that all but surrendered the Alamo after giving up more than 11 percent to \$1,000 Bid. Gold Commems lost a little gleam as a trio of \$1 McKinley issues slumped nearly 5 percent each. A small group of Morgan Dollars took it on the chin, yet we don't see many better dates participating, and the decreases aren't that troublesome. Combating this, buyers took a shine to a number of Philadelphia Mint common dates in MS64 Prooflike as they reflect nearly a 7% gain. Mint State, Proof, Proof Gold and Gold Type markets are all holding firm. Apparently, dealers aren't looking to dump many of these coins as willing buyers are lined up like Chiclets ready to pounce on any offerings at current levels. Dealers will keep busy in October to be sure. After Atlanta, many will head north to New York City to attend Stack's 72nd Anniversary Sale October 16-17. Then, it's on to St. Charles, MO for the Silver Dollar and Rare Coin Exposition and Scotsman Auction beginning October 17th. Coinfest concludes a busy October in Old Greenwich, Connecticut on the 27th-28th.

As you will recall, John Albanese, founder of Collectors Acceptance Corp, created a stir recently when he laid out plans to provide a sticker for coins considered solid to premium quality for the grade. Though met with initial apprehension by some, others expressed optimism, notably, Mark Salzburg, president of NGC. Salzburg feels this service will be helpful as he believes many NGC certified coins are indeed PQ. Now, PGCS has announced it is considering providing a similar product, and is asking for input on this and other ideas for change. In addition to the PQ designation, PGCS is pondering encapsulating problem coins, allowing non-PCGS coins in their Set Registry, and giving a PCGS grade to 3rd party slabs that don't crossover. Such offerings represent a significant departure for PCGS, a company previously perceived as being uninterested in providing the above-mentioned services.

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

PROOFLIKE MORGAN DOLLARS

P.L. Dollars may be semi-reflective with less reflectivity than the design-matrix Proof-like.
Bids for P.L.s are usually much lower than for DMPL.s but command some premium over non-P.L. strikes

Type Gold & Generic Dollars Escalate Stack's Sale Realizes \$7.4 Million

Just how strong is the rare coin market? Consider this: at the conclusion of Stack's 72nd Anniversary Sale, Oct 17, a tidy \$7.4 million was realized. Ten coins we listed as highlights from this sale accounted for nearly half of that total, bringing in \$3.6 million. Yes, as October rolls on, buyers are lined up for five and six figure rarities as well as the esoteric. It's absolutely amazing; a handful of coins in the elite Million Dollar Club have exchanged in the last quarter alone. The most recent to achieve this exalted status is a PCGS PR64 1894S Barber Dime, the second time one of these classics has sold within the last 90 days. The finest known PCGS PR66 example made headlines with its \$1.9 million splash on July 23rd. Of course, as Gold Spot holds its head above \$760, the floodgates open for tire kickers and other metal enthusiasts. These newly interested participants often find themselves being courted by dealers anxious to educate them on the virtues of the more numismatic offerings. All things considered, a great way to face the remainder of an amazing 2007.

The main damper on this parade is that buying a supply of quality coins is becoming increasingly difficult. Still, many dealers in New York were successful at winning lots because they met the strong competition head on and succeeded. Others on the short end need to regroup and employ a new strategy at the Collectors' Auction by Scotsman, October 19, followed by the Silver Dollar and Rare Coin Expo in St. Charles, MO, October 17-20. Those not making this Midwest trek may opt to attend the heavily promoted Coinfest, October 27-28, in Greenwich, CT the following weekend. Although dealers are looking to raise cash via the electronic trading networks, they are carefully choosing select material to buy and sell, rather than simply dumping coins.

Continued surging worldwide demand for Gold, culminating in metals' prices trading at levels not experienced in nearly 3 decades, has contributed to the recent increased attention within the rare coin market. Accordingly, all Gold denominations are flourishing in Mint State. Yet it is perhaps not what you would expect. It's not just the generic, low-end

examples accelerating, as Gem material drives up by as much as an astonishing 41%. \$20 Saints With Motto in PCGS MS67 at \$8,500 Bid the leader. Buyers looking for a potential bargain may look to the plentiful 1908 No Motto variation, Bid at \$6K, as the Wells Fargo hoard contributes mightily to the nearly 2,000 graded as such by PCGS/NGC. Check out the 24 percent gain for PCGS MS66 \$2.50 Libs to \$2,600 Bid.

Unfortunately for Silver Commems, several issues continue to feel the sting of precipitous double digit declines. These "toned" Commem Halves, apparently, were allowed to sell at public auction with little or no reserve to protect them. An NGC MS66 Rhode Island PDS set; a PCGS MS66 1934 Texas; and an NGC MS64 1892 Columbian all suffered 17 percent declines due to quick sale at auction. The Rhode Island set decline established a new all-time low in the process. Well, it's not all gloom and doom: are those plus signs we? Yes, it's been a long time coming, as three dozen Classic Silvers nudge up this week in the midst of many weak auction results.

Partially inspired by Silver Spot's surge, generic Morgan Dollars in MS63, MS64 and MS65 move up the ladder as dealers look to acquire large quantities in each grade. Peace Dollars have been even more impressive. The top two increases are shared by 1923 and 1925, in PCGS MS67. At \$3,500 Bid each, they are up nearly 17 and 15 percent respectively. They are somewhat available, as PCGS has graded 51 1924s and 66 of the 1925. Sight-Unseen demand is also targeting a few better dates of the popular short series, resulting in increased Bids. Dollars have been actively

trading at shows, and the scarce date supply lines have been drying up.

As we mentioned earlier, Stack's 72nd Anniversary Sale, October 16-17, realized a whopping \$7.4 million. Incidentally, the John J. Ford, Jr. Collection has finally been sold in its entirety. The conclusion of the final two parts, XX and XXI, brought in \$4.2 million, bringing the grand total of Ford's exemplary, never-to-be-duplicated collection to \$58.2 million.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CON, CA, cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. No cash back. This offer precludes or supersedes the terms and conditions on the ICG grading submission form.

Million Dollar Classics Wanted

New Rules For Trading Generics On CCE

Last week we alluded to the strength and resiliency of the rare coin market, especially as it pertains to marquee attractions. As these headliners continue to dazzle the media and newcomers, the potent combo of raging precious metal prices and the expanding collector base continue to fan the flames higher. Of course other factors come in to play, but these two are particularly important. Economic concerns, including the possibility of an upcoming recession, may be the catalyst driving some investors towards alternative financial endeavors, namely, rare coins, which can provide another avenue for the affluent to diversify their exploding wealth.

Dealers in the trenches are a reliable source of current data as they are privy to exactly what their customers want to buy and sell and are in the best position to see a trend developing. Many have reported that expensive coins, those above \$10K, remain easy sells as there is a veritable mountain of cash available for them. There are a number of prosperous individuals solely absorbed in securing elite and costly rare coins. Keep in mind that this well heeled group doesn't necessarily have the numismatic knowledge of seasoned collectors, but they do want to own some rarities, and they possess the wherewithal to do so. One dealer, who happens to specialize in major rarities, among other quality coins, said these consumers are willing to spend big money for coins that combine exceptional rarity with fantastic quality. In essence, they are obsessed with reeling in some million dollar coins.

Accordingly, the demand for these high ticketed trophies is definitely eclipsing the current supply. This situation is confirmed each time a classic rarity changes hands at a record price at auction or via private treatise. Note the two 1894-S Barber Dime transactions that we cited in last week's article. Show stoppers such as these don't come to the market often enough to satisfy the demand, so it won't be easy for dealers to fulfill their clients' extraordinary needs. Also consider the fact that many of the numismatic elite are not necessarily found in Gem condition. This limits the number of sales to the big spenders who emphasize their need for extreme quality. The more educated these heavy hitters become, the greater the chance that we'll see additional low mintage and lower grade classic coins realize their full potential.

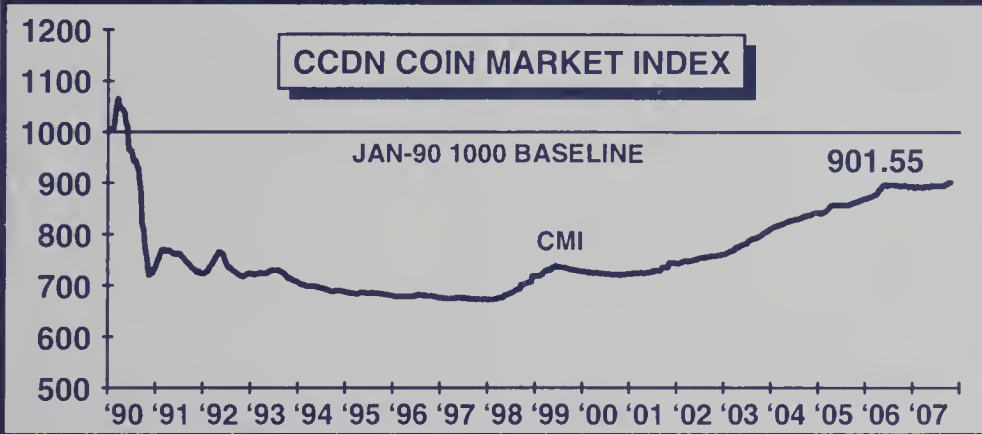

The sight-unseen market is quiet this week as most dealers are traveling to attend shows and participate in auctions from coast to coast. The recently concluded Silver Dollar and Rare Coin Expo in St. Charles, MO offered some relief and rewarded a fair amount of business to dealers willing to put in the time. Others will be looking for more success in New England at Coinfest in Greenwich, CT, held Oct. 27-28. Things

stay busy with many flying to California for the Santa Clara Coin and Collectibles Expo Nov. 1-4. Superior will host the Santa Clara Elite Auction Nov. 1. Then, Heritage will conduct a U.S. Coin Auction Nov. 6-7 in Dallas, Texas. A few gold highlights from this sale include two \$20 Liberty rarities; a PCGS AU58 1860-O and an NGC AU55 1885 Prooflike, as well as a PCGS MS65 1931 \$20 Saint-Gaudens.

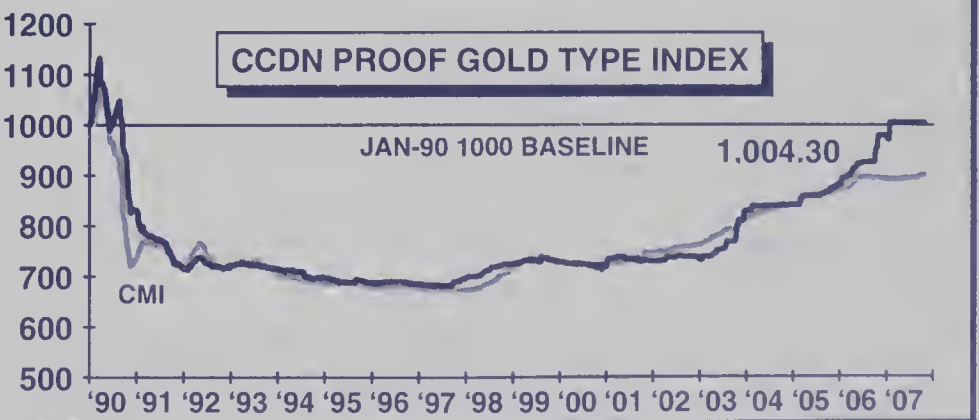

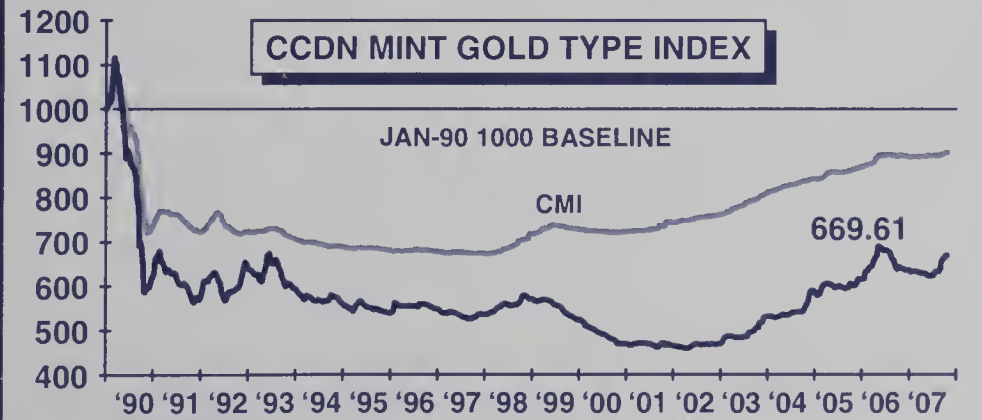

Dealers desperately need rare and quality coins, and they are trying any way they can to satisfy their needs. This includes working the bourse floors, browsing internet auctions, and Bidding on the electronic dealer trading networks. However buying and selling generic certified coins may soon become more difficult for many on the Certified Coin Exchange beginning November 1 as new rules are imposed. CCE dealers will no longer be able to trade the coins listed below **sight-seen** thru the exchange. Furthermore, **only** sight-unseen Bids and Asks will be allowed to be posted on these common Type coins graded by PCGS or NGC and **only** from "CCE Generic Market Makers." In addition to financial requirements and increased fees, CCE will also require minimum quantities when placing sight-unseen Bids or Asks.

Silver Commemoratives are showing continued signs of recovery, as sight-unseen increases outnumber those declining for the second week in a row. Yes, it's too soon to establish a definite trend, but it does indicate that buyers are seeking good value from an oversold series. These Commems have been pushed down significantly, and sometimes it just gets to a point where they become very attractively priced. Quality Hudson Halves are moving upstream as increases are in place for MS64-MS66. Topping all Commems, an NGC MS64 Hudson rode a whale of an increase nearly 14 percent at \$1,150 Bid this week. The hungry sight-unseen buyer is even willing to take two at this price. Not every Commem is coming up roses, though, as a PCGS MS65 1893 Columbian Exposition fell to \$285, a 13 percent drop, establishing an all-time low in the process. The \$2.50 1926 Sesquicentennial Gold Commems are enjoying some prosperity as strong percentage gains are reflected in the MS62 grade. Dollars are quiet with some minor discounting. Type, the darling of many buyers, is holding strong at current levels. Gold Type is mostly steady, even as bullion is trading at record levels with a current Spot above \$769.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. Listing Policy: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "l" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

The 2007 NGC Registry Awards

We're looking for the top sets in the world — and as the most inclusive registry in the hobby, NGC will see thousands of world-class sets. Make sure that yours are among them!

AWARDS WILL BE PRESENTED FOR:

Competitive Sets | Signature Sets | Collectors' Journal Authors

Take the honors in one of these categories and you'll receive a personalized plaque, an icon of recognition next to your set's registry listing, and up to 5 Deluxe PhotoProofs of NGC coins from your winning set. Sets must be at least 50% complete to be eligible.

To join the registry or for more information about the awards, please visit www.NGCcoin.com. The deadline for set registration and journal entries is December 10, 2007. Winners will be announced on January 10, 2008.

Gold Dances To \$800 Beat Super Generics Surge On CCE

The Gold rush continues its trek into November as the yellow metal hit the magical and elusive \$800 per ounce mark in after hours trading October 31. The impetus pushing Gold over the hump came from the Federal Reserve Bank, after it lowered the Fed Funds Rate ¼ point to 4.50 percent. Enormous strength experienced in all the precious metals is cause for jubilation within the dealer sector. Gold at \$800 per ounce means more media attention and more interest by novice and established collectors. Dealers around the country have been inundated with questions and sales via telephone, email and from people visiting their shops. For some it may be a time to cash in by selling some Silver and Gold they've had laying around. Others just wanting to buy some bullion or bullion related coins may get hooked on numismatics and become a long term client for rare coins. The current frenzied market could very possibly enjoy additional action as those who invested in 1980-Gold may look to get back in the game. This group represents a sizable sector, and if they choose to cash out soon, achieving at least something of a psychological victory, it may measurably increase the Gold supply. In any case, activity levels will no doubt rise when this pinning segment makes a move.

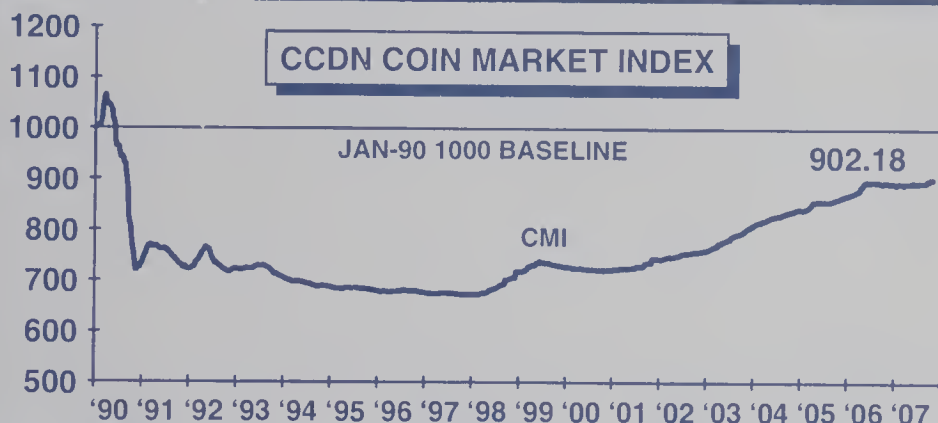

Kick-off day for the CCE Generic Big Market took place November 1. This opener saw volumes of sight-unseen transactions involving Super Generics as 473 coins traded for \$337,891, all through the 4 dealers currently participating as market makers. The day before this change, only 1 Super Generic sold for \$840. What a difference a day makes! Keep in mind that these trades only represent a mere fraction of the actual number of common date Double Eagles and Silver Dollars that trade each day. Some estimate that less than 5% of actual trades occur though the electronic dealer trading networks as most deal face-to-face and over the phone.

Gem Common date Carson City issues were this week's Morgan Dollar leaders climbing as much as 16%. Speaking of Carson City, a noteworthy event took place last week in the GSA Carson City market place. Doug Sharpe of Aspen Rare Coins brokered a \$250,000 deal that included the #1 NGC Registry Set along with a few add-ons to an

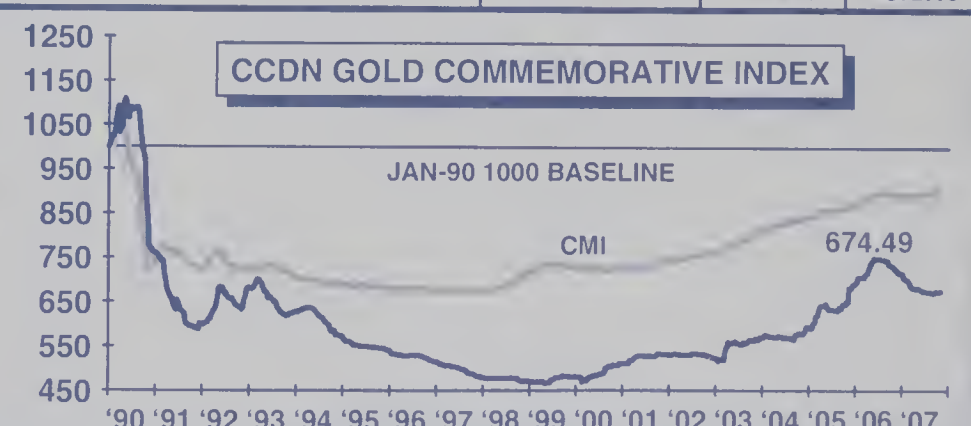

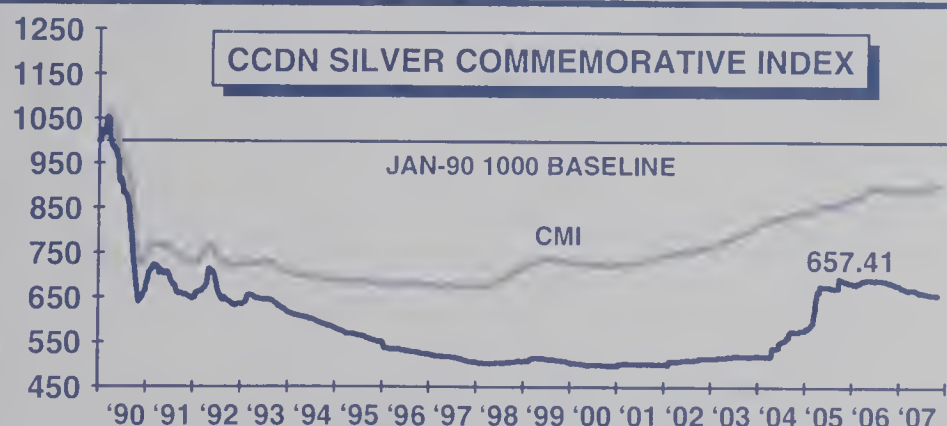

enthusiastic East Coast buyer. Peace Dollars continue to roll as generic examples are on the move with MS64 thru MS66 pushing higher. The quartet of Peace Dollar common dates, 1922-1925, are also escalating in Gem MS66 gaining nearly 6 percent at \$450 Bid. Mint State Gold Type is certainly enjoying its potent elixir with the \$5 Indians excelling in Choice, at \$2,200 Bid and Gem, where NGC MS66 is \$23,000 Bid up nearly 10 percent. Topping the Gold Type chart is the impressive 16 percent spike for PCGS MS66 High Relief issues. Generic MS65FB and MS66FB Merics entertained higher levels while the Silver and Gold Commems, Buffalo Nickels, Walking Liberty Half Dollars remained quiet with Bidding support at current prices. ANACS and ICG are receiving attention as value hunters are looking to buy coins that may represent an important opportunity. Silver Commems are realizing strong gains with the ICG Hudson jumping more than 30 percent for MS62 and MS63 examples. Morgan and Peace Dollars are strong with better date Peace Dollars surging ahead. Several Walking Liberty Half Dollars from the short-set joined the party as well.

Auctions and shows will dominate the month of November as they often do. For many dealers, it begins in California Nov. 1-4 at the Santa Clara Coin Expo. Heritage springs into action next featuring the Dallas Signature Auction Nov. 6-7 in Texas. Then, Stack's is center stage with their sale of the Amherst & Waccabuc collections Nov. 13-14 in Baltimore. Bowers and Merena will take the anchor leg, hosting the November 2007 Baltimore Auction in conjunction with the Baltimore Coin Convention beginning Nov. 15. This tantalizing array of offerings will give dealers an opportunity to arrange their inventory for the holidays and end of year rush.

The choice for the Millennia Collection was NGC

*“NGC is the most
knowledgeable in the field.”*

— Ira Goldberg, President, Co-Owner
Ira and Larry Goldberg Coins & Collectibles

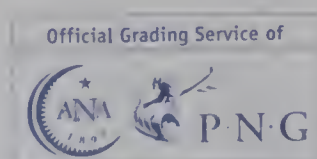

The Millennia Collection features over 1,000 of the most important world coins from ancient times through the early 20th Century. Many predictions suggest that when this collection sells in 2008, it will become the most valuable collection of world coins ever sold.

We are proud to say that the entire Millennia Collection has been certified by Numismatic Guaranty Corporation. This important collection deserves nothing less than the rarest commitment.

Ira Goldberg, of Ira and Larry Goldberg Coins & Collectibles, who will sell the Millennia Collection on May 24-28, 2008, stated, “NGC is the most knowledgeable in the field. We chose them for their accurate, unbiased, third-party opinion of grade, and also for the protection that their superior holders give to these coins.”

All of the most important collections to come to market in recent years have been authenticated and graded by NGC, including the Eliasberg World Gold, Reiver, and Damon collections.

For the world's greatest coins, the clear choice is NGC.

*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes various error coins, CON-LA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. No other offer precludes or supersedes the terms and conditions on the ICG grading submission form.

Please note for the most common dates: Better date ranges usually begin more than five days of the most common issues listed herein.

DO IT FOR THE MONEY!

But You'll Come Back Because Of Our Service, Knowledge, and Integrity

Spectrum Numismatics was formed in 1991 with a unique vision. Spectrum's vision was to be a coin company with world-class rare coin experts, unlimited cash resources, and a loyal customer base. Spectrum knew the way to keep people coming back time and time again was to treat them fairly, service them efficiently, and pay them the most money for their coins.

Money and skill are probably why people come to Spectrum in the first place. But our service and integrity are why they come back again and again and again.....

Why does Spectrum pay more than any other dealer for U.S. rare coins? What's the catch? There's actually no catch at all – it's just a wise business decision. Spectrum is one of the largest coin dealerships in the world and has lots of coin hungry clients. Spectrum literally must either buy your coins or lose its clients. That's why Spectrum will pay outrageously high prices for your coins and that's why they make it so easy for you to get the cash.

The time to get the cash is now. Call Spectrum with assurance and let us help you realize the most money for your coins. Give us an opportunity to serve you by calling toll-free 888.828.2646. Call Spectrum today.

Gold Type & Dollars Harvest Gains Dallas Auction Rounds Up \$7 Million

For dealers, the extended version of the happy dance hasn't ended. As the yellow metal has designs on a new all-time high, the rocketing precious metal component has sent Gold, Silver and Platinum streaking through the stratosphere. What has been most impressive during this rally is that Gold has sustained and strengthened its hold, dramatically conquering one plateau and now working on another. In the process, dealers are being bombarded with calls and intense interest from the public trying to cash in on the yellow fever epidemic. While many coins have increased solely on the basis of their intrinsic value, slightly better than common examples have seen their premiums devoured. This has created an opportunity for astute dealers and collectors to pick off some of these issues at public auction or on the bourse. When the market finally calms down and settles back into a comfortable trading range, these slightly better dates will, once again, separate themselves from *junk* status.

Meanwhile, Gold remains extremely volatile, trading as high as \$845, up over 5% from last week. There are many contributing factors in place for higher metal prices, including financial fears resulting from concerns regarding future inflation. Oil prices, interest rates, home values, and job growth are being closely watched. Naturally, the safe haven of choice the world over and throughout history has been, and still is, Gold. Some analysts concur that the yellow metal is headed even higher, believing it may top out well over \$1,000. They also believe volatility will continue, followed by a correction before spiking again. Therefore, at current levels, there may be an opportunity at hand for unloading all those "ugly" Gold coins that have spots, damage or other problems. At these prices, it is rather painless, and it gives added liquidity at a time when having enough buying power is extremely important. Type Gold is claiming higher levels, but dealers are busy servicing strong demand for **early** and **dated** Gold of *all* denominations.

Maryland will be the rare coin state of choice next week as the Baltimore Coin and Currency Convention will dominate the collectors' course and dealers' docket. Expectations are favorable because the location has an ample collector draw, plus the metals are lighting things up like a Christmas tree. Many dealers are looking forward to this show because they still need to satisfy want lists and secure a supply of quality coins that Santa Clara didn't quite deliver.

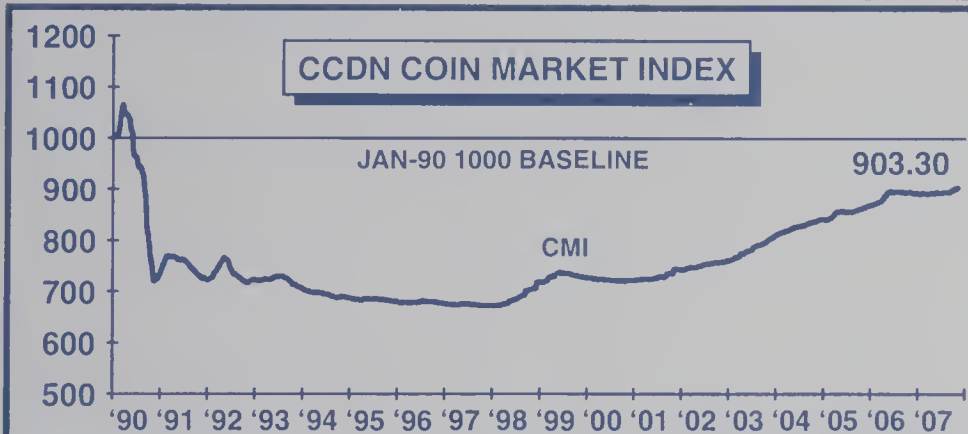

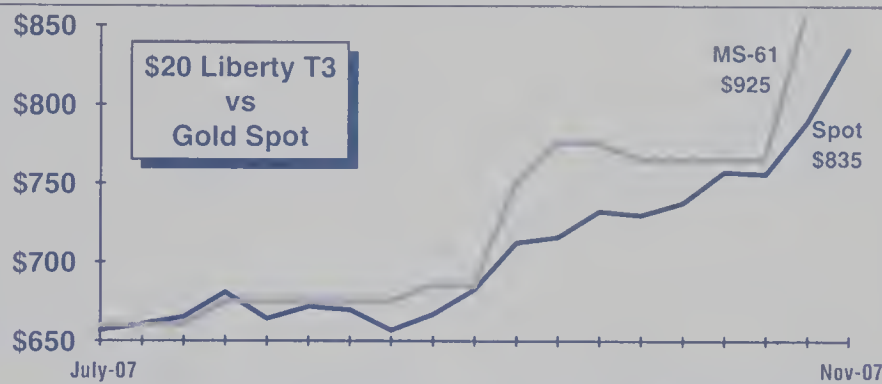

Sight-Unseen trading is very healthy this week. This strength is reflected in the *CCDN Coin Market Index*, which has continued to climb, now at 903.30, a level not seen in over 17 years. Super generics stay stoked as \$2.1 million changed hands during the first 6 days of trading under the new CCE rules. Market makers are

returning to the sight-unseen landscape: in addition to those in place for super generics, the ground has been laid for a similar process with Buffalo Nickels and Full Banded Mercury Dimes, where market makers will buy and sell these coins in virtually unlimited quantities in PCGS grades MS65-MS67.

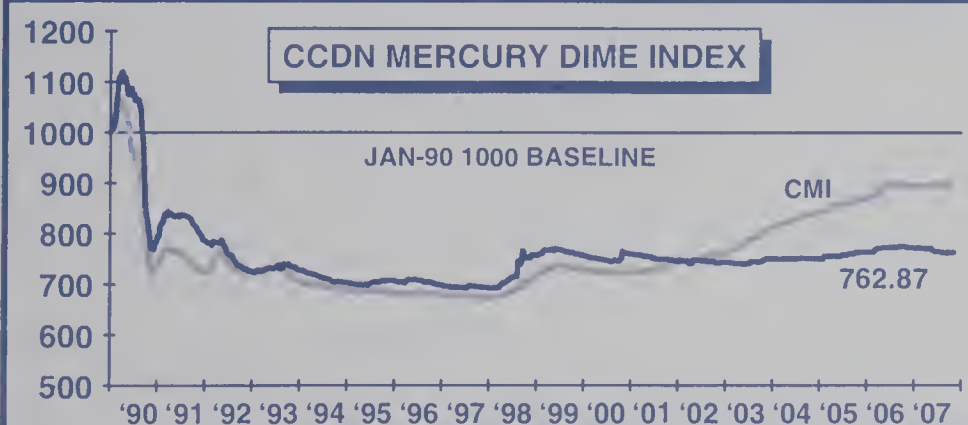

Increases for Gold Type are not only numerous, but dynamic as well. All denominations and all grades are participating in the golden party. As the chart below shows, the gap between Gold Spot and MS61 \$20 Libs has widened. Double digit gains are found in no less than a baker's dozen. The popular \$5 Liberty with Motto in MS63 is at the top spot, commanding \$710, ringing up over 15% from last week. Type 3 Gold Dollars in MS64 are close second at \$1,000 Bid, advancing more than 14 percent. On the Silver side of the street, Generic Dollars are surging with strong demand targeting Morgan and Peace examples. Morgans are higher in MS63 thru MS67 with some solid percentage gains taking place. Prooflike Morgans are also seeing some positive action, with dealers willing to pay \$166, sight-unseen, for any MS65PL specimen. Peace Dollars are participating to a lesser degree, but are climbing as well. No doubt, the rocketing price of Silver at \$15+ per ounce has had an effect on this generic cartwheel consortium. Mint State Type is a bit on quiet side with a couple issues declining. Silver Commems are mixed as lesser quality examples are just not finding many excited buyers on the bourse or at auction. Several better date Washington Quarters lost some luster, yet the popular 1939S is advancing in several Mint State grades.

The November 6-7 Signature Auction by Heritage brought \$7 million in Dallas. A few of the many highlights include an NGC MS65 1920S Buffalo Nickel, which was ham-

mered down at \$44,563; an 1860O Liberty Seated Dollar graded NGC MS66 sold for \$63,000; and an 1885 \$20 Liberty, Prooflike NGC AU55 realized \$43,125. Baltimore will play host to Stack's Amherst & Waccabuc collection auction November 13-14, followed by the November 15-18 Baltimore Convention Auction by Bowers & Merena, which promises to be their largest sale ever, encompassing over 4,000 lots.

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market trends and nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unaccepted high Bid. As a result, Trades, which are near or below current Bid, CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

PROOFLIKE MORGAN DOLLARS

P.L. Dollars may be worn or dirty with no reflectivity, but the deep mirror Prooflike Bids for P.L. are usually much lower than for DMPL. But Command some premium over non-P.L. strikes.

The Fine Print
*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions.
Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CONECA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

A Record Deal, Legend Has It

Stack's Baltimore Sale Hammers \$10.3 Million

Baltimore is usually cool this time of year, yet with over \$40 million transacted in numismatic circles prior to the expo's opening day, things are blazing hot on the East Coast. There is just no let-up in this potent market. Diverse and substantial offerings in the Amherst & Waccabuc collections by Stack's, Nov. 11-13, got the engine revving, as this marvelous sale realized more than a sizzling \$10 million. The numismatic express was fueled further by the high octane announcement of Legend Numismatics' deal brokered for a collection involving more than 1,000 U.S. Patterns for a price in excess of \$30 million. This sale, consisting of over seventy pages of inventory, is reported to be the world's largest private transaction of a coin collection, going for approximately double the previous record of \$15 million for the 1998 purchase of the Trompeter collection. Mr. Simpson, the proud new owner, now has the only complete collection of Amazonian Pattern coins in all metals, including aluminum, copper, gilt and gold. As we go to press, all of this has transpired before the first lot of the Bowers & Merena Baltimore Sale is hammered home. It seems expectations are always heightened for the Maryland show. Most dealers relish this event as it is consistently one of the circuit's best efforts each year. The metropolitan and surrounding area is a rich and sundry meld of collectors and investors that make the trek and take the time to look over material while they search for their specific needs. In large part, it is this local traffic that makes the Baltimore show what it is today. There are also many vest pocket dealers in attendance, adding greatly to the bottom line. November has been an active and volatile month so far, and this trend is continuing as dealers and coin starved collectors pound the bourse at the Baltimore convention and featured auction.

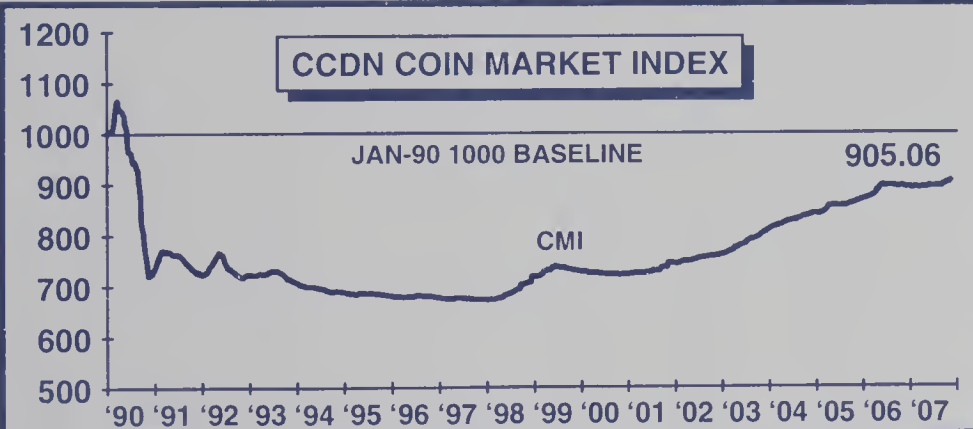

As you would expect, many dealers are still expressing a great deal of optimism, even though Gold and Silver Spot have been yo-yoing. Corrections are a healthy necessity. As the precious metals sustained a dramatic sell-off earlier this week, Gold retreated to the mid \$780s and Silver fell to \$14.40. Such declines are usually very dramatic and often overdone. As Gold and Silver find their new levels, rare coin traders will quickly adapt and resume business.

Despite the decline, some pundits still predict \$1,000 Gold, and dealers tell us Gold remains red hot. However, Gold isn't the only game in town. High priced material of all kinds is especially sought-after by individuals trying to diversify their assets. Select rare coins have benefited, especially those that reach the five-figure and above plateau. Big money is out there and waiting to be spent, even for the more esoteric material, as evidenced by the mega million dollar Pattern transaction.

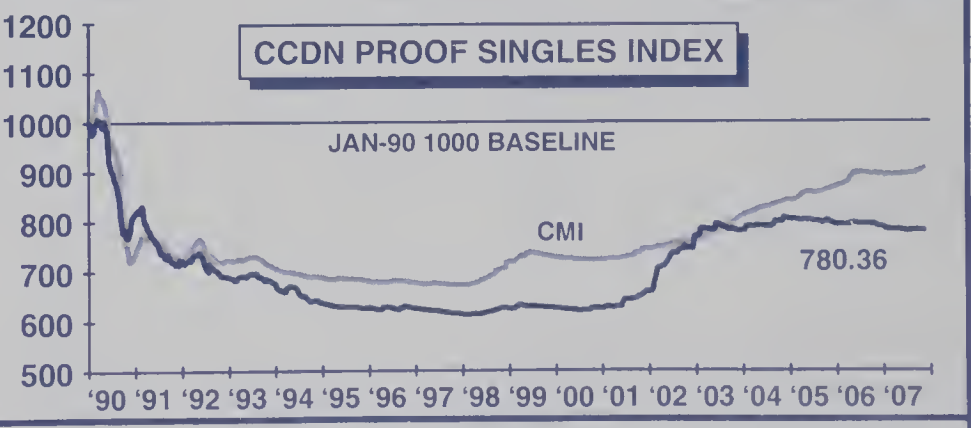

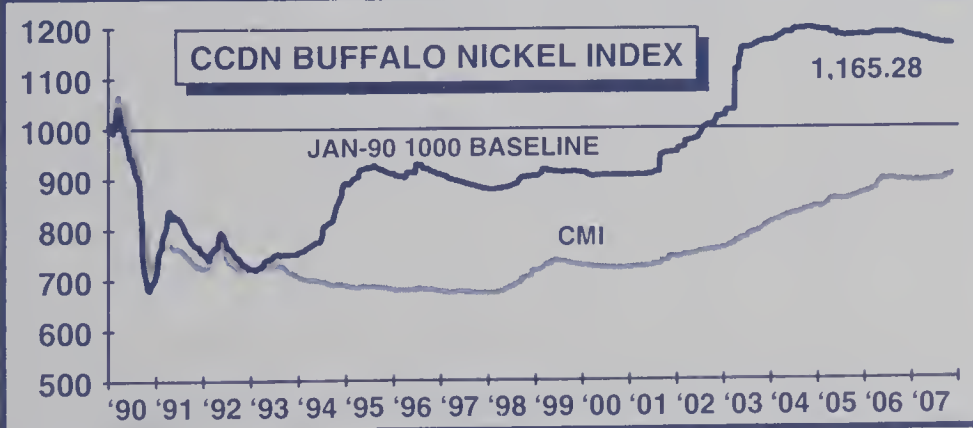

The sight-unseen market is reflecting areas of contained weakness as dealers look to jettison some stale retreads prior to the New Year and keep liquid as we approach the holiday rush. Sundry Silver Commems continue to fire retro rockets as they become easy targets when funds need to be raised. A PCGS MS65 Grant Commem, No Star lost an important battle, falling more than 9 percent to \$435 Bid after its frail auction result. Minor 20th century coinage is quiet, although a toned NGC MS66 1924 Mercury Dime dropped 11 percent to \$155 Bid. The sharp correction in the price of Gold is making for some dramatic Spot level changes; nonetheless, Gold Type is reflecting overall strength despite this decline in bullion. There appear to be many individuals who missed the Gold train and are using the recent correction as an entry point. Several Gold denominations are enjoying increases in grade MS63 and better. The \$2½, \$5, \$10, and \$20 Liberty issues are the pacesetters. For example, \$2½ Liberties in MS63 gained more than 13 percent. Many Saints are enjoying the benefit of

strong demand as well. Generic Morgan Dollars continue to be in vogue as MS65s top \$115, MS64s hit \$44, and MS63s advance to \$35. Massive quantities are being traded on a daily basis in apparent total disregard for Silver Spot's slide.

The Certified Coin Dealer Newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks on Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Sight-Unseen Market At 17-Year High Mint State Gold Type Outshines Spot

Demand for rare coins is amazingly strong well into November of another bull market year, as evidenced by our *CCDN Coin Market Index*, which remains at its highest point in seventeen years. Dealers have told us the expanding collector base is only part of the reason for the rare coin market's current health. It has been a volatile year with soaring oil prices and the subprime credit debacle leading to a housing market collapse. Not surprisingly, many individuals are looking to protect their wealth by diversifying some of their funds into bullion and rare coins. These investors have enlisted the assistance and expertise of trusted coin dealers, and they are driven to buy the best quality and rarest examples possible. This activity has been evident throughout 2007 as multi-million dollar deals and huge auction results as high as \$77 million have been occurring with regularity. Precious metals have also played a very important role as the increasing intrinsic value of coins pushes prices higher from the most common issues to the very rarest. It's a bit of a double-edged sword, though, as increasing volatility could play havoc with completing transactions. Still, analysts generally agree that the bull metal markets have yet to reach their peak, which can only bode well for rare coins, as Gold, Silver and Platinum head higher.

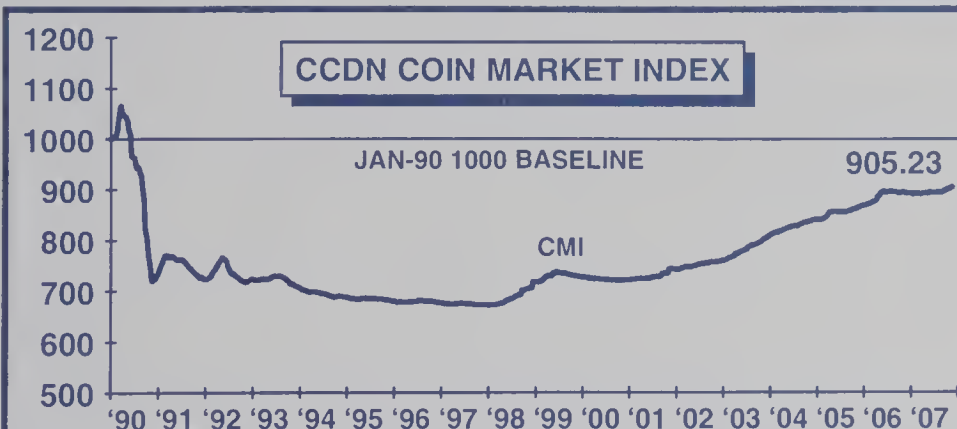

Solid demand was certainly evident at the Baltimore Coin and Currency Convention November 15-18. Dealers have definite needs for their customers and their rapidly depleting inventories. Demand is quite heavy for coins that possess originality, eye appeal, a full strike, attractive toning and some degree of rarity. The hunt for such material was clear in Maryland, as brisk wholesale business was taking place on the bourse. Dealers were very pleased with the number of collectors in attendance, resulting in strong retail sales. In conjunction with the convention, the official auction by Bowers and Merena brought \$9.5 million as strong Bids chased rarities. Stack's tallied up a healthy \$10.3 million with their pre-show offerings, bringing the auction totals to nearly \$20 million.

Gold, despite its extreme volatility, has plenty of buyers waiting to jump on board who have been reading the rosy analysts' reports. We have seen strong demand for Mint State Gold Type lately, with numerous examples outperforming Spot Gold. See the chart at right showing

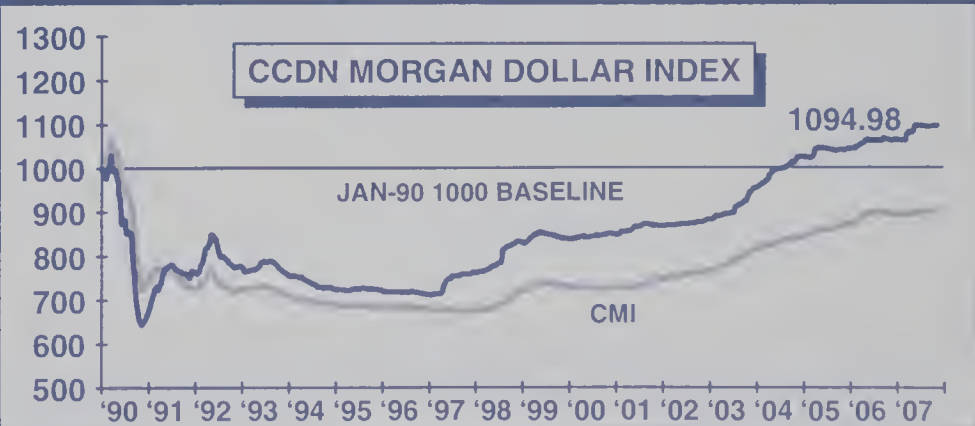

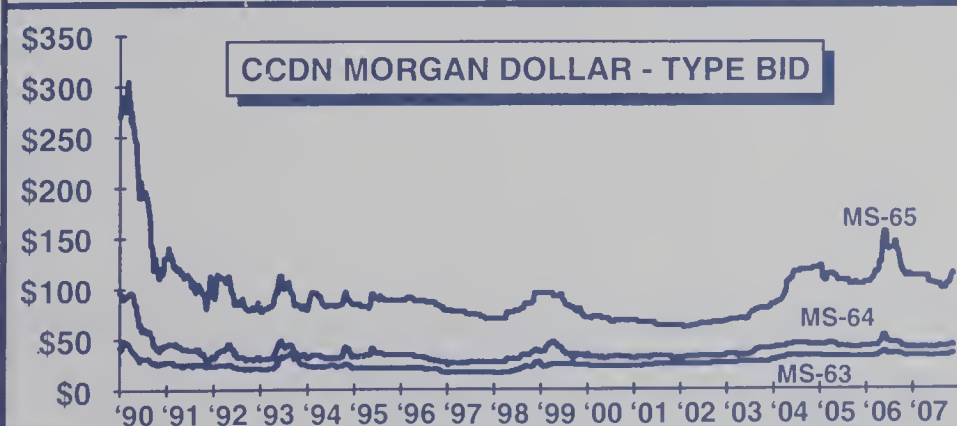

the top performers in Mint State Gold Type since this time last year. Early Gold remains robust in today's sight-unseen market as well. Proof Gold is equally strong, as well-heeled collectors know that buying Very Choice and better issues is an excellent way to invest large sums of money while owning only a few coins. Many investor/collectors adhere to the "box of twenty" theory, preferring a lean, very high-priced collection as opposed to a large, more cumbersome amassment.

Dealers tell us they are unable to buy all that they need to fill customers' orders, and those quality examples that sell at auction are realizing huge prices. Demand is quite strong among Mint State and Proof Type, especially for Liberty Seated and Barber issues. Bust material is highly sought-after as well, but the pickings are slim, and the need remains great. Morgan Dollars have been another favorite during this time of need. Here, we see demand divided for both generic and the more scarce dates of the series. Buffalos, Full Banded Merces and Walkers are making a comeback in the generic category, as market-makers have returned. Sight-Unseen Bids and Asks have been placed for these bread-and-butter coins for PCGS MS65-MS67 specimens in virtually unlimited quantities, making a strong statement for this important market segment. (You won't find many of these Asks in our Market Column this week, though, since these coins routinely sell for less at auction, and we only list the lowest Market prices.) Dealers are readily selling Type to clients, but it isn't as easy when it comes to replacing this material. It has been a rough road with long hours spent viewing auction lots and countless frustrations during the actual auctions. Still, those who can persevere stand an excellent chance of increasing their bottom line.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity and dealer listings nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of a bid supported by a high Ask. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks. Such data is not used for coins that are not actively traded or for coins that are not actively traded in the market. Auction prices realized or retail trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete significant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit, on a sight basis.

[illegible]

CCDn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

[illegible]

If your coin will stand on its own merits regardless of the certified grade, a higher CDN Bid may be more indicative of current market value.

The Seven Day Guarantee™ is a service provided by ICG. It is not a guarantee of the quantity of coins submitted. If we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service, we will grade double the submission for free. This guarantee only applies to regular US coin submissions, which exclude rare coins, error coins, and foreign coins. The guarantee does not include shipping time and is measured from the day ICG receives your coin until the day ICG ships them back. Nothing is to be held against ICG if the guarantee is not met due to circumstances beyond ICG's control.

No Holiday For Bull Run Gold Galvanizes Sight-Unseen Market

Last issue we chronicled the triumphant march of the *CCDN Coin Market Index* to its uppermost point in seventeen years at 905.23. This alone is a testament to the ongoing strength exhibited in the rare coin market. It also tells us volumes about the nervousness regarding our economy, especially for 2008 and beyond. Volatility is another indication that investors are vacillating as they struggle to find the proper havens for their funds. Dealers have told us repeatedly that they have scores of individuals pacing on the sidelines waiting to buy top-notch rare coins at amazing levels. Some of these enthusiastic and well-heeled folks have a limited amount of numismatic knowledge, but they do recognize quality and rarity. They are also willing to take the professional counsel from their expert dealers. This investment surge is partially responsible for the many record-breaking prices at public auction for select classic rarities.

Recent phenomenal increases are not only affecting the rarest and most expensive coins. Superb and original Type material is also a benevolent benefactor. Globalization has brought us all closer economically, so today's internet savvy collector/investor must stay on top of world affairs for optimum success. Collectors are no longer battling other "average Joes" for coins, but rather, a throng of well-coached individuals willing to spend big bucks. Dealers, as always, remain in the mix as their inventories have run down throughout the year. This situation has grown even more critical because of the lack of fresh material available. Many are finally beginning to fathom that the supply lines are not an infinite gravy train after all.

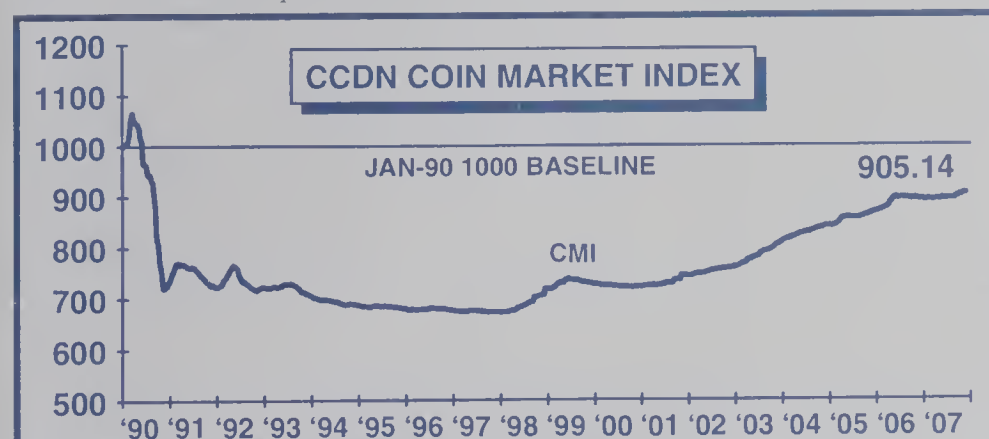

A principal contributor to the market's demand and volatility lately is Gold. We have grown accustomed to seeing the Gold bullion yo-yo precipitously higher one day and sharply lower the next. Nonetheless, the overall trend for the yellow metal has been sharply up, and it doesn't take a rocket scientist to see that the *CCDN Coin Market Index* is attaining a seventeen-year high as Gold soars towards its zenith. Mint State Gold Type has been raging, courtesy of this prolonged bout with yellow fever. Nearly all denominations of Type Gold have been escalating with the accent on scarcer and higher graded specimens, and if the pundits' predictions for higher Gold prices bear fruit, expect this trend to continue.

Strong demand is seen for other market segments such as Mint State and Proof Type as well as Morgan & Peace Dollars, but there are also some slackers. Classic Silver and Gold Commemoratives have been soft because the need for liquidity has been so great. Dealers must constantly decide which coins to hold and which to punt. Of course,

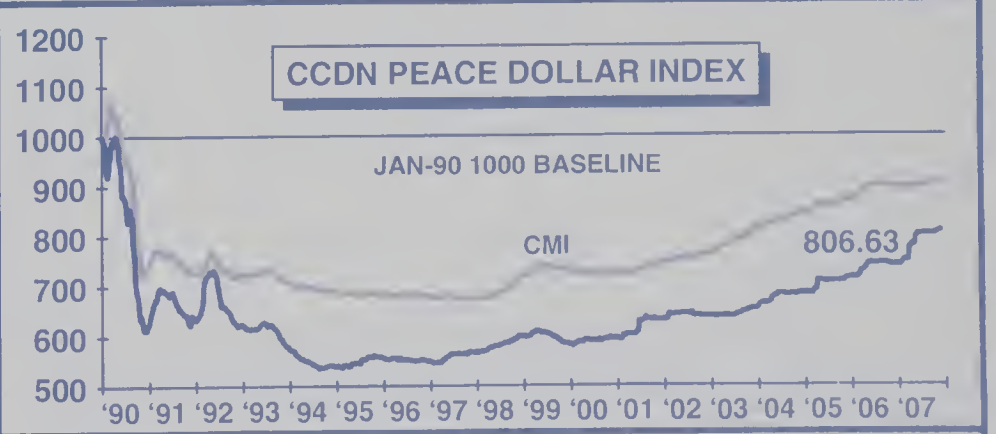

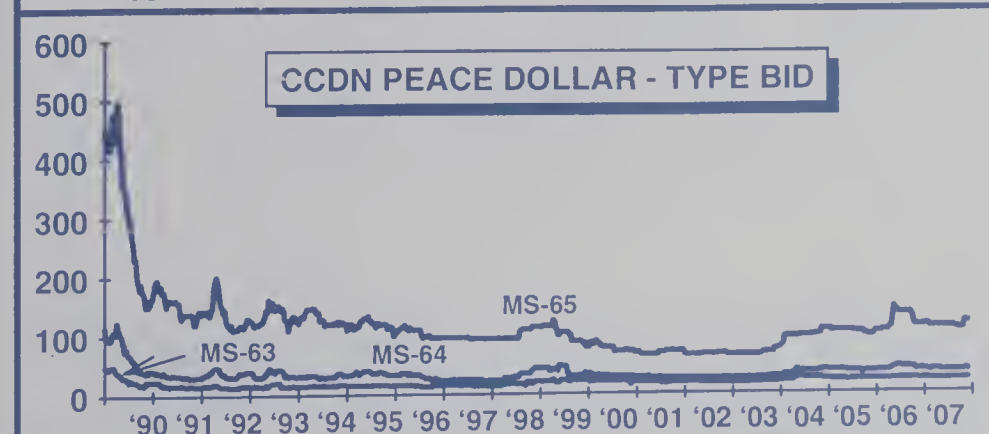

demand is a strong factor in their decision, but so is the perceived difficulty in replacing what is sold. Commemoratives are generally saved by the public from the day of issue, so most are in outstanding condition. A handful like the Hawaiian Hudson Lafayette and Missouri are rather scarce but for most Commems, when they are required to fill an order, they are relatively easy to find and buy. Of course, many coins don't fit this scenario. Early coinage covering the Flowing Hair, Bust and Liberty Seated coins have seen tremendous demand throughout this bull market run. These coins are genuinely rare and desirable. Key and semi-key dates have been another segment of the market excelling.

As we wrote, Gold has been fantastic as \$800+ bullion has assisted the increases in sight-unseen Bids for most Gold Type issues. Saints remain in vogue as a nifty \$40 push is landing on MS62 specimens, now claiming \$930. Morgan and Peace Dollars have had strong interest this year, and dealers have Bid higher for these coins, although only mixed action is offered this report. Type has been steady as she goes, but we know that many collectors are putting together sets of Type, and it is becoming increasingly more difficult for dealers to accommodate their needs. Copper remains hot as MS63 Brown Indians move up by as much as 11% for PCGS examples, and the popular Two Cent pieces put in more than their two cents worth as MS61 Brown examples ride over 8%. Sight-unseen market strength is also evident among Proof Gold Type. It takes a lot of money and a lot of confidence in the coin market to push these coins higher, and that's exactly what's been taking place in 2007. Although several Silver Commems are sliding further, the tough to grade Hudson is cruising upstream in a pair of grades as MS66 examples claim \$1,750. Gold Commems find one anxious buyer chasing after the rarest of the 11-piece ensemble as the 1905 Lewis & Clark Dollar takes an \$800 advance to \$13,800 in MS66.

eBay has again revised its ANA influenced policies on selling certified coins this week, according to an unofficial report. In the ongoing struggle to protect buyers without overly restricting sellers, the mammoth internet auction company has backed off on some of its more cumbersome and impractical rules. In particular, front and back photos of slabs will no longer be required. Such a policy made business virtually impossible for those offering large quantities of generic product, especially bullion material. Additionally, serial numbers which were previously made public, will now be accessible to Bidders only, through a confidential process. Still on the table are suggestions like allowing the sale of PCI and SEGS slabs described as certified.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services currently in operation through a study of nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices! The CCDN may not respond to the removal of a high Bid, but will be strictly in the field by the next issue. For a complete list of coins and their current Bids, Asks, and Trades, please refer to the CCDN. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary from the CCDN levels of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

December Can't Ice Demand Sight-Unseen Trading Brisk

For most families, the spirit of the season is just taking hold. Yet in numismatic circles, the majority of dealers have been in the holiday mode for some time as they continue to enjoy the fruits of another banner year. It hasn't come easy, but with the strength of precious metals and raging demand for rare coins as their staunch allies, things certainly bode well for 2008. Whether clients or collectors gained their introduction to the many series via personal counsel or through the prestigious certified registry sets, dealers have done a commendable job educating their customers on what coins to buy. It continues to be a double-edged sword, though, as that keen interest kindled continues to expand the collector base. So much like the tired and bleary-eyed shoppers hopping from mall to mall, dealers are busy pounding the electronic networks and cruising up and down the aisles of the various bourses trying to fill wish lists.

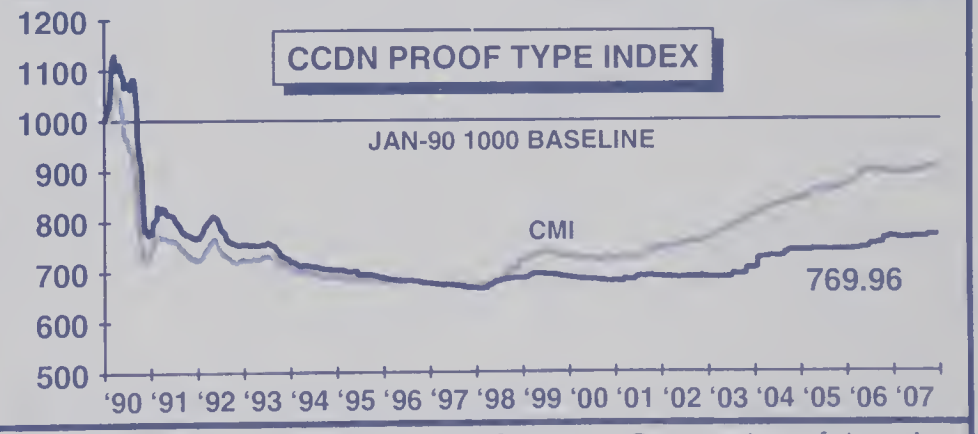

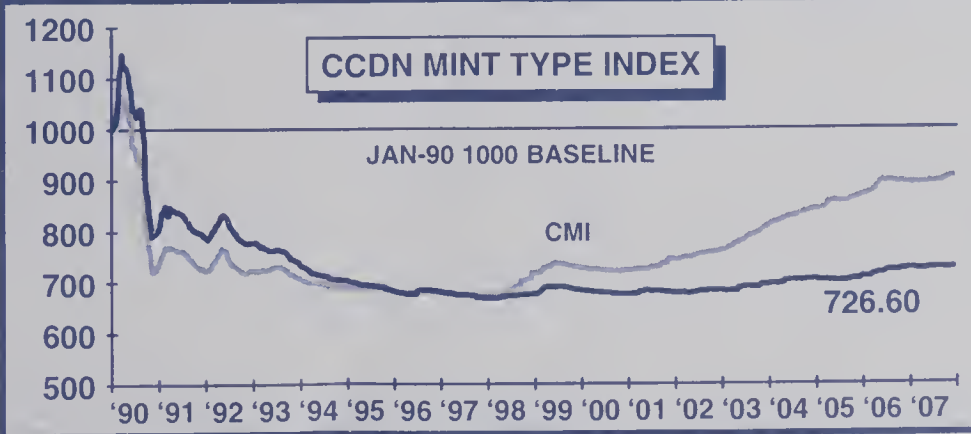

Although business has been great, the competition for the dwindling supply of numismatic prizes is intensifying. Fresh slabbed material has been a highly sought-after commodity from the very beginning of the year, and yes, Virginia, it is plain to see that this situation is still very much alive and well. The sight-unseen market remains a veritable inferno of trading action through the dealer-to-dealer networks. Nearly \$1 million has changed hands in the first week of December on CCE alone, with sight-unseen outshining seen trades by a wide margin. However, there does appear to be a recent increase in the number of sight-seen Bids being hit. This may be a direct result of several dealers now offering to buy CAC stickered slabs sight-unseen at their higher sight-seen Bid levels. Further demonstrating that overall demand for rare coins in the sight-unseen market remains quite powerful, the CCDn Coin Market Index continues to hover near its 17-year high of 905.23, reached two weeks ago. Only slight declines have taken place since then, with this week's very healthy mark settling at 905.03.

The recently concluded Money Show of the Southwest in Houston had dealers praising the market's ability to maintain its resilient strength. While the cost and time spent is considerable for any junket, many participants were able to return home claiming success after a few days of bourse activity and auction battling.

Dealers know that finding quality coins won't come without considerable homework, effort and ingenuity. In addition to attending shows to do business, the sight-unseen market has come to the rescue for many in the past, and it certainly has remained an active and lucrative outpost. As usual, it headlines many of the same cast of characters that have become the object of dealers' affections. Gold Type tops the list as the largest area of business, but that shouldn't surprise anyone. Type 3 \$20 Liberties and Saint-Gaudens are the most coveted with trading occurring in nearly all Mint State grades up to MS65. Similar activity is taking place among the popular generic Morgan and Peace Dollars with Peace piping in with the lion's share of sight-unseen transactions. Being affordable, recognizable and easily attainable, these Silver cartwheels certainly make an excellent gift for the holidays. Dealers are also chasing material other than PCGS and NGC slabs as Morgans are under pressure within the ANACS & ICG ranks with nearly 3 dozen better dates enjoying double digit gains. Same story for the Peace Dollar brigade as 3 dozen are skirmishing with dual digit action. The General Services Administration Dollars are beginning to see more bounce after a period of lesser demand. Many of the Carson City consortium caters to escalating collector involvement, and dealers try to have a few on hand at all times. Increases have been targeting select NGC GSA Dollars, including: 1878-CC in MS64 and MS65 with Gems now commanding \$3,000 Bid. Common dates (1882-1884-CC) are each approximately 5 percent higher in NGC MS64. Proof Type reveals that the passion for Matte Proof Lincolns rages on as all the color combos of these increasingly difficult to find treasures are showing a modest boost. Although Silver Commems find several drifting back a bit, the minus signs are minor as this series looks to rebound after years of being treated like the red-headed stepchild of the numismatic family. Leading the Commem pack on the upside is perhaps the most emblematic of the classic Silver contingent: the 1934D Oregon Trail issue. This beloved coin rides nearly 13% higher as NGC representatives stake claim to a \$400 Bid in MS66. Speaking of Commems ANACS is the scene for some concerted action too, as a wave of perceived Silver bargains is rising fast. Leading the surge is the popular California Jubilee, observed climbing in MS63 and MS64.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

MORGAN DOLLARS

PCGS DMPL and NGC DPL Bids are for fully Deep Mirror Prooflike coins. Bids for PCGS PL and NGC PL dollars will be listed monthly in a supplemental insert. CDN (Greysheet) Bids have always represented fully, deep mirror prooflike specimens.

2007 Rides On Precious Metals' Shoulders

FUN To Take Pulse Of New Year Market

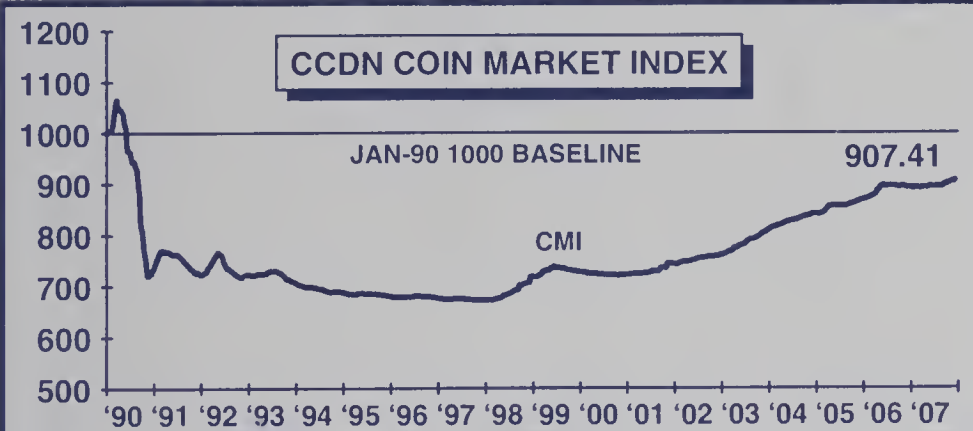

As the curtain is about to come down on another prosperous year, the still snorting, if not raging, numismatic bull has most dealers optimistic for 2008. In fact, it has been generally accepted throughout this sustained frenzy that the only significant problem remains the lack of fresh material. The cache of plastic recycled from show to show is fast becoming commonplace. In some instances, the same coin appears and reappears at multiple auctions during the same calendar year before ultimately settling in a satisfied collector's cabinet. The reality is that the numismatic supply is finite and has always been so, and the current strength of the rare coin market continues to attract more and more collectors and investors wanting in on this exciting game. Certainly, the better the market performs, the more people become interested.

Of course, some earnestly observe the fiscal fitness of our economy and the world's before stepping onto the playing field. A recent area of major concern is the severe credit problem leading to a pronounced housing market downturn. Interest rates, lowered for the third time in 2007 by the Federal Reserve on December 11th, represent an additional economic key. Lower interest rates are generally bullish for precious metals, which continue to perform quite nicely. If rates maintain a relatively low profile, rare coins should remain robust. To add icing to the cake, many precious metals pundits expect Gold and Silver to continue to perform well next year.

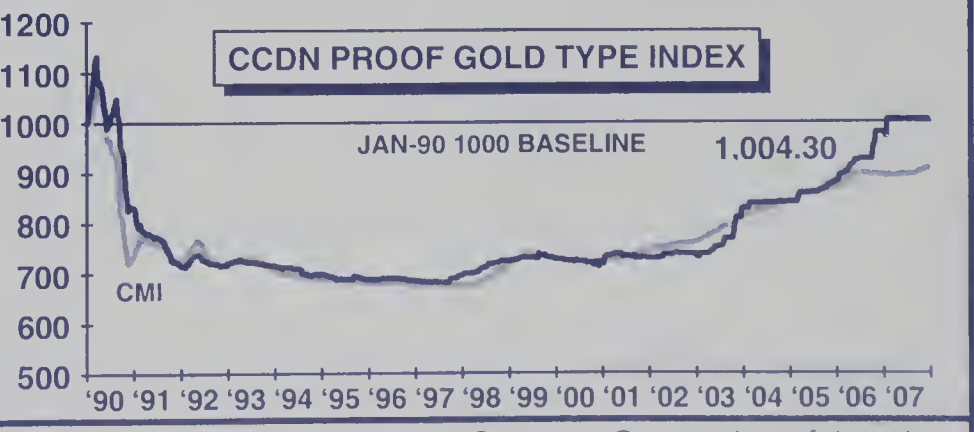

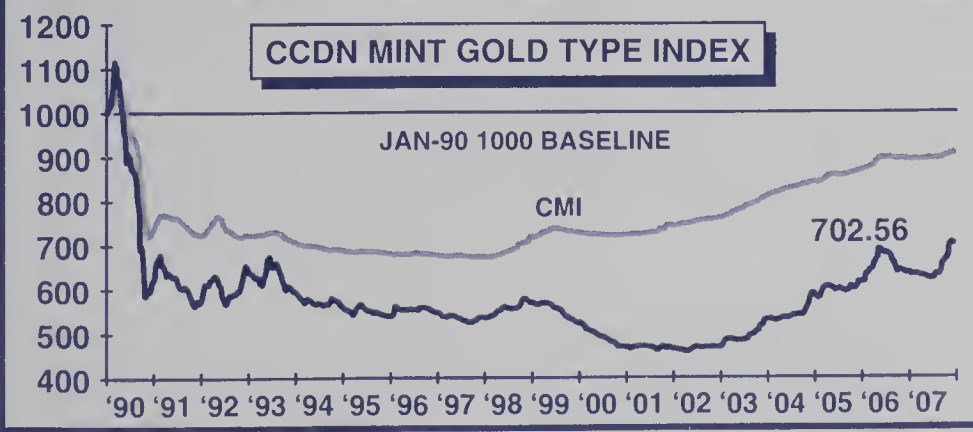

Most dealers are now making serious preparations for the big 2008 kickoff in the Sunshine State. Orlando will be the hot spot in more ways than one as the Florida United Numismatists show and associated auctions will serve as the numismatic epicenter January 10-13. Energized and focused, dealers expect heightened demand for any quality offerings in Florida. They also concur that 2008 will continue to magnify the shortage of high-quality and prime material that has been evident throughout 2007. This may very well result in prices climbing higher than last year. Since many dealers remain flush with cash, they should be able to take advantage of any nice material that comes their way at the FUN show and beyond. In addition to the hot demand for key dates, which everyone likes, most dealers also have some favorite players that will no doubt be pursued in Florida. Some of these perceived sleepers include the following: 1794-1797 Liberty Cap Half Cents;

1794-1796 Liberty Cap Large Cents; 1796-1797 Draped Bust, Small Eagle Half Dimes; and 1796-1797 Draped Bust Dimes.

Sight-unseen trading will most likely do well if the economy stays sound. Maintaining liquidity will probably be the number one goal of dealers in 2008. Many expect that credit costs will escalate next year, and they need to be ready to buy that special coin when it flashes by, as the window of opportunity tends to close rather quickly. This week's sight-unseen activity is surprisingly up-tempo so close to the holidays. Snagging much needed material now will lead to some quick sales and bolster deficient inventories. Commems—both Silver and Gold—are on a bit of an ongoing holiday, yet this somewhat limited activity does indicate firming support with only a few scallywags easing back due to auction malaise. Once again, Mercs and Buffalos are on the quiet side, but Walkers are enjoying a modest measure of action as a group from the short-set step to higher turf through MS64. Matte Proof Lincoln Cents are still steaming hot as a blanket of higher offers covers this popular date, with PCGS 63RB representatives of the 1914 issue claiming a significant 35% hike. Morgans continue to face a flurry of action, too. Gains target many generics in lower Mint State grade columns as they inch up the ladder; the MS66s take \$225, and the phenomenal MS67 designees top \$730. Perhaps more importantly, there are no dissenters. Proof Like specimens are receiving some attention, as the 1901O issue encounters as much as a 40 percent push. Not surprisingly, Gold Type is still in huge demand, with buyers eagerly Bidding on volumes of these nuggets as they attempt to address customers' surging demands. Early Gold Type is the killer, though. A well-known buyer is chasing these 5- and 6-figure rarities in glorious Mint State condition with Bids on the upside by as much as an amazing 36% for the spectacular Capped Bust Small Half Eagles. The impressive 1795-97 Draped Bust, Small Eagle \$10s are leading the amazing Dollar assault, seen flying higher by as much as \$15K as MS63 jewels power to \$150K. With a combined PCGS/NGC community of a modest 30, this will be a tough bird to snare from its roost. Modern Proof Singles are reflecting on serious action, too, as a well-known West Coast dealer is running after PCGS Walkers: a baker's dozen reflect on double digit acceleration led by the 1937 boost of 28% for PR65s.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers; are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

In addition to its world-class conservation service, NCS provides comprehensive certification services for coins with irreversible detrimental surface conditions (commonly known as “problem” or “no-grade” coins). All coins encapsulated by NCS are authenticated and guaranteed to be genuine. At your request, coins can be described on the holder as Genuine, or given a Detail’s grade.

Any item submitted for NCS encapsulation that is suitable for non-problem coin grading will be transferred to NGC. Extensive variety and error attribution services are also available.

For more information on NCS Certification and Encapsulation, please visit www.NCScoin.com.

NCS coins are approved to be listed as certified on

PROOFLIKE MORGAN DOLLARS

P-1 Dollars may be semi-reflective with less reflectivity than the deep mirror Proof Dollars. Bids for P-1's are usually much lower than for DMPL's, but contain 100% premium over non-P-1 strikes.

2008 To Begin On FUN Note Double Eagle Premiums Soar

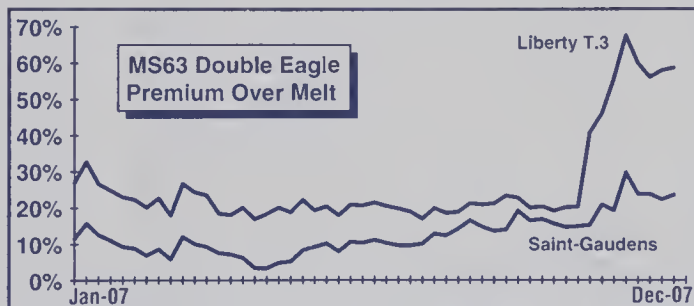

As we close the books on another exceptional year, most dealers find themselves preparing to take the road show to the Sunshine State. For many, this in itself will be a brief vacation from the already harsh early winter. Of course, dealers from coast-to-coast will be looking anxiously toward that ever-telling early market barometer that is the FUN show in Orlando. After carefully taking the pulse of this hale and hardy market, the attention will be focused on carefully monitoring the health of precious metals.

Dealers who specialize in Gold have noticed a telling trend occurring over the past couple months: skyrocketing premiums above Spot for common date Double Eagles. In addition to the spike above melt in MS63, as depicted in our chart below, significant premiums are present in MS61-MS62 as well. Liberties in these grades are over by 19% and 23% respectively, with Saints 9% and 18% above (based on a Spot of \$795). Wholesalers are trying to keep the supply train rolling but are having some difficulty with the powerful demand. This shortage is especially evident at coin shows where there used to be cases of buttery yellow coins up and down the aisles. This abundance isn't there anymore, and orders continue pouring in from John Q. Public looking to add some Gold. At least the January 10-13 Florida United Numismatists show will provide a much-needed opportunity for dealers and collectors to get their fix. Most are quite optimistic about this initial major coin show because of a potent duo: soaring demand for rare and collectable coins and Gold teetering around the \$800 per ounce level.

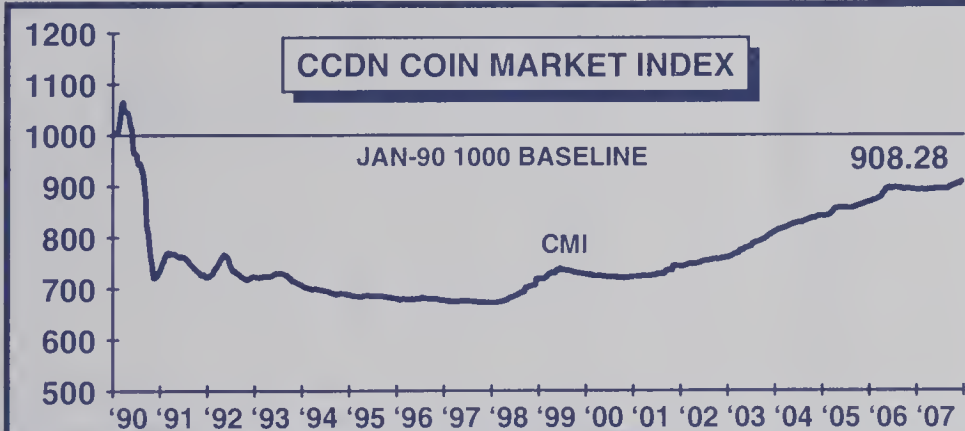

Continuing on the subject of Gold, and Silver for that matter, the CCE trading network has made news again. The experimental "Big Market" for super generics has undergone some recent tweaking in an effort to further boost sight-unseen Bids. Dealers are now able to execute sight-unseen trades for Double Eagles with and without spots as well as Morgan and Peace Dollars deemed toned or white. The current sight-unseen premiums for spotless common date Twenties range from \$15 to \$85, increasing with grade. Market makers are paying an extra \$4 to \$20 for white Dollars in grades MS65-MS67. This CCE adjustment has blurred the line somewhat between sight-seen and sight-unseen trading, and may encounter some complications regarding agreement on assigned criteria. For example, a coin purchased as white may not meet that description in the eyes of the purchaser, since, quite simply, people see things differently, including experienced numismatists.

This week, the sight-unseen market displays a bit of a holiday flair with fitting interest in Silver and Gold. Frosty Morgan Dollars continue to be hot as these Silver cartwheels spin higher with a flurry of action for those grading MS66, now topping \$230 Bid. Classic Gold Commems are also shining as the 1922 Grant \$1 in the appealing MS66 designation leads the skirmish, mustering a solid 10% advance, claiming \$3,300. Walkers from the popular 1930's are perhaps tuning up as they herald in with a minor surge through MS64. And of course Type Gold wishes all a good night as \$2½ Libs warranting an MS67 moniker from PCGS plow ahead with \$5,500 Bid. Rounding out the display, increased demand embraces the ever-in-vogue \$20 Saint series as a double digit elevation for the 1910D grading MS65 leads the avalanche of acceleration.

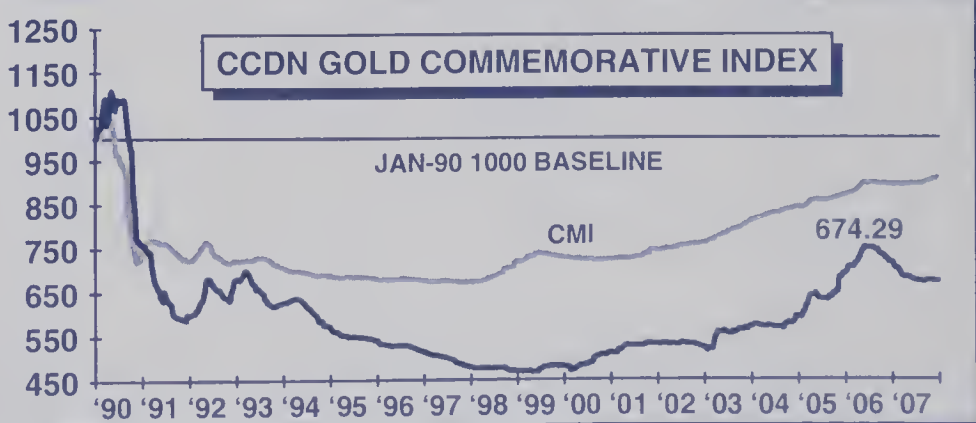

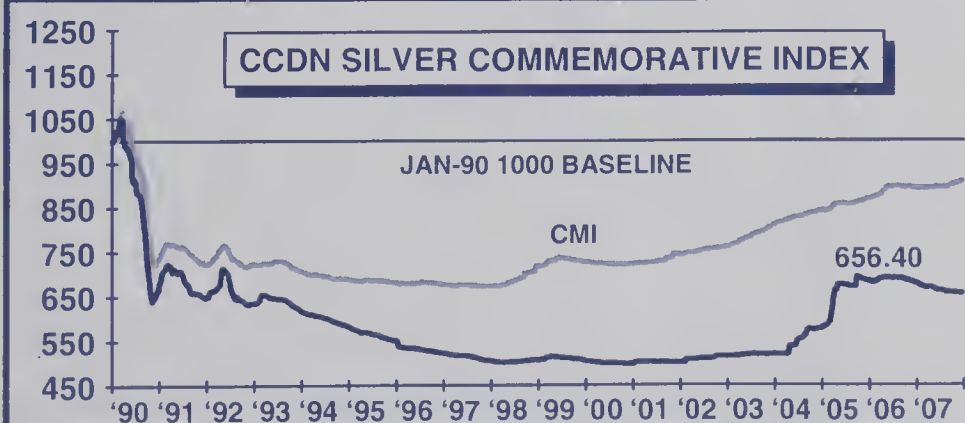

Pre Orlando sales begin with Superior's Elite Coin Auction, Jan. 5-6; Stack's Franklinton II Sale follows Jan. 7; Bowers and Merena Orlando Rarities Auction is next, on Jan. 8. Bowers & Merena have employed the considerable talents of David Hall for on-line video discussions of selected coins in this sale as well as future sales. The official FUN Signature Sale by Heritage will close out an extremely busy early 2008 slate of January auctions on the 9-12. We have listed a few of the many highlights from each of these upcoming events. *This is our last issue of 2007. Our next edition will be dated January 4, 2008. Happy Holidays!*

The Certified Coin Dealer newsletter (the *Bluesheet*) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks on Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

The Fine Print
*The ICG Seven Day Guarantee - ICG will award you a certificate redeemable for double the quantity of coins submitted if we do not perform on our current guaranteed turnaround time of seven days on 15 Day Service and Economy Service submissions. Example: If your 10 coin Economy submission turnaround time is eight days, ICG will send you a certificate good for a free 20-coin economy submission. Guarantee only applies to regular U.S. coin submissions, which excludes varieties, errors, CONECA cross overs, world and ancient coins. "Days" are ICG working days and exclude weekends and holidays. Turnaround time does not include shipping time and is measured from the day ICG receives your coins until the day ICG ships them back. Nothing in this offer precludes or supersedes the terms and conditions on the ICG grading submission form.

In addition to its world-class conservation service, NCS provides comprehensive certification services for coins with irreversible detrimental surface conditions (commonly known as "problem" or "no-grade" coins). All coins encapsulated by NCS are authenticated and guaranteed to be genuine. At your request, coins can be described on the holder as Genuine, or given a Detail's grade.

Any item submitted for NCS encapsulation that is suitable for non-problem coin grading will be transferred to NGC. Extensive variety and error attribution services are also available.

For more information on NCS Certification and Encapsulation, please visit www.NCScoin.com.

NCS coins are approved to be listed as certified on eBay.
